IMPORTANT READ BEFORE USING

CERTIFICATION MODEL:
CAAB0017

PACKAGE CONTENTS

- Afterglow™ Wave Wired Controller
- 10ft / 3m USB-C Cable
- Quick-Start Guide

SETUP

1. Initial Setup

Plug the USB-C end of the cable into the top of the controller, and the USB side into your console or PC. Press the Xbox button, and once the Xbox button starts to illuminate, the controller is connected and ready to use.

2. Mute Microphone

Press the function button, located above the audio jack, twice to mute your microphone.

3. Control Volume

While holding down the function button, press D-Pad +Up/-Down to adjust game volume.

4. Game/Chat Balance

While holding down the function button, press D-Pad Left/Right to adjust game/chat balance.

5. Program Back Buttons

- A. While holding down the function button, press the back button you would like to map a function to, and the function button LED will start flashing.
- B. Press any button you would like mapped, and the function button LED will flash 3 times indicating a successfully mapped function.
- C. To clear a mapped function or disable the back buttons completely, hold down the function button and double press any back button.

6. Hair Triggers Mode

Hair trigger feature is a highly sought-after feature that allows faster trigger pulls and adds advantages to your gaming experience. Afterglow Wave controller uses Hall switch true digital hair triggers for a rapid and precise trigger response.

To enable hair trigger mode:

Toggle the slider buttons on the back of the controller **outward** to set the trigger buttons to **hair-trigger mode**.

Toggle the slider buttons on the back of the controller to the **middle** to set the trigger buttons to **mid-distance**.

Toggle the slider buttons on the back of the controller **inward** to set the trigger buttons back to **full-distance mode**.

*REAL hair triggers: digital Hall effect hair triggers

7. Changing the Lighting Effects

A. To cycle through the lighting effects, hold down the function button and press either the L or R buttons.

B. Lighting Effects:

- Static: The RGB lights will remain solid and set to a chosen color.
- Wave: Displays a rainbow of RGB lights in a continuous motion.
- Breathing: The RGB lights slowly fade in and out on a set color.
- Rumble: The in-game rumble will activate a set color for the RGB lights.

*Go to the Control Hub APP to download and use more lighting effects

8. Adjust Lighting

A. Hold down the function button and use the left analog stick to change the LED color.

B. Once you find the color you'd like, save the setting by releasing the function button.

C. For white, hold down the function button and click in the left stick.

D. To adjust the brightness, hold down the function button and press the left trigger.

*Go to the Control Hub APP for advanced settings for the lighting effects

9. Changing the Settings for the RGB Zones

The Afterglow Wave Wired Controller comes with 8 different RGB Zones that can be customized individually or multiple at once on the Control Hub app.

10. Control Hub

To customize your controller further, download the free Control Hub App from the Windows Store on your PC or Xbox. You can use it to edit the RGB lighting profiles and RGB zones, as well as re-map buttons, run diagnostics, recalibrate analog sticks and triggers, and much more.

FUNCTIONS

- Intelligent RGB lighting system with customizable effects, colors & brightness across eight individual zones
- Control Hub companion app for advanced lighting customization, button mapping, controller configuration & more
- Dual rumble motors & impulse triggers for immersive gameplay
