

# Quick Installation Guide

\* PG1200 KIT (European version) is used for demonstration in this guide.  
\* Images may differ from your actual product.

Wait until the Powerline LED turns solid green.  
Note: If the LED is solid orange, please refer to FAQ-Q2.

**More:** To add additional Powerline adapters and extenders with the default settings, simply plug them into the wall sockets on the same electrical circuit.

**!** G.hn powerline devices are not compatible with HomePlug AV/AV2 powerline devices.

4 Enjoy!

### Attention

Plug powerline devices into wall outlets instead of power strips.

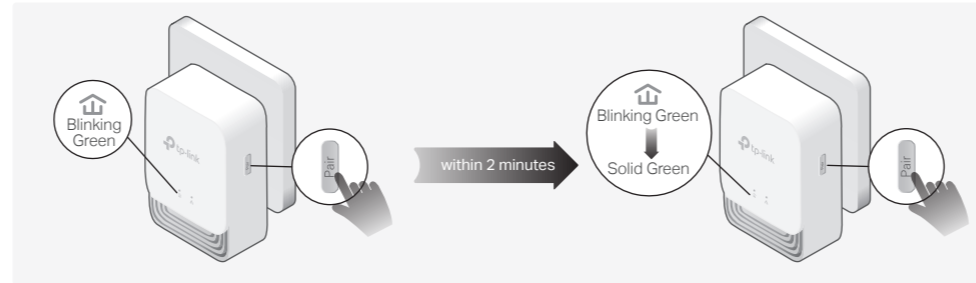

😊 Wall Outlet	☹️ Power Strip

# Set Up a Secure Powerline Network by Pairing (Recommended)

You can create or join a secure powerline network using the Pair button on two devices at a time.  
 Tip: We recommend that you plug in the powerline devices near each other when pairing.

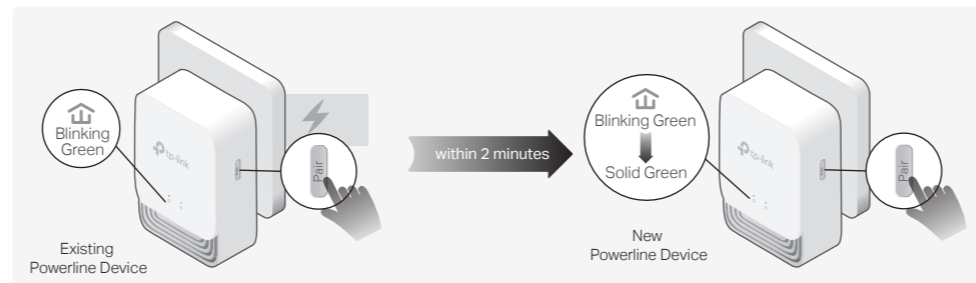

## To create a secure powerline network:

- 1 Press the Pair button on any of the powerline devices for 1 second. Its Powerline LED  should start blinking green.  
 Note: If the Powerline LED does not blink, press the Pair button again.
- 2 (Within 2 minutes) press the Pair button on another device for 1 second. Its Powerline LED  should start blinking green.
- 3 When the Powerline LED  turns solid green, a powerline network has been successfully created.

## To join an existing secure powerline network:

- 1 Press the Pair button on any of the existing powerline devices for 1 second. Its Powerline LED  should start blinking green.  
 Note: If the Powerline LED does not blink, press the Pair button again.
- 2 (Within 2 minutes) press the Pair button on the new powerline adapter for 1 second. Its Powerline LED  should start blinking green.
- 3 When the Powerline LED  turns solid green, it's done.

# Physical Appearance

LED	STATUS	DESCRIPTION
	Off	The powerline adapter is off.
	Blink Green	Quickly: The powerline adapter is pairing or upgrading firmware.
		Slowly: Power-Saving Mode is on.*
	Solid Orange	The powerline adapter is not connected to a powerline network.
	Solid Green	The powerline adapter is connected to a powerline network.
	On/Off	The Ethernet port is connected or not connected.

\* If the device connected to the adapter is turned off or inactive for more than 5 minutes, the powerline adapter will automatically switch to Power-Saving Mode.

BUTTON	DESCRIPTION
Pair Button	Press and hold for 1 second to set up or join a secure powerline network. Press and hold for more than 6 seconds to reset the powerline adapter.

# Frequently Asked Questions

### Q1. How do I reset my powerline adapter?

- A1. With the powerline adapter plugged into an electrical outlet, press and hold the Pair button about 6 seconds until all LEDs go off.

### Q2. What should I do if the Powerline LED is solid orange?

- A1. Try another wall socket and make sure all powerline devices are on the same electrical circuit.
- A2. Try to set up a powerline network by pairing. Refer to the section above for instructions.
- A3. If the problem persists, contact our Technical Support.

### Q3. What should I do if there is no internet connection in my powerline network?

- A1. Make sure all powerline devices are on the same electrical circuit.
- A2. Make sure the Powerline LEDs  are solid green on all of your powerline devices. If they are not, pair all devices again.
- A3. Make sure all devices are correctly and securely connected.
- A4. Check if you have an internet connection by connecting the computer directly to the modem or router.

### Q4. What should I do if a successfully-paired powerline device does not reconnect after it is relocated?

- A1. Try another socket and make sure it is on the same electrical circuit.
- A2. Try to pair the device again, and make sure the Powerline LED  is solid green.
- A3. Check for possible interference due to a washing machine, air conditioner or other household appliance that may be too close to one of the powerline devices. Plug the appliance into the integrated electrical socket to remove the electrical noise if your powerline device has an integrated electrical socket.

TP-Link hereby declares that the device is in compliance with the essential requirements and other relevant provisions of directives 2014/30/EU, 2014/35/EU, 2009/125/EC, 2011/65/EU and (EU)2015/863.  
 The original EU Declaration of Conformity may be found at <https://www.tp-link.com/en/support/ce/>  
 TP-Link hereby declares that the device is in compliance with the essential requirements and other relevant provisions of the Electromagnetic Compatibility Regulations 2016 and Electrical Equipment (Safety) Regulations 2016.  
 The original UK Declaration of Conformity may be found at <https://www.tp-link.com/support/ukca>

#### Safety Information

- Keep the device away from water, fire, humidity or hot environments.
  - Do not attempt to disassemble, repair, or modify the device. If you need service, please contact us.
  - The socket-outlet shall be installed near the equipment and shall be easily accessible.
  - Plug the powerline devices directly into the wall outlets but not the power strips.
- Please read and follow the above safety information when operating the device. We cannot guarantee that no accidents or damage will occur due to improper use of the device. Please use this product with care and operate at your own risk.

# Web Management

The intuitive web management page allows you to easily manage your powerline devices. You can change the LAN settings of the powerline devices, configure advanced features such as Soft Pair, QoS, and more.

1. Download the utility on the product's Support page at <https://www.tp-link.com/support/download/>
2. Install and open the utility, move your mouse over a powerline device, and click the  (Website) icon.

Tips: You can also use the IP address of the powerline device to visit its web management page. The IP address can be found on your router's client page.
