

More agility and speed with SAP S/4HANA

“HPE is a long-term strategic partner contributing to Amica’s continuous improvements and ongoing success. I can’t think of a better partner to help us streamline, optimize, and automate infrastructure management so we can focus on becoming more agile and driving business growth.”

– **Grzegorz Smolański**, Core Business Infrastructure Manager, Amica Group

Amica

SAP S/4HANA® has redefined how businesses use data. It offers faster processing and real-time analytics, allowing users to manage everything from manufacturing to customer service. But along with those additional capabilities comes the need for high performance infrastructure. When Amica Group—a leading European manufacturer of household appliances—updated their ERP to SAP S/4HANA, they turned to HPE solutions to help maximize efficiency.

Objectives

- Ensure seamless global operations and communication
- Have IT stay one step ahead of business needs
- Provide easy-to-use, uninterrupted solutions for end users

Requirements

- Keep SAP S/4HANA instance on-prem
- Separate servers with faster processors and more memory
- Enable performant, reliable production environment

Solution

- HPE Synergy
- HPE Compute Scale-up Server
- HPE ProLiant DL380 Gen10 Servers
- HPE Complete Care Service
