Introduction

Introduction

The Content of This Document

This guide explains the procedures from the installation to daily management of Epson Print Admin Serverless. For the standard function of the printer, see the manual for your printer.

Using this Guide

Marks and Symbols

Caution:

Instructions that must be followed carefully to avoid bodily injury.

Important:

Instructions that must be observed to avoid damage to your equipment.

Provides complementary and reference information.

Related Information

→ Links to related sections.

Screenshots Used in This Guide

- ☐ Screenshots of the printer driver are from Windows 10 or macOS High Sierra. The content displayed on the screens varies depending on the model and situation.
- ☐ Setting items may vary depending on products and setting conditions.

Operating System References

Windows

In this manual, terms such as "Windows 11", "Windows 10", "Windows 8.1", "Windows 8", "Windows 7", "Windows Server 2022", "Windows Server 2019", "Windows Server 2016", "Windows Server 2012 R2", "Windows Server 2012", "Windows Server 2008 R2", and "Windows Server 2008" refer to the following operating systems. Additionally, "Windows" is used to refer to all versions.

		Microsoft [®]	Windows [®]	11 (operating	system
--	--	------------------------	----------------------	------	-----------	--------

☐ Microsoft® Windows® 10 operating system

Introduction

Microsoft®	Windows® 8.1 operating system
Microsoft®	Windows® 8 operating system
Microsoft®	Windows® 7 operating system
Microsoft®	Windows Server® 2022 operating system
Microsoft®	Windows Server® 2019 operating system
Microsoft®	Windows Server® 2016 operating system
Microsoft®	Windows Server® 2012 R2 operating system
Microsoft®	Windows Server® 2012 operating system
Microsoft®	Windows Server® 2008 R2 operating system
Microsoft®	Windows Server® 2008 operating system

Mac OS

In this manual, "Mac OS" is used to refer to Mac OS X 10.9.5 or later as well as macOS 11 or later.

Terms

Epson Print Admin Serverless

The system provided by Epson that can authenticate the users who use printers with only the printer itself.

License Key

The key to activate Epson Print Admin Serverless.

User ID

The unique ID of authenticated users for Epson Print Admin Serverless.

ID Number

The 4 to 8 digit number that is associated with the user ID.

User information

The general term for user authentication-related information such as user ID, password, ID number, and email address.

Authentication device

The device to authenticate users by entering information, such as IC card reader.

Administrator

The person in charge of installing and setting the device or the network at an office or organization. For small organizations, this person may be in charge of both device and network administration. For large organizations, administrators have authority over the network or devices on the group unit of a department or division, and network administrators are in charge of the communication settings for beyond the organization, such as the Internet.

Introduction

Microsoft Entra ID

A cloud-based ID and access management service provided by Microsoft.

Microsoft 365

A cloud-based subscription service provided by Microsoft.

LDAP server

The server that provides a directory service that can communicate with LDAP. This includes Windows server Active Directory, etc.

Print job

The print data sent to the printer from client computers.

Unicode (UTF-8)

An international standard code, covering the major global languages. When "UTF-8" is described in this guide, it indicates coding characters in UTF-8 format.

ASCII (American Standard Code for Information Interchange)

One of the standard character codes. 128 characters are defined, including such characters as the alphabet (a-z, A-Z), Arabic numbers (0-9), symbols, blank characters, and control characters. When "ASCII" is described in this guide, it indicates the 0x20 - 0x7E (hex number) listed below, and does not involve control characters.

	00	01	02	03	04	05	06	07	08	09	0A	ОВ	0C	0D	0E	0F
20	SP*	!	"	#	\$	%	&	1	()	*	+	,	-		/
30	0	1	2	3	4	5	6	7	8	9	:	;	<	=	>	?
40	@	Α	В	С	D	Е	F	G	Н	I	J	K	L	М	Ν	0
50	Р	Q	R	S	Т	U	٧	W	Х	Υ	Z	[\]	<	ı
60	`	a	b	С	d	e	f	g	h	i	j	k	İ	m	n	0
70	р	q	r	S	t	u	٧	w	х	у	z	{		}	?	

