tp-link | Quick Installation Guide

**WLAN Bluetooth
PCI Express Adapter**

Images may differ from your actual product.

Before You Start:
If you plan on using Bluetooth and already have connected Bluetooth devices, proceed with step 1. Otherwise, skip to step 2.

1 Disable Bluetooth

a. Right-click **My Computer**, select **Manage**, go to **Device Manager**.

b. Expand the **Bluetooth** node to find your existing Bluetooth device.

c. Right-click the existing Bluetooth device and select **Disable**.

Note:
Make sure you have disabled all existing Bluetooth devices (both built-in and third party).

2 Connect to a Computer

a. Turn off your computer, unplug the power cable then remove the case panel.

b. Connect the provided Bluetooth USB cable to the adapter.

Adapter

Bluetooth USB cable

c. Locate an available **PCIE** slot (X1, X4 or X16) and carefully insert the adapter.
Note:
If the bracket is not suitable for your computer, detach it from the adapter's board and replace it with the low-profile bracket.

d. Locate an available **F_USB** connector and carefully plug the Bluetooth USB cable into it.

Note:
If the Bluetooth USB cable is not correctly connected to the motherboard, Bluetooth function won't work even after driver installation.
USB

e. Connect the antenna(s) to the adapter.

Tip:
To maximize performance, make sure the path between the antenna(s) and your router is clear.

f. Replace the case panel, plug in the power cable and turn on your computer.
3 Install Drivers

a. Insert the CD and run the **Autorun.exe**.

Tip: You can also check the new release and download the driver at https://www.tp-link.com/support/download/

b. Install the Wi-Fi and Bluetooth drivers.

① **Wi-Fi:** Click 📶 and follow the onscreen instructions to complete the Wi-Fi installation.

② **Bluetooth:** Click ❋ and follow the onscreen instructions to complete the Bluetooth installation.
