

ANKER SAMSUNG CABLES

USB-IF Compliance & Reliable Cables for Daily use

KEY SELLING POINTS

RUGGED AND DURABLE

A hard-wearing nylon exterior combines with a 10,000-bend lifespan to create a cable that's durable both inside and out.

RELIABLE CHARGING

With the USB-IF compliance, it can charge iPad Pro (G1-5), Samsung Galaxy S22, S21, S20, Google Pixel 3/4/5/6 to its full-speed charging.

CHARGE AT HIGH SPEED

It can charge a Samsung S22 Ultra to 65% in just 30mins when used with a compatible charger. And transfer your favorite movies, music, and more at speeds of up to 480 Mbps.

WIDELY COMPATIBLE

It supports a max power output of 100W when paired with a 100W or above wall charger to power up virtually any USB-C device, including phones, tablets, and laptops. (This cable does not support media display.)

ONE SENTENCE INTRODUCTION

A durable and car-towing cable for your daily usage!

FREQUENTLY ASKED QUESTIONS

Who and when is recommended to use this cable?

Cable is a essential gadget in daily life right now in this digital world. Depending on the No. and type of your devices. You can possess one or more to be used at home, workplace, travel, business trips.

Why the same cables on the market are not as good as yours?

The biggest pain point of most of cables in the market now is it always tangles and looks messy.

In order to solve this problem, Anker uses silicon material. You've never felt a cable like this before. The silicone finish feels super soft like skin feel.

No matter how you twist it, bend it, flex it, it remains tangle-free even when stuffed into a bag or pocket, or wrapped around a portable charger..

Will the speed of charging my device be slower if the cable is not the original one?

Not really. You know the maximum power that the cable can support is 20V, 5A. It should charge most of the devices in the market now at the speed the device needed.

This cable feels different from other ones, what kind of material is it?

Yes, you are right. All this type of Anker cables are called skin feel cables.

The cable uses silicone finish, so when you touch it, you feel like touching skin.

This is not the original cable of my device, is it safe to use?

You can trust Anker cables. With the USB-IF compliance, it can charge your device such as iPad Pro (G1-5), Samsung Galaxy S22, S21, S20, Google Pixel 3/4/5/6 to its full-speed charging.

Does this cable support data transfer?

Yes. The transfer speed is 480Mbps. Equivalent to 3.6 minutes to transfer 10G photos.
