

HPE Aruba Networking SSE QuickSpecs

Enable seamless and secure access for every user, device, and application, from anywhere with HPE Aruba Networking SSE

HPE Aruba Networking SSE is a connectivity-as-a-service platform that elegantly integrates ZTNA, SWG, CASB and DEM into a single, easy-to-use interface. Our solution helps protect organizations of all shapes and sizes worldwide and enables safe, compliant productivity. Consider how HPE Aruba Networking can assist you in your pursuit of a comprehensive SSE platform to best protect your corporate assets.

The SSE (Security Service Edge) is a relatively new term that encompasses security solutions that have been around for quite some time. The core concept of SSE is to deliver security services closer to users and applications, regardless of their location. The cloud-based architecture eliminates the need for multiple security appliances deployed at various locations, simplifying network management and reducing operational costs. Gone are the days of constant patching, downtime, and hardware renewal cycles.

Overview

HPE Aruba Networking aims to accelerate the transition to the modern workplace, through secure connectivity with its Security Service Edge (SSE) platform. HPE Aruba Networking SSE is a platform that uses more than 500 edge locations to elegantly connect users, devices, and servers to the business resources needed for work. The platform artfully integrates Zero Trust Network Access (ZTNA), Secure Web Gateway (SWG), Cloud Access Security Broker (CASB), and Digital Experience Monitoring (DEM) into one, cloud-delivered platform that feels weightless and is controlled by a single pane of glass.

Figure 1. HPE Aruba Networking SSE Architecture

HPE Aruba Networking SSE

The SSE unified approach to security provides a comprehensive suite of capabilities that address the evolving threat landscape:

- **Zero Trust Network Access (ZTNA):** Enforces strong authentication and authorization policies, preventing unauthorized access to sensitive data and resources. ZTNA eliminates reliance on traditional perimeter-based security, replacing it with identity-based access that verifies users and devices before granting access to specific applications and data. This approach enhances security by granting access only when necessary and for specific tasks.
- **Secure Web Gateway (SWG):** malware infections. SWGs filter and inspect web traffic, ensuring only legitimate and trusted websites are accessible to users, shielding them from phishing attacks, malware downloads, and other online threats.
- **Cloud Access Security Broker (CASB):** Controls access to cloud applications, ensuring that users access authorized and secure environments only. CASBs enforce granular access policies, granting or denying access based on user identity, device posture, and application risk. This helps organizations mitigate data breaches and compliance violations associated with unauthorized cloud access.
- **Digital Experience Monitoring (DEM):** Measures and analyzes user experience across all applications, devices, and networks, providing insights into performance issues and identifying potential security threats. DEM tools gather data on network traffic, user behavior, and application performance, enabling organizations to pinpoint

Overview

performance bottlenecks, diagnose network disruptions, and detect anomalous activity that could indicate security breaches or malware infections.

SSE has emerged as a compelling solution to address the challenges of hybrid IT security, particularly for organizations with distributed workforces and a growing reliance on cloud-based applications. By consolidating security services into a unified cloud-based architecture, SSE simplifies security management, reduces operational costs, and enhances overall security posture. As organizations continue to embrace hybrid and cloud architectures, SSE is expected to play an even more crucial role in protecting their data, applications, and users from evolving cyber threats. By adopting SSE solutions, organizations can effectively safeguard their digital assets and maintain resilience in the face of evolving security challenges.

To outpace competition, IT has been asked to invest in services designed to ensure the productivity of the workforce and its supply chain. This has created an opportunity for IT to define the new technologies that will connect their users to key business resources like Microsoft 365, Salesforce, and SAP®. Ninety percent of IT leaders have plans to adopt SaaS and hybrid cloud services that extend connectivity out to their workforce. In this modern workplace, every user, application, and their device are connected to the internet.

Unlike the traditional network, the internet cannot be controlled by IT. Because of this, the network solutions that worked for the past 30 years are not only obsolete, but they place users on the network and expose infrastructure to the internet. A new approach is needed in order to securely and seamlessly control access over the internet.

