

From dated data centers to future-ready solutions

“I tell my team at KBTG that we work with purpose. We’re one of the core banks that supports our country — without us, hundreds of millions of daily transactions wouldn’t happen. I’m proud that our team continues to innovate and build products that keep our customers happy.”

– **Tawan Jithavech**, Chief Technology Officer, KBTG

Solution:
Data

Industry:
Financial services

Country:
Thailand

The future of banking is cashless, and in Thailand, the future is today. As customers increasingly demand new innovative digital solutions, banks have no choice but to keep up. That’s why Kasikornbank (also known as KBank) developed their technology arm: KBTG. After realizing their data centers held them back, the KBTG team decided to rebuild their infrastructure to meet their customers’ needs.

Solution:
Data

Industry:
Financial services

Country:
Thailand

Objectives

- Enhance security
- Improve latency
- Meet the requirements for tier 3 data centers

Requirements

- Find a solution that could last years
- Simplified management
- Quick recovery in the event of a cyberattack

Solution

- HPE ProLiant DL380 servers
- HPE Superdome Flex
- HPE NonStop
- HPE StoreOnce

Outcomes

- HPE ProLiant provides single-pane-of-glass management
- Infrastructure supports 230 million daily customer transactions
- Relocated disaster recovery (DR) data center for reduced latency
- HPE StoreOnce allows for minimal downtime in the event of a cyberattack
