EP3347/90

Highlights

AquaClean filter

Brew your coffee with clear, purified water by simply changing the AquaClean filter when prompted by your coffee machine. The Philips 3300 can brew up to 5000 cups of coffee before it needs descaling.

Quiet coffee making with SilentBrew

Our patented SilentBrew technology reduces machine sounds so you can enjoy the experience of brewing aromatic coffee with significantly reduced noise. Using sound shielding and quiet grinding, our fully automatic espresso machines make 40% less noise than earlier models and come with a Quiet Mark certification.

LatteGo milk system

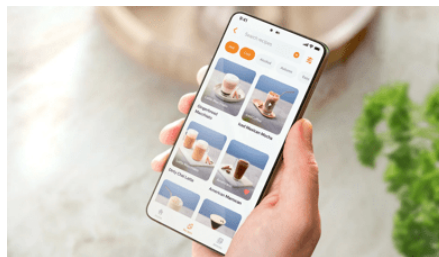

At the touch of a button, LatteGo automatically creates silky-smooth milk froth for your cup of coffee, thanks to its powerful cyclonic frothing technology. Even with your favourite plant-based milk alternatives, you can enjoy coffee just the way you like it.

100% ceramic grinders

Bring out the full flavour of your coffee with our hard-wearing ceramic grinder. The durable ceramic grinder of this Philips 3300 coffee machine can be adjusted in 12 steps, from fine to coarse grinding.

Effortless, inspired coffee w/ HomeID

Learn the ins and outs of your Philips Ep33479/90 machine and discover new cafe-style coffee recipes on our HomeID app.

6 hot and refreshing drinks

Enjoy 5 popular coffee recipes, classic espresso, regular black coffee, cappuccino, latte macchiato and iced coffee, with the perfect crema, aroma and temperature. Hot water for tea is also available. The unique brewing system of this automatic espresso machine perfectly extracts the beans' flavours with a slower flow rate and at a lower temperature. Add ice cubes to your drink and enjoy a delicious iced coffee, with no compromise on coffee intensity.

Fastest milk system to clean ever*

LatteGo is the fastest milk system to clean with only 2 parts, no tubes and can be cleaned in 10 seconds under the tap or in the dishwasher. Philips is not offering automatic cleaning as it requires complementary cleaning.

Easy coffee selection and customisation

Easily select your favourite drinks thanks to the modern touch screen display with coloured icons. Adjust your coffee your way with the My Coffee Choice function: choose your preferred coffee strength, length and milk froth level, just to your taste.

Specifications

Safety feature

Automatic shut-off timer: Yes
Safety certification: Yes

Technical Specifications

Energy Efficiency rating: Class A
Power: 1500 W
Voltage: 230 V
Frequency: 50 Hz
Number in pack: 1