Standard Features

Super Smart

SSE Turns Intelligence Into Action

Auto-sync with the environment with a cybersecurity mesh of IDP and endpoint services to auto-tune policies, and fluently adapt access rights. SSE proves to be smarter, cooler, and even reacts faster to user experience issues.

Super Secure

SSE Makes Security Omnipresent

- Inspect traffic to elevate visibility and prevent ransomware.
 - Protect against data leakage.
 - Detect and respond faster to protect against threats
-

Super Simple

SSE Helps Minimize Complexity

Manage users and applications from a unified console from one pane of glass. Its cloud design lightens the management burden for IT and is equipped with an elegant policy-tagging system for simplicity.

Ease of use is paramount when selecting an SSE platform. Platforms built from the ground up for simplicity feature intuitive interfaces and administrator-friendly configuration tools, streamlining both deployment and management. This leads to reduced training time for IT and security teams as well as fewer configuration errors.

In contrast, SSE platforms that are cobbled together from multiple disparate products often pose a significantly steeper learning curve for IT and security teams, demanding higher technical proficiency for configuration which can often lead to human error and overall, a poor security design. Simplicity leads to lower management costs and an improved security design.

Organizations should carefully assess the complexity of each SSE platform to ensure optimal user experience and efficient management practices.

Architecture

The architectural foundation of the SSE platform plays a crucial role in determining its ability to adapt to changing security requirements and scale with the organization's growth. Cloud-based SSE platforms, with their inherent scalability and elasticity, offer organizations unparalleled flexibility and cost-efficiency. These platforms can provision and decommission resources on-demand, ensuring optimal performance and always-available security to meet the organization's needs.

The architectural approach of SSE platforms significantly influences their performance, scalability, redundancy, resilience, and ease of management. Physical data center-based SSE platforms are constrained by the need for dedicated hardware, limiting their flexibility to accommodate evolving requirements or expand capacity when needed. They also often encounter redundancy and resilience challenges in the event of hardware failures.

Standard Features

In contrast, cloud-based SSE platforms fully harness the power of cloud infrastructure, providing elasticity and flexibility. These platforms tap into hyperscale's robust backbones to enhance performance and minimize latency for users, optimizing the overall user experience. Cloud architecture allows for edge and points of presence (PoPs) locations to be easily scaled out without requiring new hardware or new data center contracts. With cloud-based SSE platforms, scalability becomes the provider's responsibility and not the customers. The best SSE solutions are cloud-agnostic and built on top of multiple cloud vendors, and the best-practicing SSE platforms have built-in redundancy measures to ensure zero outages or downtime.

The selection of an SSE platform is not merely an IT decision; it is a strategic one that has profound implications for an organization's security posture, overall resilience, and ability to thrive in the digital era. Organizations should meticulously evaluate the architectural design of their prospective providers' SSE platforms to ensure resilience, redundancy, flexibility, and a favorable user experience.

User Experience

A seamless and responsive user experience is crucial for any security platform, including SSE. A good SSE platform should provide users with a simple and easy-to-use portal, minimal latency and uninterrupted access to applications and data, regardless of location or device. Simple interfaces minimize training time and ensure easy adoption for all users. Fewer logins and streamlined workflows boost user productivity and satisfaction, and simplified authentication minimizes human error and potential security vulnerabilities by reducing login requirements.

In contrast, SSE platforms that necessitate users to navigate multiple, different user interfaces and repeatedly log in or authenticate hinder productivity, increase response times, and compromise overall security.

Organizations should choose a platform that prioritizes user experience and minimizes unnecessary friction. This will lead to a positive user experience, foster happier and more productive employees, streamline workflows, and reduce troubleshooting—saving time and resources.

Capabilities

A comprehensive SSE platform should seamlessly integrate the core SSE features of SWG for web protection, CASB for cloud access control, ZTNA for secure application access, and DEM for user experience monitoring into a single unified platform to safeguard organizational data, applications, and users. This unified approach eliminates the need for multiple disparate platforms, providing a centralized management interface for enhanced security posture and reduced operational complexity.

