

Humly Visitor

A part of Humly Workplace Solutions

Welcome your visitors with ease

Are my guests here? Has everyone left the building? Keep track of who enters and leaves the office and give your visitors a friendly welcome.

Humly Visitor

Who wants their visitors waiting in line or fighting for the attention of busy staff? The key to a great visitor experience is to reduce friction and frustration. Humly Visitor helps you greet them with a smile.

Receive your visitors with the welcoming simplicity of Humly Visitor. Let them check-in and approve of terms and conditions on any chosen screen, using a clean and elegant user interface. Automatically register your visitors' parking spaces for their convenience.

Less admin, better service

Humly Visitors alerts the host that a visitor has arrived via email and/or text message and can trigger an automatic printing of a visitor badge. Check-out is also a breeze, easing the administrative burden of front office staff. This frees up time for human interaction, the cornerstone of excellent service.

Track visitor flows for security and optimization

Visitor flows are registered in a visitor log with all visitor contact details, who they visited and when. This data is important for safety and security reasons, for example in the case of an emergency. Over time, these insights can also be used to optimize office usage.

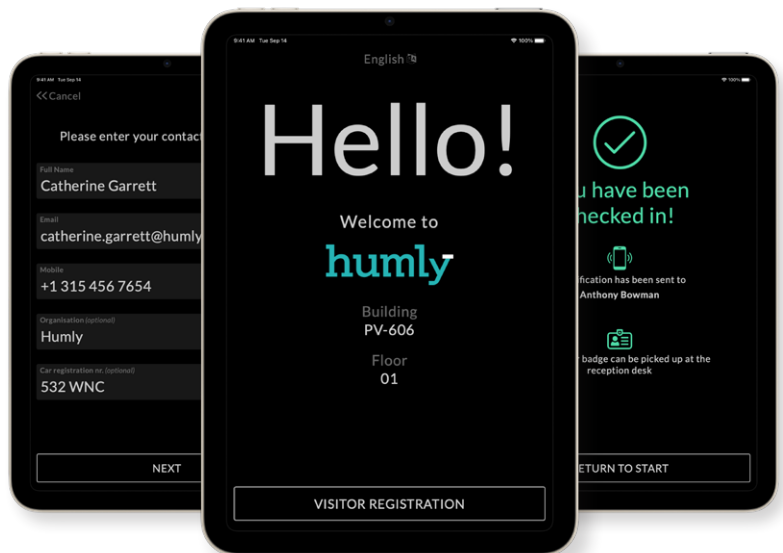

From check-in to check-out

- Visitor check-in and registration
- Visitor log with contact details
- Visitor parking registration
- Terms and conditions approval
- Customizable registration fields and checkboxes
- Trigger printing of visitor badge
- Alert host using email and/or SMS that their visitor has arrived
- Visitor check-out

Less friction, more focus.

Reducing frustration and distractions is the key to modern workplace success. Just like the rest of the Humly Workplace Solutions, Humly Visitor simplifies everyday office life with clean, helpful and intuitive technology.

Humly Visitor.
