AL5200
Aluminum Raceway

Architectural Aluminum Raceway

Aluminum Raceway is sleek, clean and attractive. Integrated into casework or lab furniture or installed as baseboard, these raceways distribute communication and power wiring while maintaining aesthetics. The satin anodized finish is designed for both good looks and easy service. The "hi-tech" appearance makes this raceway an attractive choice for contemporary spaces. The aluminum systems compliment the decor in commercial offices, laboratories, and healthcare facilities.

Standard devices installed in aluminum raceway mounted under reagent shelf in medical center lab.
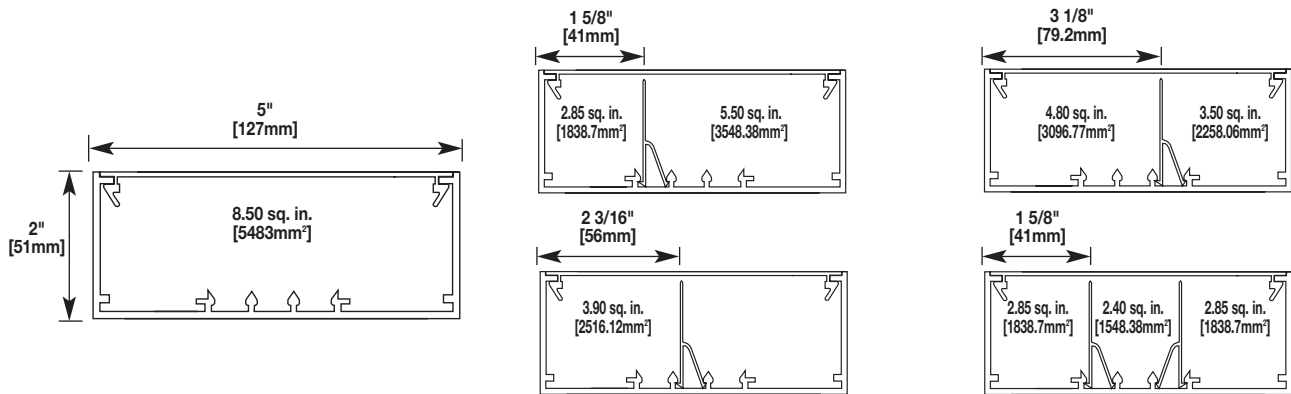

Features & Benefits

■ **Attractive, snap-together aluminum.** Compliments decor in commercial offices, laboratories, and healthcare facilities. Enables quick and easy circuit modifications or additions.

■ **Satin anodized finish.** Good-looking appearance, resists corrosion and is easy to clean and maintain.

■ **Field installed divider for multiple wiring channels.** (Undivided design also available.) Permits separation of power and voice/data communication wiring or breakout of "clean" power from standard power circuits.

■ **Numerous raceway channel configurations.** Able to accommodate your specific cable capacity requirements.

■ **Accommodates most standard flush mounted switches and receptacles.** Accepts devices up to 30 amperes to meet any job requirement.

■ **Full line of fittings.** Provides a complete installation and interconnection to existing wiring or other raceways.

■ **Datacom connectivity options.** Accepts industry standard and proprietary devices from a wide range of manufacturers to provide a seamless and aesthetically pleasing interface for voice, data, audio, and video applications at the point of use.

■ **UL5 and ADA compliant.** Raceway and fittings meet UL5 specifications and can be installed in conformance with ADA requirements.

■ **UL and cUL Listed component raceways.** File E73943 Guide RJBT, Fittings: File E74343 Guide RJPR. Meets Article 386 of NEC and meets Section 12-600 of CEC.

* 20% cable fill is calculated to approximate reduction in cable capacity due to connectors mounted within raceway and fittings that may restrict cross sectional area.

** 40% cable fill is the maximum designed cable fill based on a proposed revision to TIA/EIA 569-A.
