Ernitec Ernitec-iA Smart Parking

"Occupancy
SENTINEL (machines, network and cameras)
Dashboard
Bicycle
Scooter
Vehicle classification: bus, train, truck, boat, motorbike, car
API Integration
Equipment performance metrics (heat, data, etc)
Camera performance metrics (+ vandalism)"

Connect
to any camera
or video signal
We use our connectors to communicate directly with existing cameras and thus extract the video signal and/or data analytics that the systems offer natively (counting, alarms, etc.)

We process the video with the best Computer Vision algorithms
We analyze the video signal with a wide variety of Computer Vision algorithms; including detection and counting of people and objects, demographics, social distancing, emotions... or tailor-made algorithms.

We offer the information through a customizable API or Dashboard
We transform the information obtained in video analytics into valuable data for our clients. The data is accessible through an API or a Dashboard with customizable reports and alerts.

Specifications

Legal Information	**ADR Information**	No restrictions
	Country of Origin	Spain
	Tariff No.	1
Vendor information	**Brand Name**	Ernitec
	Warranty	1 Year(s)
