

Release Notes and Update Instructions

AV Bridge CONFERENCE

Current Release

AV Bridge CONFERENCE 1.1.1

June 26, 2023

Improvements

- Manufacturing improvements.

Release History

AV Bridge CONFERENCE 1.1.0

December 16, 2019

New Features

- If you restore factory defaults, the device now requires an initial setup step to make the administrative controls and other functionality available. In this initial step, you must set the admin password. This is also required for initial access to AV Bridge CONFERENCE devices that ship with this version of firmware. See [Initial Set-Up Procedure](#). After completing the initial setup, you can access the administrative interface. At this time, setting the admin password is the only task in the initial setup procedure.

Improvements

- Some customers reported that the IP streaming URL could not be cut and pasted from the web interface if using Firefox. This has been fixed.

AV Bridge CONFERENCE 1.0.4

March 9, 2018

New Features

- Added the ability to lock and unlock the front panel controls via the admin web UI.

AV Bridge CONFERENCE 1.0.3

May 15, 2016

Improvements

- Improvements to the USB driver for USB disconnects and hot plug events.
- Fixed stereo playback could be processed as only the left channel, this has been resolved and will now be a summed mono representation of stereo audio.

AV Bridge CONFERENCE 1.0.2

January 25, 2016

Improvements

- Changes made to improve manufacturability.

AV Bridge CONFERENCE 1.0.1

May 20, 2015

Improvements

- Enhanced ability for HDMI input to auto-detect a variety of HDMI devices including Vaddio RoboSHOT HDMI.
- Reduce occurrences of incorrectly auto-detected color space settings.

AV Bridge CONFERENCE 1.0.0

June 25, 2014

Notes

- Initial Release.

Initial Set-Up Procedure

If you are updating from version 1.1.0 or earlier, you will need to set a password for the `admin` account immediately after completing the update. You may also need to change the security settings, as the default settings have changed.

Refer to the product's manual for specific instructions to discover its IP address and access its web interface.

To access the web interface, type `https://` followed by the IP address.

Before the product is configured, HTTP access is disabled. It can be re-enabled after you set the admin password.

Expect a security warning from your browser. The certificate (the product's website security credential) is self-signed rather than being issued by an external certificate authority.

Different browsers will respond with different messages and options. Your browser will probably present a message indicating one of these things:

- The connection is not private
- The site is not secure
- The site is not trusted
- The site poses a security threat

Despite the security warning, the HTTPS connection is secure and traffic is encrypted.

To proceed to the product's web interface, you will need to make the selections that your browser's security message discourages. The security warning page may present an option to learn more, view details, or go to the "Advanced" page. When you select the applicable option, your browser provides a button or link to continue to the IP address you entered, with a reminder that it may be unsafe. Select this option.

After you have accessed the product's web interface once, your browser may remember its IP address and not present the security message again.

Set the admin password. If there are other tasks on the page (such as reading and accepting policies and agreements), complete them also.

Note: This page includes a link to the company's standard privacy policy. This product does not record or save audio or video files, and it does not store any identifying information other than what you may choose to enter on the Room Labels page of the web interface. However, the device's IP address is considered "personally identifiable information" for the purposes of the privacy policy.

Firmware Update Instructions – AV Bridge CONFERENCE

The process for updating firmware is the same for virtually all Vaddio products. *Your device's web interface may display different information from the screen shot in this procedure.*

Caution

The device must remain connected to power and to the network during the update. Interrupting the update could make the device unusable. If the update does not run, DO NOT DISCONNECT POWER. Call Vaddio Tech Support immediately: +1 763-971-4400 or 800-572-2011.

1. Download the firmware file if you have not done so already.
2. Access the device's web interface and log in as `admin`.
3. On the System page, select Choose File and select the file you downloaded. Then select Begin Firmware Update.

4. Read the Confirm dialog box, then select Continue. You will be prompted to log in again when the process is complete.

This update can take up to 15 minutes to complete. While you're waiting, you could try the following:

- List silly ways to conserve natural resources. (Save water by frying food instead of boiling it!)
- Think about all the shapes we don't build out of snow. The world may never know the joy of snow-squids.
- Decide what your theme music should be. (I'm claiming Peter's theme from Peter and the Wolf.)

After the update is complete, the System page will display the new firmware version under System Information. Enjoy that new-firmware smell!
