

# Delock Ferrit Core / Ferrit Ring for round cable 13 mm 2 pieces black

## Description

The ferrite core by Delock can be used to reduce or suppress electromagnetic interference (EMI) that can occur along round cables. The main task of the ferrite core is to absorb and dissipate the high-frequency interference that can occur along the cable. In this way, interference can be reduced. This is particularly important in applications where high signal quality is required, e.g. in data transmission or electronic measurements.

2 x

**Item no. 80948**

EAN: 4043619809486

Country of origin: China

Package: Zip poly bag

## Multifunctional application

The ferrite core can be used in industrial applications as well as in home and office environments where interference reduction is required.

## Technical details

- For cable diameter up to 13 mm
- Material: plastic / nickel-zinc
- Colour: black
- Dimensions closed (LxWxH): ca. 36.0 x 23.5 x 22.2 mm

## Package content

- 2 x ferrite core
