

# EasyIP Dock

## HYBRID CONFERENCING

At the center of your room's conferencing system, the EasyIP Dock connects cameras, microphones, and content sources into a unified AV workflow. EasyIP cameras and Dante audio devices integrate over the network, delivering high-quality video and crystal-clear audio. Connect a computer or BYOD via USB 3.0 for conferencing on any UC platform including Microsoft Teams and Zoom. The built-in Acoustic Echo Cancellation (AEC) ensures echo-free audio for remote participants, while the HDMI input enables content sharing to in-room displays or projectors.

## CONTENT DISTRIBUTION

EasyIP Multicast allows content sharing to multiple EasyIP endpoints without the need for additional extenders or distribution amplifiers, reducing installation costs and complexity. This simplified approach is ideal for partitioned rooms, digital signage, and large-scale deployments.

## SIMPLIFIED AUDIO DISTRIBUTION

The EasyIP Dock features a 15x13 cross-point audio matrix including an 8x8 Dante audio matrix, enabling flexible networked audio and advanced audio configuration for any application. Pair the EasyIP Dock with EasyIP CeilingMIC D microphones or other Dante-enabled devices to optimize audio pickup across any space without complicated routing.

## A COMPACT A/V SWITCHER FOR CONFERENCING AND CONTENT SHARING

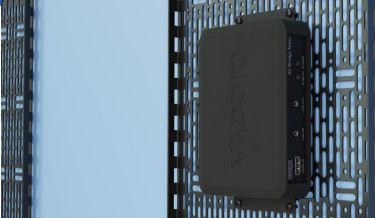

The EasyIP Dock integrates cameras, audio, and video into a unified AV workflow while extending HDMI content across the network for flexible conferencing and presentation spaces.

Vaddio's EasyIP Dock simplifies setups in meeting rooms, classrooms, lecture halls, training centers, or any space that requires both video conferencing and sharing content for local presentations.

# EasyIP Dock:

An essential endpoint for HDMI and USB integration challenges

999-60600-000 EasyIP Tx/Rx sold separately

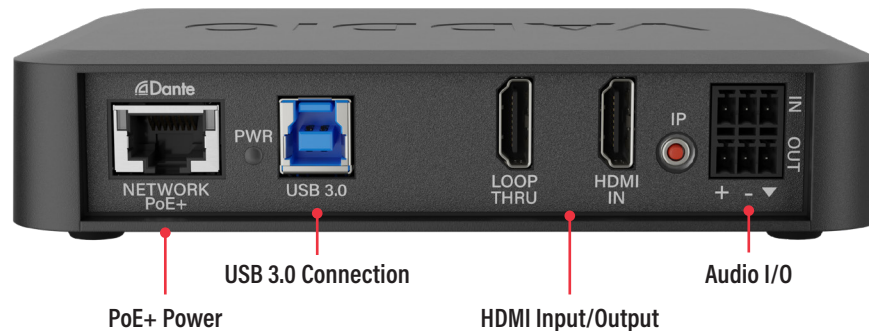

## INCLUDED MOUNTING BRACKETS

Low-profile brackets enable wall or under-desk mounting and are compatible with Lever Lock™ panels for a clean, professional installation.

## EASYIP MULTICAST

EasyIP Multicast allows content sharing with any number of EasyIP endpoints or destinations like EasyIP Tx/Rx.

## BACK PANEL OF DOCK

**Network and PoE+** for simplified installation with minimal cabling requirements

**USB 3.0 Connection for Video/Audio:** Delivers high-quality video and audio for platforms like Microsoft Teams, Zoom, Panopto, and Kaltura. Backwards compatible with USB 2.0, supporting up to 1080p resolution.

**HDMI Input/Loop-Through:** Loop video content to in-room displays while distributing to EasyIP endpoints across the network for multi-room applications like overflow spaces or lecture halls.

**Audio I/O:** line level balanced audio input and output for connecting to in-room audio devices.

**Dante Audio:** 8x8 Dante audio matrix with 8 channels and 4 flows
