AIR Cooler

Introduction

ABOUT VIND

Valkyrie Vind SL125 is a superb CPU air cooling system for modern Intel and AMD processors. It comes with premium features such as customizable A-RGB lightning and powerful X12 fluid dynamic bearing fans for quiet and reliable cooling performance.

DENSE FINS

With a total of 50 fins in the heatsink, there is sufficient surface area for premium Valkyrie X12 fans to efficiently remove heat, providing superb performance for smooth gaming experience.

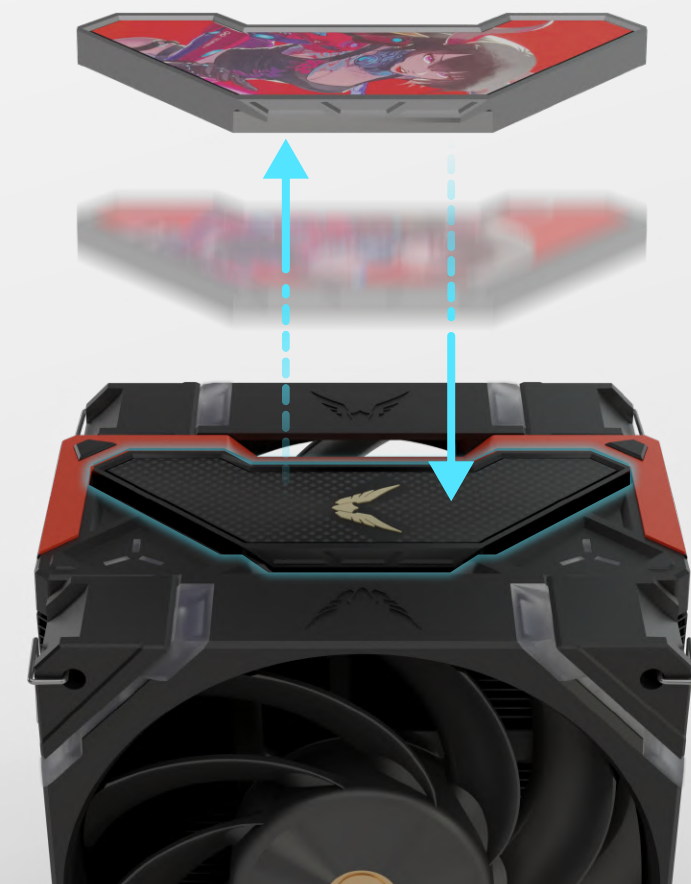

A STRONG, SILENT TYPE RGB FANS

Combination of power and silence with included Valkyrie X12 fans. Premium build quality and fluid dynamic bearings that offer reliable performance even in the long-term use. The frame features attractive addressable RGB that will fit to any PC.

UNIQUE AESTHETICS

The swappable heatsink cover is painted with popular anime-style graphics, a must-have for enthusiasts looking to express their personality in a different way.

Features

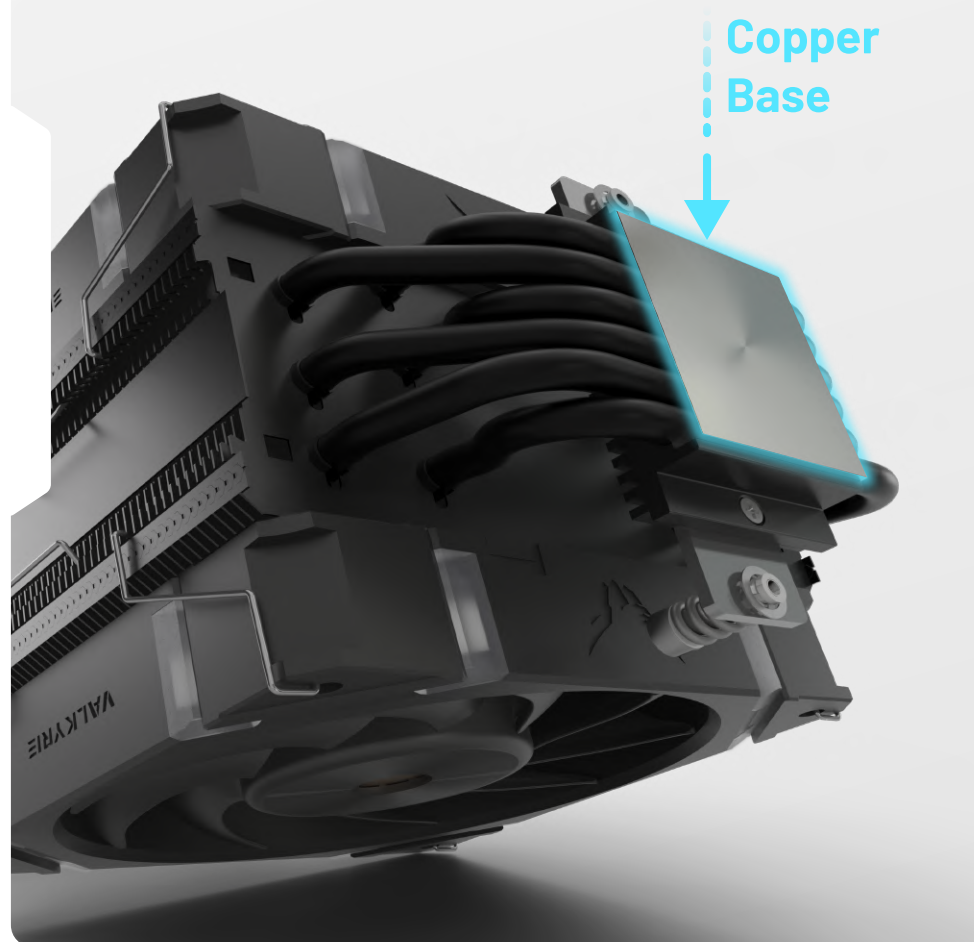

ARGB WHERE IT MATTERS

To make it even more unique, there are addressable LEDs in the heatsink itself, as well as inside the fan frames. Users can control these LEDs to create mesmerizing lighting effects that fit their individual style.

IMMENSE POWER

Vind SL125 uses 6 large high-performance composite copper heatpipes to move the heat away from the copper base into a dense aluminium heatsink.

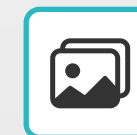

eTeknix

"Valkyrie has gone above and beyond here, and even their unboxing experience is more akin to a high-end Apple product than a CPU cooler... With great thermals, powerful fans and lots of customisation, it's clear that Valkyrie is going to earn a lot of attention for this cooler, and rightly so!"