Space character.

Overview for the Authentication Method

When using Epson Print Admin Serverless, the authentication function can be used only with the printer on the network.

Device Authentication (Local DB)

This is the authentication method that checks the user information registered to the printer and the user who uses the printing or scanning function. Because user information is associated with the job history, administrators can learn the usage status for each user.

User information can be registered for up to 1,000 users, including users who are entered directly, imported by a CSV file, and imported from the LDAP server.

You need to register the user information to the printer in advance.

LDAP Server Authentication

This is the authentication method that checks the user information of the LDAP server synchronized with the printer. Because the user information is temporarily stored to the printer as a cache for up to 1,000 users, it is available to authenticate using the cache even when the LDAP server goes down.

You need to set up the LDAP server in advance.

Device Authentication and LDAP Server Authentication (Local DB and LDAP)

This is the authentication method that checks the user information registered both in the printer and in the LDAP server synchronized with the printer. When checking for user information, the first search is performed on user information registered to the printer, and then it searches the LDAP server if the relevant information is not found. User information can be registered for up to 1,000 users. The vacant portion is used as a cache for the LDAP server, and the user information of the LDAP server is registered to the printer temporarily. If the LDAP server goes down, this cache can be used to authenticate users.

You need to register the user information to the printer and set up the LDAP server in advance.

System Requirements

System Requirements

Printer	
Web Browser for Web Config	
☐ Microsoft Edge	
☐ Google Chrome (latest edition)	
☐ Mozilla Firefox (latest edition)	
☐ Safari (latest edition)	
Client Computer	
Operation System	
☐ Windows Windows 7, Windows 8/8.1, Windows 10, Windows 11 or later	
Windows Server 2008 or later	
☐ Mac OS Mac OS X 10.9.5 or later, macOS 11 or later	
Printer Driver	
☐ Windows: Standard driver	
☐ Mac OS: Standard driver	

Setting Overview

You can choose the setup method depending on the number of printers you install or your network environment.

- ☐ You need an administrator password to set up. See "Notes on the Administrator Password" in the printer's User's Guide before setting up.
- □ When setting up Epson Print Admin Serverless, you may need to register personal information on the printer, such as user account information and user password, as well as security settings. See the printer's User's Guide for details on how the printer handles personal information and security settings.

Using Software for Setting

Explain the software to set up.

Web Config

Web Config is a built-in web page of the printer for configuring the printer's settings. Since it operates by directly accessing the printer through the network, it is suitable for setup one by one.

☐ Supported operating systems

Web Config supports the following operating systems.

■ Windows

Windows 7, Windows 8/8.1, Windows 10, Windows 11 or later

Windows Server 2008 or later

☐ Mac OS

Mac OS X 10.10 or later, macOS 11 or later

☐ Supported web browsers

See the following for the supported web browsers for Web Config.

"System Requirements" on page 8

Accessing Web Config

Enter the printer's IP address into a web browser. When accessing Web Config via HTTPS, a warning message will appear in the browser since a self-signed certificate, stored in the printer, is used but there is no problem.

☐ Accessing via HTTPS

IPv4: https://<printer IP address> (without the < >)

IPv6: https://[printer IP address]/ (with the [])

☐ Accessing via HTTP

IPv4: http://<printer IP address> (without the < >)

IPv6: http://[printer IP address]/ (with the [])

Examples

☐ IPv4:

https://192.0.2.111/

http://192.0.2.111/

☐ IPv6:

https://[2001:db8::1000:1]/ http://[2001:db8::1000:1]/

Note:

If the printer name is registered with the DNS server, you can use the printer name instead of the printer's IP address.

Logging in to Web Config

Log in as an administrator to set up.

- 1. Enter the printer's IP address into a browser to run Web Config.
- 2. Click **Log in**.
- 3. Enter the user name and administrator password in **User Name** and **Current password**.
- 4. Click OK.