In contrast, fragmented SSE solutions from multiple vendors require individual, piecemeal products to replicate the same level of functionality, leading to inefficiency, potential security gaps, and management challenges. Juggling multiple platforms creates unnecessary complexity and overhead. Disparate solutions often lead to vulnerabilities between functionalities. Managing multiple vendors and interfaces increases the difficulty.

Organizations should prioritize unified platforms that consolidate these core functions, streamlining operations, strengthening security posture, and minimizing the risk of threats and breaches.

Standard Features

Integrations

Seamless integration with existing security infrastructure is critical for unified threat detection and incident response. SSE platforms should integrate with SIEM (Security Information and Event Management) and SOAR (Security Orchestration Automation and Response) systems to enable organizations to effectively respond to security threats across their entire security stack. Tight integration with SIEM and SOAR systems enables comprehensive threat visibility and swift incident response throughout your organization's attack surface. Additionally, integration with Identity and Access Management (IAM) solutions is a must, as these are typically already deployed in most enterprises. The user, app, and device access policies should seamlessly tie into these installed IAM systems.

In contrast, SSE platforms that lack tight integration with existing infrastructure make it challenging to manage security threats effectively. Disparate systems hinder visibility and slow down incident response. Lack of data correlation limits your ability to understand and address complex threats. Security gaps between tools create vulnerabilities for attackers to exploit.

Visibility

Granular insights into user behavior, network patterns, and traffic flow are essential for effective security operations. SSE platforms should provide deep visibility to identify anomalies, detect potential threats early, and take immediate action to protect networks and data. Proactive threat hunting and mitigation becomes possible with comprehensive visibility into network activities, and you gain a detailed understanding of data movement within your network for better control and optimization. This means you can quickly identify and isolate potential threats before they can cause damage.

In contrast, SSE platforms that provide limited insights or require separate platforms for this functionality hinder visibility and make it difficult to identify and address security risks. Lack of insight can leave your network vulnerable to undetected attacks, and the inability to identify threats early puts your organization at risk.

Standard Features

HPE Aruba Networking SSE Capabilities

ZTNA HPE Aruba Networking ZTNA is a highly advanced service within the industry. It uses identity, policy, and context to broker secure, one-to-one connections to private apps (even VoIP, AS/400, and Internet Control Message Protocol [ICMP]). It fully replaces VPN and avoids the need for network access or exposure.	SWG HPE Aruba Networking SWG uses advanced SSL inspection, URL filtering, and DNS filtering to help ensure that authorized users get fast, secure access to the internet—while protecting the business from internet-based threats that aim to harm it.	CASB HPE Aruba Networking CASB mediates the connections between users and cloud applications and helps discover Shadow IT to apps. CASB helps ensure sensitive business data in motion remains protected while helping prevent cyber threats.	DEM HPE Aruba Networking DEM helps ensure user productivity by measuring hop-by-hop metrics and monitoring app, device, and network performance. IT can easily pinpoint connectivity issues and reduce mean time to innocence.
Single Pane of Glass With the unified SSE dashboard, IT can manage access to private apps, internet, SaaS apps, and DEM from one console. Easily define policies, track user activity, manage tenants, and oversee a cybersecurity mesh of SSE, IDP, and endpoint security.	Inspection of All Traffic View user activity, files downloaded, commands used, and block malicious actions by inspecting all private and public traffic with HPE Aruba Networking ZTNA and SWG.	Application Discovery Shine light on unsanctioned applications and domains, easily define policies for each, and reduce the organization's overall attack surface.	Automated Alerts and Data Classification HPE Aruba Networking SSE uses AI to generate alerts, automatically detects potential security events, and improves the classification of data.
Agent and Agentless The SSE agent forwards traffic to the HPE Aruba Networking SSE platform, performs device posture assessment, and integrates with existing endpoint solutions. The agent supports iOS, Android™, Mac, and Windows. HPE Aruba Networking SSE also has robust agentless capabilities, allowing secure access to web-based apps—even browser-based RDP, SSH, Git, and database.	Server-to-Server Access HPE Aruba Networking SSE helps ensure servers safely communicate with other servers, applying Zero Trust to non-user entities.	Data Leakage Prevention Protect sensitive data from leaking out to the internet by sitting in-line and enforcing policies that block file downloads, copy and paste, and help meet compliance standards. Support agentless and agent-based deployments.	Detection and Response Prevent malware-based attacks before they even begin with advanced malware scanning and detection. Increased insights allow teams to respond to security events faster than ever.

