

M64 PRO WIRELESS

CHERRY XTRFY M64 PRO 8K WIRELESS ultra-light gaming mouse

Models may vary from the image shown

M64 PRO WIRELESS. ULTRA-FAST 8K.

The Pro version of the M64 Wireless brings you incredible speed and extremely low click latency thanks to its 8000 Hz technology. Evolving from the best-selling M4 mouse, the M64 series introduces a reinvented ergonomic design for even better grip and control, lower weight and higher performance. Get ready for the next level.

8000 HZ.

8 times every millisecond. By sending up to 8 times more data than a standard 1000 Hz gaming mouse, the M64 Pro Wireless makes your cursor movements more accurate on high refresh rate monitors, and enables your computer to respond faster to every click. This mouse offers one of the lowest click latencies in the world.

UNIQUE ERGONOMIC SHAPE WITH ULTRA-LOW FRONT.

Aiming for the perfect ergonomic shape, CHERRY XTRFY designed the M64 series with input from some of the world's most prominent pro players. As an evolution of the M4, the M64 mouse comes with a reinvented design for enhanced grip, including adjusted side curvature, button grooves and an ultra-low front, allowing you to move your fingers closer to the pad for more precision in every swipe.

ESPORTS-GRADE WIRELESS PERFORMANCE.

Rooted in esports, CHERRY XTRFY's prime focus is performance. The M64 series features wireless technology that has been refined over years, offering total freedom of movement without compromising speed and responsiveness. Combined with Pixart's top-performing 3395 sensor, there's nothing holding you back.

SOLID SHELL. WIRELESS. STILL JUST 55 GRAMS.

Despite being wireless with a 350-mA battery and a hole-free chassis, the M64 Pro Wireless is incredibly lightweight. At 55 grams, it's optimal for competitive gaming, offering swift and precise movements while retaining control.

PLAY FOR 90 HOURS. CHARGE IT FOR 2.

The battery offers up to 90 hours of playtime per charge in Standard Gaming Mode, and you can easily adjust the settings for higher performance or extended battery life. During the short time it takes to charge the mouse, you can continue playing unhindered with the flexible CHERRY XTRFY EZcord® charging cable.

THE 6TH GENERATION.

This mouse is part of the 6th generation of CHERRY XTRFY mice, a series of top-tier models that deliver the performance you need to play at your peak. For an ergonomic form factor, go for the M64. Prefer a symmetrical shape? The M68 is the option for you. Both versions are wireless and come in 1000 Hz as well as 8000 Hz (Pro) models for state-of-the-art performance.

HIGHLIGHTS

- Ultra-fast 8K mouse
- Optimized for esports
- Ergonomic shape with ultra-low front
- 55 grams lightweight with a solid shell
- 2.4 GHz lag-free wireless