Epson Device Admin

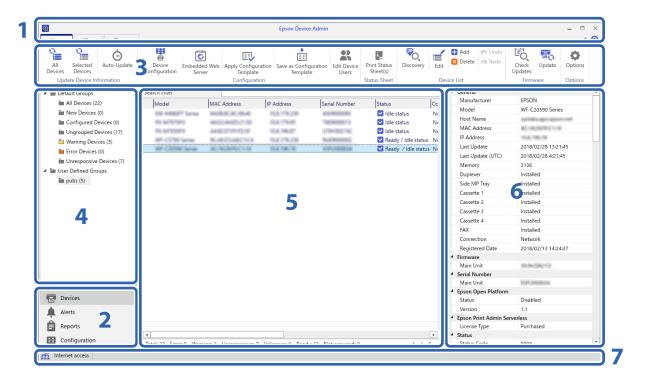

Epson Device Admin is multifunctional application software that manages the device on the network.

The following functions are available, so it is useful when you install and manage the multiple printers.

- ☐ Apply the unified settings to multiple printers over the segment .
- ☐ Make a detailed report, such as for the job history or usage history.

You can download Epson Device Admin from Epson support website. For information on the supported operating systems for Epson Device Admin, see the Epson support website.

For more information, see the documentation or help of Epson Device Admin.

The Epson Device Admin top screen is composed of the following panes.

The display changes depending on the item selected from the side bar task menu on the top screen.

No.	Pane	Explanation
1	Title bar	Click the 😯 to open the Help to view explanations of each item in Epson Device Admin.
2	Side bar task menu	Changes the feature being used. The screen switches depending on the item selected.
3	Ribbon menu	Displays the menu for the feature selected on the side bar task menu.
4	Side bar content	Displays the hierarchy for the feature selected on the side bar task menu.
5	Display view	Displays information and setting content depending on the feature selected in the side bar task menu or the side bar content.
6	Detailed device information	Displays details on the device selected from the Device List when you select Devices on the side bar task menu.
7	Status bar	Displays status information on the Device List when you select Devices on the side bar task menu.

Registering the printer's administrator password in Epson Device Admin

Before setting up the printer by using Epson Device Admin, you need to register the printer's administrator password in Epson Device Admin.

Note:

If you change the printer's administrator password, make sure you update the password registered in Epson Device Admin.

1. Start Epson Device Admin.

- 2. Select **Devices** on the side bar task menu.
- 3. Select **Options** > **Password manager**.
- 4. Select Enable automatic password management and then click Password manager.
- 5. Select the target printer, and then click **Edit**.
- 6. Set the password, and then click **OK**.

Required Settings for the Authentication Method

Depending on the authentication method you use, the required settings differ. Set up the printer by referring below.

Settings	Local DB	LDAP	Local DB and LDAP
Registering the license key	✓	✓	✓
Connecting and setting the authentication device	√ *1	√*1	√*1
User authentication setting	✓	✓	V
Print job setting	✓	✓	V
Access control setting	✓	✓	✓
Available function setting using without an authentication	√*²	√*2	√*2
LDAP server setting	-	✓	V
Registration for user information	✓	-	✓
Mail server setting	√*3*4	√*3*4	√*3*4
Scan to My Folder setting	√*5	√ *5	√* ⁵
Pull Printing	√*6	√*6	√*6
Page count management setting	√*7	-	√*7

- *1 : When Card or User ID and Password or Card or ID Number is selected as the authentication method.
- *2 : When you use the standalone function without authentication.
- *3 : When you use the notification email function.
- *4 : When you use the **Scan to My Email** function.
- '5 : When you use the **Scan to My Folder** function.
- *6 : When you use the **Pull Printing** function.
- *7 : When you use the **Manage page count** function.

Flow to Set Up Printers Individually

Explains the procedure to set up Epson Print Admin Serverless on an individual printer. When you use Web Config, you can set up the printer only by using a web browser.