HPE Aruba Networking SSE Sandbox Package Select CSP 1-999 Users Per User Annual Subscription SaaS	S5L81AAS
HPE Aruba Networking SSE Sandbox Package Select CSP 1K-9999 Users Per User Annual Subscription SaaS	S5L82AAS
HPE Aruba Networking SSE Sandbox Package Select CSP 10K+ Users Per User Annual Subscription SaaS	S5L83AAS
HPE Aruba Networking SSE Sandbox Package Premier CSP 1-999 Users Per User Annual Subscription SaaS	S5L84AAS
HPE Aruba Networking SSE Sandbox Package Premier CSP 1K-9999 Users Per User Annual Subscription SaaS	S5L85AAS
HPE Aruba Networking SSE Sandbox Package Premier CSP 10K+ Users Per User Annual Subscription SaaS	S5L86AAS
HPE Aruba Networking SSE Cloud Managed Connector Premier CSP Quarterly Subscription SaaS	S5M06AAS
HPE Aruba Networking SSE Cloud Managed Connector Basic CSP Quarterly Subscription SaaS	S5M07AAS
HPE Aruba Networking SSE Cloud Managed Connector Select CSP Quarterly Subscription SaaS	S5M08AAS
HPE Aruba Networking SSE Foundation Plus Select CSP 1-999 Users Per User Quarterly Subscription SaaS	S5M09AAS
HPE Aruba Networking SSE Foundation Plus Select CSP 1K-9999 Users Per User Quarterly Subscription SaaS	S5M10AAS
HPE Aruba Networking SSE Foundation Plus Select CSP 10K+ Users Per User Quarterly Subscription SaaS	S5M11AAS
HPE Aruba Networking SSE Foundation Select CSP 1-999 Users Per User Quarterly Subscription SaaS	S5M12AAS
HPE Aruba Networking SSE Foundation Select CSP 1K-9999 Users Per User Quarterly Subscription SaaS	S5M13AAS
HPE Aruba Networking SSE Foundation Select CSP 10K+ Users Per User Quarterly Subscription SaaS	S5M14AAS
HPE Aruba Networking SSE Advanced Plus Basic CSP 10K+ Users Per User Quarterly Subscription SaaS	S5M15AAS
HPE Aruba Networking SSE Advanced Basic CSP 1-999 Users Per User Quarterly Subscription SaaS	S5M16AAS
HPE Aruba Networking SSE Advanced Basic CSP 1K-9999 Users Per User Quarterly Subscription SaaS	S5M17AAS
HPE Aruba Networking SSE Advanced Basic CSP 10K+ Users Per User Quarterly Subscription SaaS	S5M18AAS
HPE Aruba Networking SSE Foundation Plus Premier CSP 1-999 Users Per User Quarterly Subscription SaaS	S5M19AAS
HPE Aruba Networking SSE Advanced Plus Select CSP 1-999 Users Per User Quarterly Subscription SaaS	S5M20AAS
HPE Aruba Networking SSE Advanced Plus Select CSP 1K-9999 Users Per User Quarterly Subscription SaaS	S5M21AAS
HPE Aruba Networking SSE Advanced Plus Select CSP 10K+ Users Per User Quarterly Subscription SaaS	S5M22AAS

