

Release notes and update instructions

EasyIP Switch configuration files

The EasyIP Switch is configured at the factory for use in an EasyIP environment. If it becomes necessary to restore factory defaults, this configuration will be lost. You will need to install the appropriate configuration file to return the switch to service in an EasyIP environment.

Current release

EasyIP Switch configuration file EasyIP-Dante1208 1.1.1

EasyIP Switch configuration file EasyIP-Dante1816 1.1.1

June 15, 2023

Improvement

- Better login credential handling.

Release history

EasyIP Switch configuration file EasyIP-Dante1816 1.1.0

June 1, 2023

Improvements

- Improved support for Dante networked audio products.
- Improved support for EasyIP environment

EasyIP Switch configuration file EasyIP_configLuxul 1.0.0

January 29, 2020

Notes

- Initial release.

EasyIP Switch configuration file update instructions

If the EasyIP Switch is reset to its factory defaults, you will need to upload the appropriate configuration file to return it to service as an EasyIP switch.

1. Log in to the switch's web interface.
2. Note the model number near the Luxul logo.
3. Download the configuration file for this model.
4. In the switch's web interface, go to Administration > Configuration > Upload.
5. Select Choose File, and browse to the configuration file you downloaded. Then select Upload Configuration.
6. When the upload is complete, activate the uploaded configuration and save it as the startup configuration.
7. To verify that the switch is now ready for service in your EasyIP environment, go to Configuration > DHCP > Server > Mode and verify that Global Mode is enabled.

If the upload does not complete as expected or if you have any questions, call Vaddio Tech Support: +1 763-971-4400 or 800-572-2011.