V

Important:

Before starting the setup, check that the time setting for the printer is correct.

If the time setting is incorrect, the error message "License is expired" is displayed, which may lead to failure to set up Epson Print Admin Serverless. Also, in order to use a security function such as SSL/ TLS communication or IPsec, the correct time must be set. You can set the time as follows.

- ☐ Web Config: **Device Management** tab > **Date and Time** > **Date and Time**.
- ☐ Printer's control panel: Settings > General Settings > Basic Settings > Date/Time Settings

Proce	edure	Operations	Details
1	Connecting the authentication device*1	Connecting the authentication device to the printer and checking the operation	Connect the authentication device to the printer.
2	Date/Time setting	Setting the date and time	Set the correct date and time in the printer.
3	Registering the license key*2	Entering the license key	Activate Epson Print Admin Serverless to the printer by using Web Config.
4 Setting Epson Print Admin Serverless		Setting for authenticated printing	Set authentication method and how to authenticate user.
		Setting the print job	Set up for saving or deleting the print job.
		Registering the user information	Register the user information.
			Set the following depending on the authentication method.
			Set the LDAP server synchronizing setting.
			☐ Import from the files.
		Setting for arbitrary function	Set arbitrary function settings as necessary, such as authentication device settings, mail server settings, and scan to my folder function settings depending on the authentication method and how to authenticate the user you selected.
5	Setting the client computer	Installing the printer driver, setting the user ID to the printer driver	On the printer driver that is installed on the client computer, set the user ID to authenticate the users.

^{*1 :} Set when you use an authentication device to authenticate users.

Related Information

Flow to Set Up Printers in Bulk

Explains the procedure to set up Epson Print Admin Serverless on multiple printers. When you use the configuration template for Epson Device Admin, you can set up the printers efficiently.

Important:

Before starting the setup, check that the time setting for the printer is correct.

If the time setting is incorrect, the collected time of the log or report will also be incorrect, so it will be difficult to trace unauthorized use or information leaks. Also, in order to use a security function such as SSL/TLS communication or IPsec, the correct time must be set. You can set the time as follows.

- ☐ Web Config: **Device Management** tab > **Date and Time** > **Date and Time**.
- ☐ Printer's control panel: Settings > General Settings > Basic Settings > Date/Time Settings

Proce	edure	Operations	Details	
1	Connecting the authentication device*1	Connecting the authentication device to the printer and checking the operation	Connect the authentication device to the printer.	
2	Date/Time setting	Setting the date and time	Set the correct date and time in the printer.	
3	Registering the license	Creating the configuration template	Activate Epson Print Admin Serverless to	
	key ^{*2}	Importing the license key	the multiple printers by using configuration template.	
		Applying the configuration template		
4	Setting Epson Print Admin Serverless	Editing or creating the configuration template	Edit or create the configuration template.	
		Setting for authenticated printing	Set authentication method and how to authenticate user.	
		Setting the print job	Set up for saving or deleting the print job.	
		Setting for arbitrary function	Set arbitrary function settings as necessary, such as authentication device settings, mail server settings, and scan to my folder function settings depending on the authentication method and how to authenticate the user you selected.	
		Registering the user information	Register the user information.	
			Set the following depending on the authentication method.	
			Set the LDAP server synchronizing setting.	
			☐ Import from the files or LDAP server.	
		Applying the configuration template	Apply the configuration template to each printer.	

Proce	dure	Operations	Details			
5	Setting the client computer	Installing the printer driver, setting the user ID to the printer driver	On the printer driver that is installed on the client computer, set the user ID to authenticate the users.			

^{*1 :} Set when you use an authentication device to authenticate users.

