T3-AC2, T3-AC2CP

T3-AC2
Shown in black, aluminum & brass.

T3-AC2CP
Shown with round cover in black.

US Patent US D553,306 S

The T3-AC2 primarily allows quick, convenient access to AC power and network access for up to two computers or laptops.

The keystone areas can be populated with a variety of connectors including network, telephone, RCA or mini stereo audio, push buttons and much more to suit unlimited applications. Alternate style snap in keystone connectors and blanks are available separately.

These stylish table boxes fit a 3½" round opening and are easily installed using a standard hole saw.

Available in black, brass or aluminum to blend with the decor. The small footprint provides an unobtrusive complement to any décor. The T3-AC2 can be installed in tables ¾" to 2½" thick. They are shipped with 3" installation screws and the components listed below.

The T3-AC2 includes:
· 2 AC Power outlets (pre-mounted) with 9' integral 14 GA SJT power cord
· The T3-AC2HW hardwired versions do not include a power cord. Short leads and wire nuts are provided for direct AC connection.
· 2 RJ-45 pass through connector (pre-mounted)

The T3-AC2CP includes:
· 2 AC Power outlets with 9' Cord and plug
· 2 RJ-45 to RJ-45 CAT-5e cables (EIA/TIA568B) cables 9'

All cables are pre-installed and tested at the factory.
Cable lengths are measured while cables are fully extended.

T3-MJ+

New Options and Muting Features!

US Patent Number: 6,881,080
Microphone not included.

Models Available in 3 Pin, 5 Pin or Mini 3 Pin XLR and built-in muting option.

The first elegant way to mount a gooseneck microphone. These stylish, mini tableboxes are round and are available in three finishes brass, aluminum, or black to complement a variety of decors.

The **T3-MJ+** is a simple installation requiring a 2-inch round hole. Less than 1.5-inches of under table clearance is required. The built-in, acoustically isolated microphone connector accommodates microphones with 3-pin XLR plugs of a diameter of 1-inch or less and provides superior shock and vibration damping.

They are designed to accommodate a wide range of tables and lecterns with up to 2⅛-inch thick surfaces. An undertable shroud is provided as part of the assembly.

The **T3-MJ+1B** or **2B** lets you add one or two buttons to the basic **T3-MJ+**. These units are custom assembled with momentary or maintained type switches with a variety of switch caps and bi-color LED's. The switch (SPDT) contacts and LED wires terminate on screw terminals for ease of wiring.

The **T3-MJ+1BM** or **2BM** models feature an internally pre-wired built in mute feature. The right switch, when pressed, will alternate between mute / unmute states. Mute status is provided via the bi-color LED with red indicating mute and green indicating active. Power for this feature is derived from the mixer's phantom power source.
