Fits devices with Protective Boot (EDA10A-RB-0) and without Rotating Hand Strap (EDA10A-HS-1PK). With USB Host Type -A. With Easy-switching system. Charger via pogo pins. With AMPS, VESA 75.

Item no: 712392

EAN Number: 7320287123920

Use an active holder for your EDA10A and you will always have a freshly charged battery! The holder provides a neat and comfortable installation - safe and convenient. The holder is equipped with a cig-plug for connection to the vehicle's 12/24 Volt socket. 3A charging. Charging via pogo plug. The holder is equipped with a USB-Host port so you can connect an accessory.

This holder is to be used when you want to have your EDA10A extra securely in place and still have it easy accessible.

Easy-switching system:

The easy-switching system enables you to upgrade the holder only, and keep the installed cables. It saves you a lot of time! When upgrading to a new device, you do not longer need to make a full installation. Same goes for maintenance in case of warranty or damage. You simply disconnect the holder from the charging cable via the Molex 6-pin quick connector, and then connect the new holder. The switch is done in a few seconds.

Choose installation placement with care, devices must not be placed in positions where they may block the view or important controls. The cradle should only be attached onto a suitable place. Installations always take place at the customer's own discretion and responsibility.

Fits the following models:

Honeywell EDA10A