Related Information

- → "Set the Printer Individually Using Web Config" on page 33
- → "Batch Setting Using Epson Device Admin (Configuration Template)" on page 56

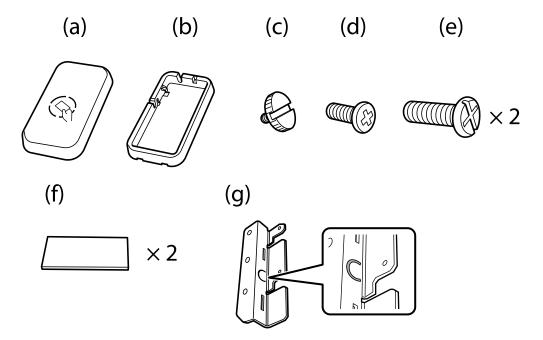

Connect and set up the authentication device to use user authentication. This is not necessary if you do not use an authentication device.

Note:

For an authentication device other than IC card reader, ask your dealer.

Mounting the Authentication Device Table (Optional)

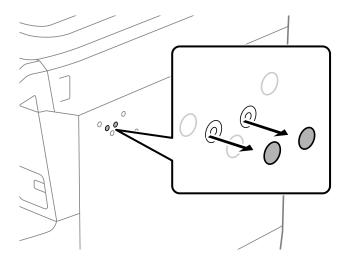

This section explains how to install the optional authentication device table.

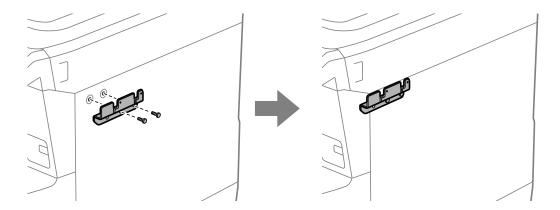

Note:

- ☐ The authentication device can be used when using an authentication system.
- □ Connect an authentication device with the same model number as the authentication device that was used to confirm the authentication card.

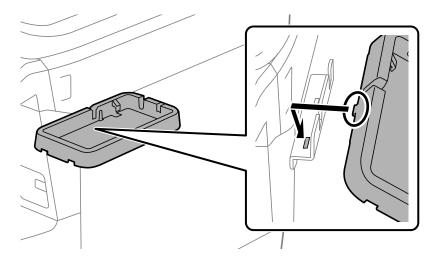

1. Peel off the seal covering the screw holes on the side of the printer.

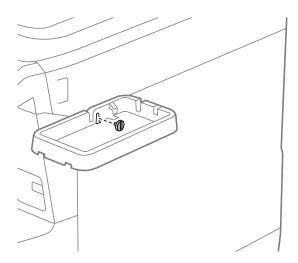

2. Using a Phillips screwdriver, secure the metal plate (g) with the two screws (e).

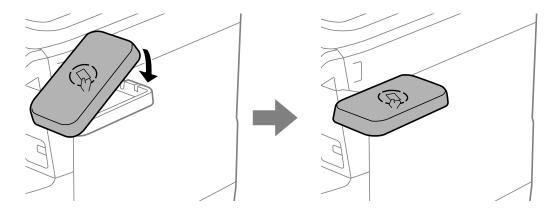

3. Place the bottom part (b) of the authentication device stand on to the metal plate (g).

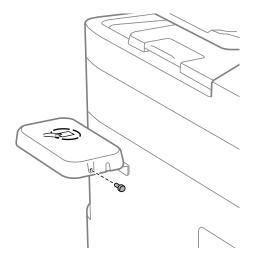

4. Secure the bottom part (b) of the authentication device stand with the screws (c). Turn the screw (c) by hand.

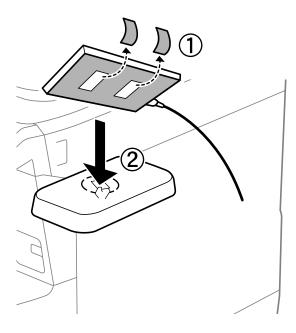

5. Place the upper part (a) on to the authentication device stand as shown in the illustration.

6. Use a Phillips screwdriver to secure the authentication device stand with the screws (d).

7. Fix the authentication device to the top of the stand with the two pieces of double-sided tape (f) supplied.

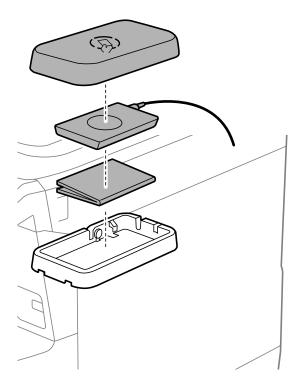

Do not lean on the authentication device table or place heavy objects on it.

