

**Product Overview:**

Easily charge Listen iDSP receivers with the LA-422 USB-to-Micro USB cable. The cable is designed to be used with the LA-421 (1-port) or LA-423 (4-port) chargers, as well as connecting receivers to a computer for charging or firmware updates. Durable and lightweight, each cable is also shielded to protect against signal interference and features a corrosion-free connection.

**Highlights:**

- Charges Listen iDSP products using Listen chargers or standard USB computer ports
- Connects devices to any computer for firmware updates, channel name programming, and more
- High-quality, corrosion-free connectors
- Molded strain-relief construction for durability and flexibility
- Shielded for protection against external interference
