

Solution:
Management

Industry:
Hospitality

Country:
USA

Unified, simple, and automated

“We partnered with HPE and worked closely with their engineering team to help bring HPE GreenLake for Compute Ops Management to life. It allows me to rest easy as an IT professional because I no longer have to worry about a component failing or a firmware update breaking our infrastructure. Imagine being on vacation and pushing out firmware without interrupting your holiday. That’s what you get.”

– **Roger Hilton**, Technical Advisor of Global Deployment, Infrastructure, & Integration,
InterContinental Hotels Group (IHG)
