Overview

HPE Aruba Networking CX 8325 Switch Series

The HPE Aruba Networking CX 8325 Switch Series offers a flexible and innovative approach to addressing the application, security, and scalability demands of the mobile, cloud and IoT era. These switches serve the needs of the next generation core and aggregation layer, as well as emerging data center requirements at the Top of Rack (ToR) and End of Row (EoR). They provide up to 6.4 Tbps of bidirectional switching capacity, with line-rate Gigabit Ethernet interfaces including 1Gbps, 10Gbps, 25Gbps, 40Gbps, and 100Gbps.

The HPE Aruba Networking CX 8325 Switch Series includes industry-leading line rate ports 1/10/25GbE (SFP/SFP+/SFP28) and 40/100GbE (QSFP+/QSFP28) with connectivity in a compact 1U form factor. These switches offer a fantastic investment for customers wanting to migrate from older 1GbE/10GbE to faster 25GbE, or 10GbE/40GbE to 100GbE ports.

HPE Aruba Networking CX 8325H Switch Series

HPE Aruba Networking CX 8325H switches are designed to provide high-performance, high density 1/10/25/40/100G connectivity with fixed redundancy on power and cooling in a half-width, single RU form factor, while meeting the requirements of a wide array of compute and storage lossy and lossless networking use cases. These half-width switches help organizations balance density, high availability, and affordability which helps to save space and costs on server, storage and HCI connectivity.

HPE Aruba Networking CX 8325H are also ideal for smaller, edge or colocation data centers that require limited port density and/or have limited rack space. The CX 8325H can be used in small campus and branch locations where space is at a premium (e.g., retail locations, healthcare facilities, media, financial and enterprise branches) and don't always have IT racks, but often have storage closets being used to store servers and IT equipment).

HPE Aruba Networking CX 8325H leverages the same high-performance ASIC and fully featured operating System that the full-width CX 8325 provides. This AOS-CX operating system provides a modern, database driven OS that automates and simplifies critical and complex network tasks and includes an advanced Layer 2/3 feature set includes BGP, OSPF, VRF-Lite, IPv6, dynamic VXLAN and intelligent monitoring, visibility, and remediation with our network analytics engine.

The switch can be manged with HPE Aruba Networking Central, our cloud-based network management solution or on-premises management via HPE Aruba Networking Fabric Composer, NetConductor or CLI based management.

HPE Aruba Networking CX 8325P Switch Series

The HPE Aruba Networking CX 8325P, a part of the HPE Aruba Networking CX 8325 family, delivers key solutions for providers in their 5G (Radio Access Network) and edge computing deployments. Greater flexibility is built to ensure a range of deployment models by allowing 1G(1 superscript), 10G, 25G, 40G and 100G computing deployments, while ensuring greater interoperability with key HPE Telco solutions. - **MSDP Mesh Groups**
  MSDP used for Anycast RP is an intradomain feature that provides redundancy and load-sharing capabilities.
  When MSDP mesh groups are used, SA messages are not flooded to other mesh group peers. When MSDP peer in group receives SA message from another MSDP peer in the group, it assumes that this SA message was sent to all the other MSDP peers in the group. It also eliminates RPF checks on arriving SA messages. With MSDP mesh group configured, SA messages are always accepted from mesh group peer.
- **PIM-Dense Mode**
  Floods multicast traffic to every corner of the network (push-model). Method is for delivering data to receivers without receivers requesting the data. Can be efficient in certain deployments in which there are active receivers on every subnet in the network. Branches without downstream receivers are pruned from the forwarding trees.
- **FastLeave (FL) and Forced-FastLeave (FFL)**
  IGMP FL and FFL for IGMP/MLD speed up the process of blocking unnecessary Multicast traffic to a switch port that is connected to end nodes. They help to eliminate the CPU overhead of having to generate an IGMP/MLD Group-Specific Query message.
- **Support for Microsoft Network Load Balancer (NLB) for server applications**
- **IGMP/MLD Snooping**
  Prevent flooding of multicast traffic to non-listening ports.
- **Protocol Independent Multicast (PIM)**

HPE Aruba Networking Data Center Networking Solution for HPE

New HPE Aruba Networking Data Center Networking Solution SKUs for HPE

Hewlett Packard Enterprise and HPE Aruba Networking offer customers highly differentiated pre-engineered IT infrastructure solutions that span a wide variety HPE compute, storage, networking that span virtualization, vSAN, HCI, HPC, MCS, Microsoft, SAP HANA, VMware, Nutanix application and IaaS service offerings. HPE Aruba Networking 10/25 and 40/100G CX switches can be deployed as part of these solutions and is often designed into these integrated solutions along with HPE ProLiant DL/DX servers, SimpliVity, Nimble, Synergy, Cray Shasta, Cray ClusterStor, Superdome Flex and HPE GreenLake. These ready-to-deploy, integrated IT data center solutions help simplify and speed IT service delivery while reducing the time, risk, and expertise needed to deploy complex solutions.

To ensure that these Hewlett Packard Enterprise and HPE Aruba Networking integrated solutions receive simplified ordering and the highest-level of customer service and support, HPE Aruba Networking has created a special tracking HPE Aruba Networking Data Center networking SKUs for HPE deployments that identifies these integrated solutions to ensure they receive rapid support triage and streamlines escalation through HPE Services. Please use these new tracking SKUs when HPE Aruba Networking CX switches are included in HPE integrated and mixed compute, storage and networking configuration and deployments, refer to this page for HPE Aruba Networking Switches qualification with Storage solutions:

Notes: Current HPE Aruba Networking "J#" SKUs should still be used for all data center network centric (HPE Aruba Networking "only", Non HPE environments). Please contact your sales representative for additional information and ordering guidance.
