

FL-1300 Floor Box

Metal Products Group

FL-1300
with Hinged Door
in Black Sandtex

DESCRIPTION

The FL-1300 is a practical floor box designed for wood stage floors and computer floors. A standard 2-gang blank plate (supplied with the box) provides the contractor a perfect solution for audio, video, power or telecommunication connections. The cover utilizes a dual door design that allows full access when making connections. Once connections are made, the door closes and the cables exit through the small cable opening. As a safety feature, the cable access door is closed when the box is not in use. The FL-1300 cover is painted with a black sandtex paint for a non-skid finish. Knockouts are provided on the sides, rear and bottom of the box. The FL-1300 floor box is a one piece, all welded design providing both strength and simple installation. The FL-1300 as well as the entire FSR floorbox product line is available on Autocad/DXF files. Call today for your free disks.
