

MASTERFRAME 600

MasterFrame 600 is crafted with high-quality aluminum, featuring a standard chassis design with flexible space configuration to deliver exceptional performance and personalized options. It easily accommodates the latest-generation GPUs, while its optimized thermal layout ensures efficient airflow for stable cooling performance. Whether for gamers or content creators, MasterFrame series meets the dual demands for performance and style, making it the perfect choice for both functionality and customization.

FEATURES

EXO-STRUCTURE

The exposed structural design enables the MasterFrame chassis to achieve greater adaptability and offers flexible configuration options for various use cases.

ADAPTABLE FRAME

Feature a dynamic design that offers unparalleled flexibility, allowing users to effortlessly adjust sizes to meet various needs.

DYNAMIC FRAME

Supports modular configurations, allowing flexible hardware adaptability and providing the best upgrade potential for customization and system expansion.

VERSATILE AND MAKER-DRIVEN

Acts as a platform for expression and evolution, with interchangeable panels that provide endless customization possibilities, going beyond basic functionality.

OPTIMIZED THERMAL LAYOUT

Provides an efficient airflow design to ensure stable cooling performance.

SUPPORT FOR LATEST-GEN GPUS

Accommodates the latest graphics cards, ensuring future-proof compatibility.

EXTREME COOLING SUPPORT

Accommodates triple 360mm radiators and custom water-cooling solutions, delivering exceptional thermal performance for extreme overclocking and high-performance hardware.