There is a risk of injury if it falls or breaks.

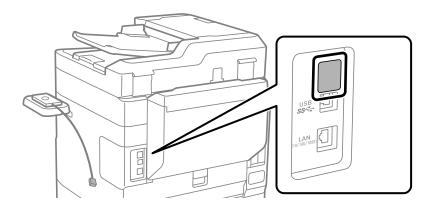

Note:

If you want to leave the authentication device in the stand, place something thick (such as folded paper) under the authentication device to raise the device. However, do not use a metal object or anything that generates electromagnetic waves.

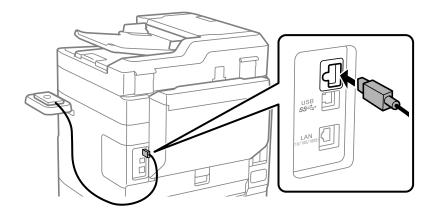

If the authentication device is not raised, authentication cards may not be read due to the usage environment or the authentication device's specifications, such as the communication distance specifications.

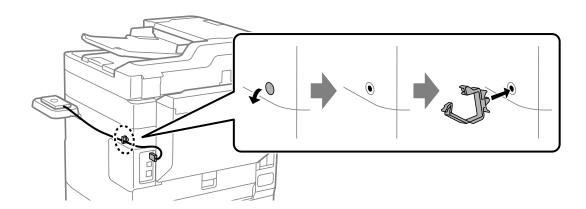

8. Peel off the seal from the printer's service port.

9. Connect the cable for the authentication device to the service port.

10. Remove the seal, attach the clamp, and connect the cable, as shown below.

Operation Check for Authentication device

The following procedures explain how to check the connection status and authentication card recognition for the authentication device.

Printer's control panel		
Information is displayed if you select Settings > Authentication Device Status .		
Web Config		
The status is displayed on the Status tab > Product Status > Card Reader Status .		

Available Reading Method for Authentication Information

You can set the following reading method for the authentication device.

You can set it to the printer using Web Config or Epson Device Admin.

The settings are required in the following cases.

- ☐ Read the particular area of the authentication card, such as employee number and personal ID.
- ☐ Use the authentication card information except for UID (authentication card information such as serial number.)

You can generate the operational parameter by using a tool. Ask your dealer for details.

Authentication Device Setting Items

Item		Explanation
Vendor ID		Set the vendor ID of the authentication device that limits use from 0000 to FFFF by using 4 alphanumeric characters. If you do not want to limit it, set to 0000.
Product ID		Set the product ID of the authentication device that limits use from 0000 to FFFF by using 4 alphanumeric characters. If you do not want to limit it, set to 0000.
Operational par	ameter	Set the operation parameter of the authentication device between 0 and 8192 characters. A~Z, a~z, 0~9, +, /, =, space, and line feed are available.
Epson Print	Card Reader	Select the conversion format for authentication device.
Admin Serverless	Authentication Card ID save format	Select the conversion format for authentication information of an ID card.
	Set card ID range	Enable specification of the reading position.
	Text Start Position	Specify the text start position and the number of characters. You can specify between 1 and 4096.
	Number of Characters	Specify the number of characters of reading ID information. You can specify between 1 and 4096.

