AVOCOR OPS DATASHEET

Plug, play, and elevate your display experience - no cables, no hassles.

OVERVIEW

Introducing the game-changing OPS PC powered by the 11th Generation Intel® Core™ i5 Processor, crafted to seamlessly integrate with all Avacor Interactive Displays. By transforming your display into an all-in-one touch PC powerhouse, it offers an unrivaled no-cable experience, enhancing aesthetics and functionality. Built upon cutting-edge architecture, the OPS ensures streamlined and efficient deployment of key applications vital to your workplace. With the preloaded Windows 11 Pro OS, users can navigate a familiar and secure environment for all their business-critical applications, from collaboration tools to industry-specific software.

Opting for an OPS PC with Avacor ensures compatibility across our range of interactive displays, resulting in a streamlined, efficient deployment. This system provides the ultimate plug-and-play experience with minimal cabling and setup time, allowing IT managers to deploy at scale with ease and confidence.

SOLUTION Highlights

Designed to be integrated directly into the display, reduce clutter and external cabling.

Modules are universally compatible with all of our OPS-compliant displays, making future upgrades or replacements easier and cost effective.

Remove or replace the computing module as needed, simplifying maintenance tasks and minimizing downtime.

Gaining its power directly from the display, you can power on your complete system with the power button.

8GB RAM for seamless multitasking, stunning 4K imagery for lifelike visuals, and HDMI Out for secondary display options.