Configuration Information

HPE Aruba Networking SSE Advanced Plus Premier CSP 1-999 Users Per User Quarterly Subscription SaaS	S5M23AAS
HPE Aruba Networking SSE Advanced Plus Premier CSP 1K-9999 Users Per User Qr Subscription SaaS	S5M24AAS
HPE Aruba Networking SSE Advanced Plus Premier CSP 10K+ Users Per User Quarterly Subscription SaaS	S5M25AAS
HPE Aruba Networking SSE Advanced Premier CSP 1-999 Users Per User Quarterly Subscription SaaS	S5M26AAS
HPE Aruba Networking SSE Advanced Premier CSP 1K-9999 Users Per User Quarterly Subscription SaaS	S5M27AAS
HPE Aruba Networking SSE Advanced Premier CSP 10K+ Users Per User Quarterly Subscription SaaS	S5M28AAS
HPE Aruba Networking SSE Foundation SWG Basic CSP 1-999 Users Per User Quarterly Subscription SaaS	S5M29AAS
HPE Aruba Networking SSE Foundation SWG Basic CSP 1K-9999 Users Per User Quarterly Subscription SaaS	S5M30AAS
HPE Aruba Networking SSE Foundation SWG Basic CSP 10K+ Users Per User Quarterly Subscription SaaS	S5M31AAS
HPE Aruba Networking SSE Foundation SWG Select CSP 10K+ Users Per User Quarterly Subscription SaaS	S5M32AAS
HPE Aruba Networking SASE SWG Bandwidth Select CSP 10Mbps Quarterly Subscription SaaS	S5M33AAS
HPE Aruba Networking SASE SWG Bandwidth Premier CSP 10Mbps Quarterly Subscription SaaS	S5M34AAS
HPE Aruba Networking SSE Sandbox Package Basic CSP 1-999 Users Per User Quarterly Subscription SaaS	S5M35AAS
HPE Aruba Networking SSE Sandbox Package Basic CSP 1K-9999 Users Per User Qr Subscription SaaS	S5M36AAS
HPE Aruba Networking SSE Sandbox Package Basic CSP 10K+ Users Per User Quarterly Subscription SaaS	S5M37AAS
HPE Aruba Networking SSE Sandbox Package Select CSP 1-999 Users Per User Quarterly Subscription SaaS	S5M38AAS
HPE Aruba Networking SSE Sandbox Package Select CSP 1K-9999 Users Per User Qr Subscription SaaS	S5M39AAS
HPE Aruba Networking SSE Sandbox Package Select CSP 10K+ Users Per User Quarterly Subscription SaaS	S5M40AAS
HPE Aruba Networking SSE Sandbox Package Premier CSP 1-999 Users Per User Qr Subscription SaaS	S5M41AAS
HPE Aruba Networking SSE Sandbox Package Premier CSP 1K-9999 Users Per User Qr Subscription SaaS	S5M42AAS
HPE Aruba Networking SSE Sandbox Package Premier CSP 10K+ Users Per User Quarterly Subscription SaaS	S5M43AAS
HPE Aruba Networking SSE Advanced Select CSP 1-999 Users Per User Quarterly Subscription SaaS	S5M44AAS
HPE Aruba Networking SSE Advanced Select CSP 1K-9999 Users Per User Quarterly Subscription SaaS	S5M45AAS

Configuration Information

HPE Aruba Networking SSE Advanced Select CSP 10K+ Users Per User Quarterly Subscription SaaS	S5M46AAS
HPE Aruba Networking SSE Foundation Plus Basic CSP 1-999 Users Per User Quarterly Subscription SaaS	S5M47AAS
HPE Aruba Networking SSE Foundation Plus Basic CSP 1K-9999 Users Per User Qr Subscription SaaS	S5M48AAS
HPE Aruba Networking SSE Foundation Plus Basic CSP 10K+ Users Per User Quarterly Subscription SaaS	S5M49AAS

