321 Snap Stick
2 Gang 1 Power 1 Data
*Some Assembly Required

Smart-Way Stick
2 Gang 2 Power

## FSR

### Power Products Group

## DESCRIPTION

The Smart-Way STICK is the smart way to get power and data on the floor where you need it. The Smart-Way STICK gives you the capabilities for power in a complete wired unit or power and data with our 321 Snap Stick model. All models give you the ability to have access to power anywhere, anytime within seconds.

The 6 ft. Smart-Way STICK model is offered as a "two pack" or individually. The 6' units are fully assembled and prewired. Two black decora 15A duplex AC Power outlets and a 9ft. power cord are included.

Simply place the durable anodized aluminum or slate-gray powder coat paint raceway on top of any floor surface and plug the cord into an available outlet. Locate the receptacle unit where you need it in the room and you're all set.

The two 321 Snap Stick models give the convenience of creating specific raceway lengths in the field, giving you the option to assemble a 3', 4', 5', or 6' long Stick. Models complete with either Dual duplex power outlets or one duplex power outlet / one decora data brush plate are offered. The 321 device box is now available

with Dual USB Charger Duplex Receptacle. AC outlets, decora data brush plate, and power cord are black. Wiring clips are included to keep wires running through the track in place. Some assembly is required.

Our Smart-Way Stick and Modular Linx System are teamed up to provide a quick way to extend the platform's power distribution along the floor to another work surface. The addition of the Smart-Way MLS Stick gives designers, architects, users, and engineers the flexibility to rapidly reconfigure and move power anywhere in the room. The Stick is available in 6-foot lengths and a choice of slate or aluminum to blend into any décor.

MLS Stick Aluminum

## FEATURES

- Place on top of any flooring for all-in-one power or data
- Sold as a 6' section or available in our 321 Snap Stick option
- ADA-compliant profile
- Circuit breaker protected
- Includes 9' AC power cord with plug
- Available with a 15' AC cord in our 321 option
- Device box options provide power, communication, A/V connectivity and USB charging Ports
- Plug it in and you're all ready to go
- MLS Stick, available in 6-foot lengths, swiftly extends the platform's power distribution along the floor to another work surface

Perfect for offices, conference rooms, collaborative work environments, classrooms, or any where accessibility to power and data is needed.