Authentication Device, Card ID Save Format Setting Items

Format	Description
Format 1 (Default)	Outputs the binary value as a hexadecimal.
Format 2	Outputs the value obtained by rearranging the Upper Lower byte binary value as a hexadecimal number.
Format 3	Outputs the value obtained by rearranging the Upper Lower bit by bit conversion as a hexadecimal number.
Format 4	Outputs a binary value as a decimal number.
Format 5	Outputs the value obtained by rearranging the Upper Lower byte binary value as a decimal number.
Format 6	Outputs the value obtained by rearranging the Upper Lower bit by bit calculated as a decimal number.
Format 7	Outputs the binary value as a hexadecimal ASCII string.
Format 8	Outputs the value obtained by rearranging the Upper Lower byte of the binary value as a hexadecimal ASCII string.
Format 9	Outputs the value obtained by rearranging the Upper Lower bit by bit calculated as a hexadecimal ASCII string.
Format 10	Outputs the binary value as a decimal ASCII string.
Format 11	Outputs the value obtained by rearranging the Upper Lower byte of the binary value as a decimal ASCII string.
Format 12	Outputs the value obtained by rearranging the Upper Lower bit by bit calculated as a decimal ASCII string.
Format 13	Outputs a binary value as an ASCII string.

About License Key Acquisition

You need a license key to use Epson Print Admin Serverless.

To find out how to acquire the license key or for more details, ask your dealer.

Registration for the License Key

Activate Epson Print Admin Serverless by registering the license key to the printer.

Note

The license key may be registered to the printer by dealer. In this case, skip this step and go to the settings for Epson Print Admin Serverless.

Registering the License Key by Using Web Config

Use Web Config when you want to register the license key to the printer individually.

- 1. Use one of the following methods to connect the printer to the setup computer.
 - lue Connect by wired or wireless LAN
 - If you want to connect using a wired connection or wireless LAN, connect to the network in the same segment as the setup computer.
 - ☐ Connect directly using a LAN cable
- 2. Turn on the printer.
- 3. On a setup computer, open your web browser, and then open the printer's Web Config by entering "https:// <epsondevice-IP>".

When the printer's IP address is "192.168.111.10": https://192.168.111.10

You can check the IP address from the printer's control panel.

See the manual for your printer for details.

Note:

When you access the administrator login page in SSL communication (https), the message "There is a problem with this website's security certificate" may be displayed.

This happens when the browser attempts an SSL encrypted communication when the Web site is using a self-signed certificate. Click "Continue browsing of this site (not recommended)". To avoid displaying this warning, use a certificate issued by a trusted certification authority.

- 4. Select **Epson Open Platform** tab > **Product Key or License Key**.
- 5. Enter the license key to **Product Key or License Key**.
- 6. Click Next.
- 7. Click OK.

After a moment, click Refresh the menu and reload the page for Web Config.

If the license information is displayed, **Epson Print Admin Serverless** is activated.

Registering the License Key by Using Epson Device Admin

When you use a configuration template for Epson Device Admin, you can apply the license keys given in the CSV file to multiple printers.

- 1. Create a new configuration template.
- 2. Read the license key on the configuration template.
- 3. Apply it to the target printers.

Creating the Configuration Template

Create the configuration template newly.

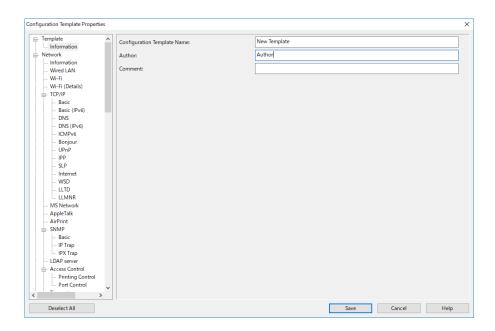

- 1. Start Epson Device Admin.
- 2. Select **Configuration** on the side bar task menu.

3. Select **New** on the ribbon menu.

4. Set each item.

Item	Explanation	
Configuration Template Name	Name of the configuration template. Enter up to 1,024 characters in Unicode (UTF-8).	
Author	Information on the creator of the template. Enter up to 1,024 characters in Unicode (UTF-8).	
Comment	Enter arbitrary information. Enter up to 1,024 characters in Unicode (UTF-8).	

