

HPE and NAKIVO

HPE Storage and NAKIVO Backup & Replication

Working together. Accelerating results.

A new style of partnering

Hewlett Packard Enterprise and NAKIVO are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help meet these needs, NAKIVO is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies simply, confidently, and efficiently.

NAKIVO has access to the right tools, processes, and resources to help our joint customers accelerate innovation and transformation that brings value, achieves business needs, and increases revenue and market share.

Product overview

NAKIVO Backup & Replication

NAKIVO Backup & Replication seamlessly integrates with HPE products, allowing you to consolidate your data protection activities into a single, all-in-one solution for better reliability and efficiency. NAKIVO's solution has a proven track record in helping organizations protect their data across on-premises, cloud, and edge. HPE's industry-renowned storage platforms enhance the NAKIVO solution's efficiency, improving backup processes and streamlining administration to ultimately help maximize data availability and help minimize recovery times and resource usage.

The joint solution between NAKIVO and HPE facilitates seamless data transfers, significantly mitigating the risk of operational interruptions and offering businesses a reinforced data protection strategy. Multiple integration points with HPE products allow organizations to help ensure data availability, infrastructure monitoring, and business continuity. By implementing the NAKIVO solution with your HPE infrastructure, you can achieve lower TCO on data protection and significantly improve your recovery objectives.

HPE GreenLake for File Storage MP

Data is the life-force of the modern enterprise—it powers the insights, innovation, and competitive advantage that move your business forward, faster. But to accelerate your data-first modernization and be AI-ready, you need to eliminate the storage silos, tiered data pipelines, scale-out limitations, and management complexity—across edge-to-cloud—that slow you down. HPE GreenLake for File Storage provides a single, flexible solution to achieve faster time to AI insights for competitive advantage. It offers enterprise performance at scale to accelerate AI and other data-intensive applications with a resilient, shared-everything architecture designed to scale to exabyte capacities; a simpler, intuitive cloud operational experience with radically simple setup and file data management, a global namespace for collaboration, and rich data services; enhanced efficiency at scale that meets the demands of AI workloads with higher ROI.

HPE Alletra Storage MP B10000

HPE Alletra Storage MP B10000 (previously HPE GreenLake for Block Storage built on HPE Alletra Storage MP) brings mission critical storage to the mid-range—delivering enterprise-class resiliency, performance, and scalability at an affordable price. Powered by the HPE Alletra Storage MP 10000 hardware platform, B10000 is the industry’s first disaggregated, scale-out block storage with 100% availability guaranteed. Get an intuitive, AI-driven cloud experience on-prem that simplifies management and shifts operations from infrastructure-centric to app-centric. Empower line of business with intelligent, self-service provisioning while managing and protecting workloads across your hybrid cloud from a single cloud console. Scale performance and capacity independently—and without disruption—with disaggregated storage. Meet every SLA with mission-critical storage that delivers an unrivaled 100% data availability guarantee. Accelerate your most demanding apps with consistently fast performance and ultra-low latency—even at scale.

HPE Alletra

HPE Alletra is a bold paradigm shift for data infrastructure from edge to cloud. It sheds the complexity and silos inherent in conventional hybrid cloud environments with category-defining, cloud-native data infrastructure that delivers a cloud operating and consumption experience wherever data lives. Built for every application from traditional to modern, HPE Alletra spans workload-optimized systems to deliver architectural flexibility without the complexity of traditional storage management. It enables IT to shift from owning and maintaining data infrastructure to simply accessing and utilizing it on demand and as a service.

HPE Primera

The world’s most intelligent storage for mission-critical apps¹ that delivers extreme resiliency and performance with the agility of the cloud. Answer all your mission-critical application challenges with HPE Primera. Finally, intelligent storage leverages autonomous operations to enable predictable performance at scale—and consolidation for all your apps. Built with the agility of cloud and powered by the intelligence of HPE InfoSight, HPE Primera delivers instant access to data with storage that sets up in minutes, upgrades transparently, and is delivered as a service. Plus, it’s backed by a 100% availability guarantee.²
