The Adapter for Crisp HDMI Displays

ALOGIC's Elements Series USB-C to HDMI Adapter with 4K Support [Male to Female] is the price-friendly cable for homes and businesses that need to marry a device that supports video output over USB-C [such as a computer] to an HDMI display or device [such as a computer monitor or projector].*

Your warranty-backed Elements cables and adapters support HDMI 2.0 resolutions up to the maximum of 4096 x 2160 [60Hz], or 1080p up to 240Hz. They also feature HDR support.

Now you're equipped for crisp and fluid displays when it's time for gaming, home cinema experiences, or professional tasks such as presenting to your team and overseeing workflows on multiple external displays.

**Not all USB-C ports support video output. In order to use this cable with your computer, the USB-C port that it is connected to needs to support video output using the DisplayPort Alternate Mode standard.*

User-Friendly Adapters

Whether you're looking to install one of our adapters in your home, or to fit out a workplace, rest assured that ALOGIC's Elements range is engineered for maximum user-friendliness. The highly bendable Elements adapters feature compact connectors and low-bend radiuses. Their anatomy, which also features easy-grip PVC jacketing, makes them considerably easier to guide into ports in tight spaces, such as behind displays, and in equipment racks. Our adapters also feature a latch, so once you plug them in, they stay in.

User Interface

Input USB-C Connector (Male)
Output HDMI Video Connector (Female)

Video Support

HDMI 2.0, 18Gbps, Premium High Speed class cable (Backwards compatible with all previous HDMI standards)

Supports all HDMI 2.0 resolutions including 4K/UHD 4096x2160 at 60Hz

- Supports 3D video
- Refresh rates to 240Hz at 1080p
- Colour depths to 16 bit per colour

Physical Characteristics

Materials: ABS DP Connector, PVC Jacket and HDMI Connector
 Colour: Dark Grey

Package Includes

USB-C to HDMI Adapter

Your Adapter When Reliability is Essential

Connector construction undermines the longevity of many HDMI adapters. That's why our engineers and designers have developed a unique ABS connector shell that holds up in high-traffic installation environments. The Elements range is developed out of ALOGIC's experience producing hundreds of thousands of cables and adapters to stand the test of time in the most demanding professional and household environments. Whether at home or in the office, be assured that these adapters won't let you down. We vouch for this with a lifetime warranty.

Features

Supports the following HDMI features (when used with equipment that implement these features):

- Extended Consumer Electronics Control (CEC)
- Adaptive sync; G-Sync and Freesync compatible
- High Dynamic Range (HDR) video support including HDR10, Dolby Vision, HLG Multiple audio stream and Dual View video support

Compatibility

Use for connecting a Thunderbolt port or USB-C port that supports DP Alt Mode video output to a HDMI display
 This cable is uni-directional; it cannot be used to connect a HDMI source to a DisplayPort display.
