### Hotkey Commands

Hotkey commands are keystroke sequences that initiate computer/device functions and can be used to initiate KVM Switch functions. A hotkey command sequence must be initiated by the Hotkey Leading Code, followed by 1-2 additional keystrokes. Successful hotkey command inputs result in a high-pitch beep. Unsuccessful hotkey command inputs result in a low-pitched beep.

#### Notes:

- All keystroke combinations must be entered in rapid succession.
- Press and release the indicated keys, unless otherwise specified.

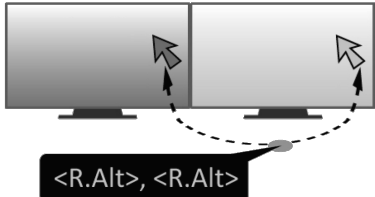

### Hotkey Leading Code

-  + 

Hotkey Command	Function	
 +  + 	<ul style="list-style-type: none"> <li>Select PC 1</li> <li>This hotkey sequence switches both monitors, mouse, keyboard, and the audio device.</li> </ul>	
 +  + 	<ul style="list-style-type: none"> <li>Select PC 2</li> <li>This hotkey sequence switches both monitors, mouse, keyboard, and the audio device.</li> </ul>	

### Dual View

Dual view is the ability to view one screen from each connected computer, and switch the keyboard, mouse, and audio device between the currently selected displays using hotkeys.

Hotkey Command	Function	
 +  <i>*Must use right side Alt key</i>	<ul style="list-style-type: none"> <li>Switch mouse and keyboard between computers when in Dual View modes</li> </ul>	
 +  + 	<ul style="list-style-type: none"> <li>Puts the KVM displays into 1A + 2A</li> </ul>	
 +  + 	<ul style="list-style-type: none"> <li>Puts the KVM displays into 2A + 1A</li> </ul>	
 +  + 	<ul style="list-style-type: none"> <li>Puts the KVM displays into 1A + 2B</li> </ul>	
 +  + 	<ul style="list-style-type: none"> <li>Puts the KVM displays into 2A + 1B</li> </ul>