HPE Aruba Networking SSE Advanced Plus Select CSP 10K+ Users Per User 3yr Monthly Subscription SaaS	S5P92AAS
HPE Aruba Networking SSE Advanced Select CSP 10K+ Users Per User 5-year Monthly Subscription SaaS	S5P93AAS
HPE Aruba Networking SSE Advanced Plus Basic CSP 1-999 Users Per User 5yr Monthly Subscription SaaS	S5P94AAS
HPE Aruba Networking SSE Advanced Plus Basic CSP 1K-9999 Users Per User 5y Monthly Subscription SaaS	S5P95AAS
HPE Aruba Networking SSE Advanced Plus Basic CSP 10K+ Users Per User 5yr Monthly Subscription SaaS	S5P96AAS
HPE Aruba Networking SSE Advanced Plus Premier CSP 1-999 Users Per User 5y Monthly Subscription SaaS	S5P97AAS
HPE Aruba Networking SSE Advanced Plus Premier CSP 1K-9999 Users Per User 5y Mth Subscription SaaS	S5P98AAS
HPE Aruba Networking SSE Advanced Plus Premier CSP 10K+ Users Per User 5yr Monthly Subscription SaaS	S5P99AAS
HPE Aruba Networking SSE Advanced Plus Select CSP 1-999 Users Per User 5yr Monthly Subscription SaaS	S5Q00AAS
HPE Aruba Networking SSE Advanced Plus Select CSP 1K-9999 Users Per User 5y Mth Subscription SaaS	S5Q01AAS
HPE Aruba Networking SSE Advanced Plus Select CSP 10K+ Users Per User 5yr Monthly Subscription SaaS	S5Q02AAS
HPE Aruba Networking SASE SWG Bandwidth Select CSP 10Mbps 5-year Monthly Subscription SaaS	S5Q03AAS

Configuration Information

HPE Aruba Networking SASE SWG Bandwidth Premier CSP 10Mbps 5-year Monthly Subscription SaaS	S5Q04AAS
HPE Aruba Networking SSE Cloud Managed Connector Select CSP 1-year Monthly Subscription SaaS	S5Q05AAS
HPE Aruba Networking SSE Sandbox Package Basic CSP 1-999 Users Per User 1y Monthly Subscription SaaS	S5Q06AAS

Technical Specifications

HPE Aruba Networking SSE Packaging					
Package / Bundle	Foundation ZTNA	Foundation SWG	Foundation +	Advanced	Advanced +
Multi-cloud architecture Access to +500 global edge locations across the most reliable cloud providers – AWS, Azure, GCP	X	X	X	X	X
Admin portal Centralized access management for admins through a unified UI to enforce zero trust policies across all business resources. (Admin RBAC controls available)	X	X	X	X	X
User portal Secure, single access point for users to easily access all their authorized applications in one place	X	X	X	X	X
SSE policy tags Smart tagging allows admins to set up granular zero trust policies with just a handful of rules, versus hundreds	X	X	X	X	X
SSE agent Lightweight endpoint agent compatible with laptops, phones, and tablets devices and operating systems, including Windows, Mac, Linux, Android, and iOS	X	X	X	X	X
SSE connectors Lightweight VM that front-ends apps to provide a secure, outbound-only, zero trust connection from authorized app to the SSE cloud. (Up to 1,000 connectors)	X	X	X	X	X
Universal SSL inspection Enforce SSL Inspection at scale across all forms of traffic – private, SaaS, internet	X	X	X	X	X
Analytics and reporting Real-time analytics of all traffic and user behavior within the SSE dashboard. Gain insights from high-level SSE dashboards down to granular individual session logs	X	X	X	X	X

Technical Specifications

Branch connectivity Secure branch connectivity for Internet and Internal traffic with IPSec support and easy integration with SD-WAN services	X	X	X	X	X
Smart routing Optimize user connectivity through automatic routing across the fastest access path via 500+ edge locations	X	X	X	X	X
Partner integrations Integrate with additional services within your Cybersecurity Mesh, such as SIEM, Identity, MDM, Endpoint, and various APIs	X	X	X	X	X
Built-in identity Leverage our native HPE Aruba Networking IdP service within SSE – Great for third-party access	X	X	X	X	X
Multiple IDP support Effortless integration with one or more IdP providers of your choice and enable SAML/SCIM support	X	X	X	X	X
Device posture Understand the security posture of end-point devices and enforce security based on their changing context	X	X	X	X	X
Log streaming Easy integrate SSE with the SIEM provider of your choice and get even more out of your data with SYS Log and API integrations	X	X	X	X	X
Custom block pages and user alerts Help users understand why access is denied with customized block pages and posture block notifications via the agent and minimize IT Tickets in the process	X	X	X	X	X

