Germany

enthus

“The way to becoming a service provider has become much shorter.”

– **Christian Uhl,**
CEO of enthus

Evolution into an IT service provider

Digital transformation is what the customers of the IT service provider enthus love so much about the company. And it hasn't forgotten to include itself in this. The migration to cloud native infrastructure, flexible payment models and one-size-fits-all operations management brought added value—for both the customers and enthus itself—which is driving the company's own evolution into an IT service provider.

Objectives

- Set the agenda for future business.
- Drive forward the evolution into an IT service provider.
- Become the #1 trusted partner for the German mid-sized sector.

Requirements

- Consolidation of the existing IT infrastructure.
- Simplifying maintenance efforts.
- Reliable and secure IT systems.

Solution

- HPE GreenLake Flex Solutions plus CloudSigma module
- HPE GreenLake for Compute Ops Management
- HPE Apollo 4510 System
- HPE ProLiant DL360 Server
- HPE ProLiant DL325 Server
- HPE Aruba Networking switches
- HPE GreenLake for Disaster Recovery—Zerto

Outcomes

- Futureproof cloud-to-edge platform implemented.
- 75% of IT maintenance time saved.
- Evolution into an IT service provider driven forward.
