Configuration:

LS-71-216 Listen iDSP Advanced Level IV Stationary RF System (216 MHz)

Product Overview:

The LS-71 216 MHz Stationary RF System from Listen Technologies is the perfect high-capacity assistive listening solution for permanent installations. Offering coverage up to 914.4 m (3,000 ft.) for venues handling as many as 100 visitors or clients, the complete package includes our LT-800-216 Stationary RF transmitter and four of our high-performance LR-5200-216 iDSP receivers, as well as everything required for immediate assistive listening.

The LS-71 system comes with our LA-381 Intelligent 12-unit charging tray, which provides plenty of capacity for charging, storing, and managing up to twelve (12) receivers. The high-capacity tray allows room for upgrading and expanding your RF system as the demands of your venue grow.

An assistive listening notification signage kit, cable management unit, log book, and more are also included to create a convenient and complete solution for offering assistive listening immediately.

Highlights:

Complete, long-range 216 MHz RF system complete with LT-800-216 transmitter and four advanced, multi-channel iDSP receivers with coverage up to 914.4 m (3,000 ft.) for larger venues

Universal antenna kit and rack mounting kit make it easy to install and configure for virtually any permanent installation

Four universal ear speakers and two integrated neck loops/lanyards are included

12-slot drop-in charging/dispensing station, compliance signage, cable management unit, RCA cable and more also included for immediate set up
