USER GUIDE

WELCOME

Bluetooth
Ensure Bluetooth is turned on.

App
Get the most out of your Nothing device with the Nothing X app. Customise EQ and gesture control, update firmware, and more.
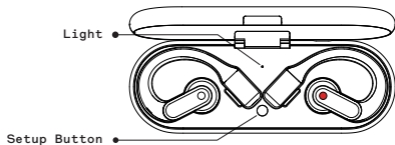

PAIR

Use with your Android device (Google Fast Pair)
First time use or new device connection
Open the charging case with the buds inside, and place it near your Android device for on-screen setup.

Connect to other devices
With the buds in the case and the case open, press the setup button until a light blinks. Then choose buds in the Bluetooth settings.

  Right: volume up

More options in Nothing X app.
*Optional functions: skip back, skip forward, volume up, volume down and wake-up Voice Assistant.

CHARGING

Earbuds
Place the buds in the charging case and close the case to charge.

Ear case
Close the case and connect it to a power supply using the supplied power cable.
The case is charging when the indicator lamp flashes white. Once the light remains white, the case is fully charged.

Power level indication
❄ White: battery is more than 30% charged
✳ Red: battery is less than 30% charged

- With the buds in the case, the indicator lamp will flash in the colour relating to the battery level of the buds, not the case.
- With both buds removed from the case, the indicator lamp will flash in the colour relating to the battery level of the case.
- If using a Nothing phone, you can set the widget on the lock screen or check the power status of the device in Quick Settings on the drop-down notification bar.

The open headphone design allows you to enjoy your music while staying aware of your environment. Kindly note that heavy background noise may affect your listening experience. Additionally, using Ear (open) whilst driving or riding may violate local laws or community regulations. Please ensure you are compliant during wear.
