

Current release

EasyIP Dock 106.1.0

July 2026

New Features

- Added SpeakerVIEW support. This allows the EasyIP Mixer to use up to two ceiling mic arrays for audio tracking and automatic video switching.
- Added support for SpeakerVIEW Controller. Using SpeakerVIEW Controller you can increase the number of mic arrays to 8.
- Added 'camera scene' CLISH commands.
- Fix an issue where custom UI CCU Scenes template didn't correctly toggle Show Auto CCU Scene button visibility.
- Added device name and low bandwidth information to CLISH streaming get command.

Improvements

- Fixed bugs that caused Dante audio stability issues.
- Changed factory default NTP settings to better support remote management.
- Fixed an issue that caused focus controls not to work.
- Moved focus related UVC controls to the "CCU" category instead of the "PTZ" category.
- Fixed a bug that caused passwords with a colon in them to not work properly:
- Fixed a bug that caused some settings to not persist across updates.
- Fixed a bug that caused the device to lock up when migrating audio configs.
- Fixed various CLISH command errors.
- Improved HDMI stability with certain sources.
- Changed factory default color space setting.
- Various infrastructure improvements