Technical Specifications

HPE Aruba Networking ZTNA					
Package / Bundle	Foundation ZTNA	Foundation SWG	Foundation +	Advanced	Advanced +
All ports and protocols Secure access to all private applications with support of all ports and protocols	X		X	X	X
Robust agentless access Delivers agentless access to private apps for employees, third-parties and BYOD users with a simple web browser. Supported agentless apps: MS SQL, GIT, SSH, RDP, VNC, Web apps	X		X	X	X
Server-initiated flow Enable the support of legacy thick-client apps like VOIP and AS/400 with Server-Initiated Flow.	X		X	X	X
Multi-regional app support Apps in multiple regions are supported across multiple connector zones allowing the best access path to be selected based on latency	X		X	X	X
DLP for private apps Enable session control and visibility for private applications. Apply DLP policies to scan traffic for malware, run sandbox, and control upload/download actions.	X		X	X	X
Simplified domain setup Deploying apps with ZTNA is easy with both CNAME and DNS Rewrite. Rewrites eliminates the need for DNS changes allowing for faster application rollout.	X		X	X	X
Private edge Deploy your own software-based SSE Private edge and bring access even closer to your users and devices at the network's edge (Unlimited number of private edges)	X		X	X	X

Technical Specifications

HPE Aruba Networking SWG					
Package / Bundle	Foundation ZTNA	Foundation SWG	Foundation +	Advanced	Advanced +
DNS/URL filtering Proactively block access to malicious sites and content and protect your network integrity and user data		X	X	X	X
Threat intelligence protection Use smart algorithms and real-time data to block risky URLs and domains based on their content, domain details, and reputation		X	X	X	X
Data loss prevention (DLP) Prevent data leakage with use of Data Security Profiles, Regex Pattern Matching, and action enforcement for more control, and less risk		X	X	X	X
Malware and anti-virus scanning Protect against known viruses and malware through repeatable hash and AV scanning – Database signatures		X	X	X	X
Cloud firewall FWaaS filters network traffic in the SSE cloud and supports all ports and protocols and allows/denies access				X	X

HPE Aruba Networking CASB					
Package / Bundle	Foundation ZTNA	Foundation SWG	Foundation +	Advanced	Advanced +
In-Line CASB Track and control activity for over 10,000 SaaS applications with no limit on SSL inspection				X	X
Compliance and regulations Predefined Dictionaries and Custom Dictionaries help meet compliance standards (i.e., HIPAA, PCI-DSS, GDPR, NIST)				X	X

Technical Specifications

Advanced DLP Adding to DLP functionality, advanced DLP includes Optical Character Recognition (OCR)		X
---	--	---

HPE Aruba Networking DEM					
Package / Bundle	Foundation ZTNA	Foundation SWG	Foundation +	Advanced	Advanced +
Network experience dashboard Gain visibility into the hop-to-hop path between users and business apps and quickly identify and pinpoint the cause of latency issues	X		X	X	X
User experience dashboard Swiftly pinpoints latency issues from an individual viewpoint, offering detailed insights into each user's interaction and their devices	X		X	X	X

HPE Aruba Networking SSE Add-ons					
Package / Bundle	Foundation ZTNA	Foundation SWG	Foundation +	Advanced	Advanced +
Sandbox Test files with real-time sandbox scanning, offering both Fast and Deep Scanning options, while ensuring 99% of files are analyzed in under a minute with no downtime		Add-on Purchase	Add-on Purchase	Add-on Purchase	X
Managed connectors The Managed Connectors service deploys dedicated connectors for organizations, providing them with a Static IP for streamlined access	Add-on Purchase	Add-on Purchase	Add-on Purchase	Add-on Purchase	Add-on Purchase

Technical Specifications

Site-based subscription

SWG bandwidth

Gain SWG protection from an HQ, branch, or remote location with dedicated tunnels eliminating the need to install an agent for internet traffic. SWG bandwidth includes all Foundation SWG features and is based on bandwidth consumption rather than user licenses. Can be purchased individually or alongside an SSE bundle.
