

## Release Notes and Update Instructions

# Quick-Connect USB Interface

---

### Current Release

#### **Quick-Connect USB 1.5.1**

June 28, 2022

##### New Feature

- We have placed a link to the company’s standard privacy notice on this product’s Help page and on the Initial Device Set-Up page. This product does not record or save audio or video files, and it does not store any identifying information [other than what you may choose to enter on the Room Labels page of the web interface]. However, the device’s IP address is considered “personally identifiable information” for the purposes of the privacy notice. This information is stored for display to the user, but not otherwise shared or transmitted.

##### Improvement

- In some cases, firmware updates could fail. This has been fixed.

### Release History

#### **Quick-Connect USB 1.5.0**

December 20, 2019

##### New Feature

- If you restore factory defaults, the device now requires an initial setup step to make the administrative controls and other functionality available. In this initial step, you must set the admin password. This is also required for initial access to devices that ship with this version of firmware. See [Initial Set-Up Procedure](#). After completing the initial setup, you have the option of enabling streaming and other disabled features. At this time, setting the admin password is the only task in the initial setup procedure.

##### Improvement

- Some customers reported that the IP streaming URL could not be cut and pasted from the web interface if using Firefox. This has been fixed.

### **Quick-Connect USB 1.4.0**

January 7, 2019

#### New Features

- Added support for the ZoomSHOT 30 camera.
- Added support for the RoboSHOT Elite series cameras.

#### Notes

- Users with certain combinations of Windows OS and the Firefox browser may be unable to copy and paste the IP stream URL from the device's web UI. If you encounter this issue, try opening the page in a different browser.
- CCU Changes made from RoboSHOT and RoboSHOT Elite Web Pages – Both the RoboSHOT and the
- Quick-Connect USB have web pages for controlling the camera. Simultaneously using both web pages for CCU changes can cause the User Interfaces to get out of sync. Vaddio recommends the user to either use RoboSHOT or Quick-Connect USB (not both) for image changes during operational use. This is known behavior.
- Saving Presets with current image settings – The RoboSHOT and RoboSHOT Elite cameras provide an option to store image settings with a preset. The image settings will be applied after the camera reaches the preset position. However, the Quick-Connect USB is not notified of the image changes and therefore may be out of sync in the web user interface. This is known behavior.

### **Quick-Connect USB 1.3.1**

May 9, 2018

#### Improvement

- Updated scene values for the WideSHOT SE camera.

### **Quick-Connect USB 1.3.0**

February 28, 2018

#### New Feature

- Added support for the WideSHOT SE camera.

#### Improvements

- Adjusted available gain range control for RoboSHOT 12 and 30 cameras to better match camera settings.
- The web interface no longer offers startup preset selection for cameras that do not support it.

### **Quick-Connect USB 1.2.5**

January 9, 2017

#### Improvement

- In some cases, HDMI output from Quick-Connect USB devices included video artifacts that produced a “sparkling” effect. This has been fixed.

### **Quick-Connect USB 1.2.4**

October 5, 2015

#### Improvement

- Production and internal code improvements.

### **Quick-Connect USB 1.2.3**

June 08, 2015

#### New Feature

- Added support for the ZoomSHOT 20 fixed camera.

#### Note

- An update to the Video Codec is included in this version, so the update may take as much as 10 minutes to complete.

### **Quick-Connect USB 1.2.2**

January 23, 2015

#### New Feature

- Added support for the ClearVIEW HD-20SE camera.

### **Quick-Connect USB 1.2.1**

December 5, 2014

#### Improvements

- Modified CCU scene setting to support the RoboSHOT 12 & 30 1.0.1 software release.
- Corrected bug on Telnet API. New version will support Preset Store/Recall commands from Telnet.
- Corrected an issue in the software updater that didn't allow a direct update from firmware version 1.0.0 directly to the latest release.

### **Quick-Connect USB 1.2.0**

October 31, 2014

#### New Feature

- Added support for RoboSHOT 12 and RoboSHOT 30 cameras. This includes support of Tri-Synchronous Motion control and Tri-Synchronous Preset functionality.

#### Note

- Updating an existing Quick-Connect USB currently at version 1.0.0 will require a two-step procedure:
  1. Update Quick-Connect USB to version 1.1.0
  2. Update Quick-Connect USB to version 1.2.0

### **Quick-Connect USB 1.1.0**

January 14, 2014

#### New Features

- Added support for WideSHOT fixed camera.
- Added USB Device Name to Streaming settings so the unit can be uniquely identified.

#### Improvements

- Improved USB video performance with an optimized downscaler for SD resolutions.
- Fixed issue where, if USB stream was disconnected during use, units required a power-cycle to restore streaming.

**Quick-Connect USB 1.0.1**

November 20, 2013

## Improvement

- Fixed a USB video streaming compatibility issue with Mac's Mountain Lion and Maverick OS (Mac OS 10.8.X and 10.9). Before, the USB video stream could stop or freeze when a software application requested video resolution changes on these OS.

**Quick-Connect USB 1.0.0**

July 18, 2013

## Note

- Initial release.

## Initial Set-Up Procedure

If you are updating from version 1.4.0 or earlier, you will need to set a password for the `admin` account immediately after completing the update. You may also need to change the security settings, as the default settings have changed.

1. To access the web interface, type `http://` followed by the device's IP address in your browser's address bar.
2. Set the admin password. If there are other tasks on the page (such as reading and accepting policies and agreements), complete them also.

*Note: This page includes a link to the company's standard privacy policy. This product does not record or save audio or video files, and it does not store any identifying information other than what you may choose to enter on the Room Labels page of the web interface. However, the device's IP address is considered "personally identifiable information" for the purposes of the privacy policy.*

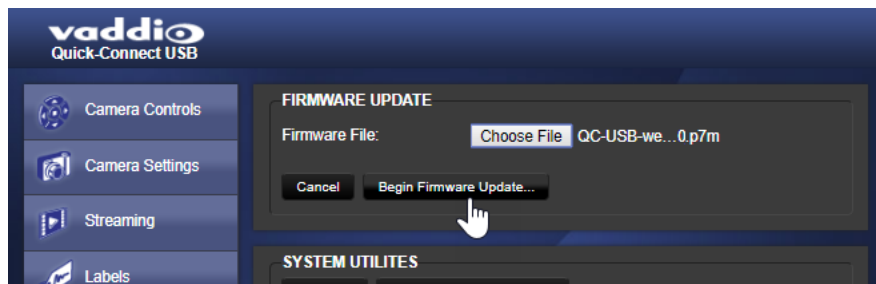

## Firmware Update Instructions – QuickConnect USB

The process for updating firmware is the same for most Vaddio products. *Your device's web interface may display different information from the screen shot in this procedure.*

### Caution

**The device must remain connected to power and to the network during the update. Interrupting the update could make the device unusable. If the update does not run, DO NOT DISCONNECT POWER. Call Vaddio Tech Support immediately: +1 763-971-4400 or 800-572-2011.**

1. Download the firmware file if you have not done so already.
2. Access the device's web interface and log in as admin.
3. On the System page, select Choose File and select the file you downloaded. Then select Begin Firmware Update.

4. Read the Confirm dialog box, then select Continue. You will be prompted to log in again when the process is complete.

This update can take up to 5 minutes to complete. While you're waiting, you could try the following:

- Think about the most interesting thing you ever learned. What made it so interesting?
- Rank the worst plot twists for movies or novels.
- If you could have something named after you, what kind of thing would it be?

After the update is complete, the System page will display the new firmware version under System Information. Enjoy that new-firmware smell!