5. Select the items you want to set on the left.

Note

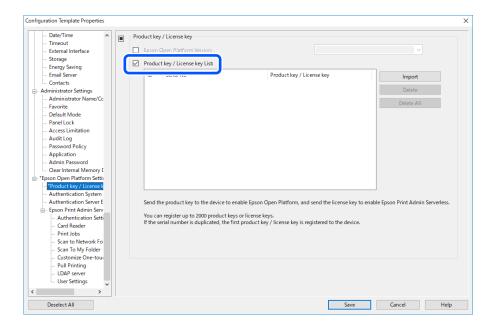

Click the menu items on the left to switch to each screen. The set value is retained if you switch the screen, but not if you cancel the screen. When you have finished all the settings, click **Save**.

Importing the License Key

1. Select **Epson Open Platform Settings** > **Product key** / **License key** from the configuration template.

2. Select the **Product key** / **License key List**.

If the **Epson Open Platform Version** is selected, deselect it.

- 3. Click **Import**.
- 4. Select the CSV file for the license key and click **Open**.

The file is read and the contents are displayed.

Note:

- ☐ When you select the printer on the list and click **Delete**, you can delete the license key from the list.
- □ When you click **Import** again, you can add the other CSV files.
- Click Save.
- 6. Click OK.
- 7. Click **OK** on the completion screen.

Setting values are saved to the configuration template and then the screen is closed.

Note:

To open the configuration template again, select the saved template from the **Configuration Template Name**, and then click **Edit** on the ribbon menu.

Applying the Configuration Template

Apply the saved configuration template to the printer. The items selected on the template are applied. If the target printer does not have an applicable function, it is not applied.

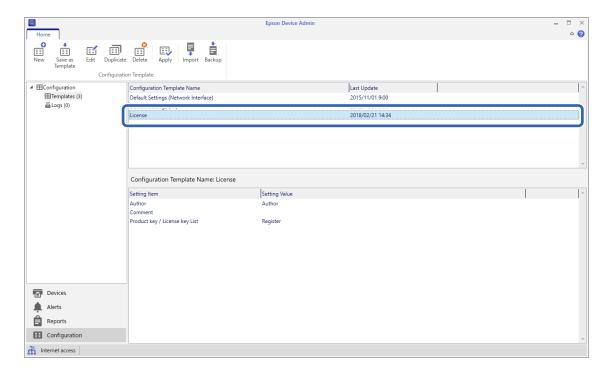

If you have not registered the printer's administrator password in Epson Device Admin, register the password first before performing this operation.

"Registering the printer's administrator password in Epson Device Admin" on page 11

1. Select **Configuration** on the side bar task menu.

2. Select the configuration template you want to apply from **Configuration Template Name**.

3. Click **Apply** on the ribbon menu.

The device selection screen is displayed.

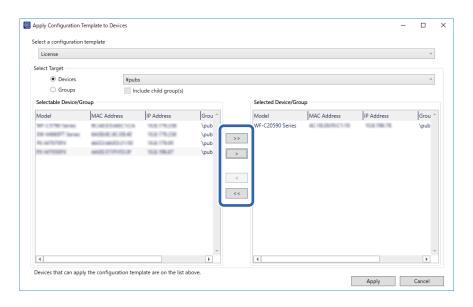

4. Select the target to apply the configuration template.

Note:

- ☐ When you select **Devices** and groups containing devices from the pull-down menu, each device is displayed.
- ☐ Groups are displayed when you select **Groups**. Select **Include child group(s)** to automatically select child groups within the selected group.

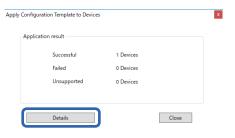

- 5. Move the devices or groups that you want to apply the template to **Selected Device/Group** by using [>], [>>], [<], [<<].
 - Use [>] to move the selected device or group, and use [>>] to move all devices or groups. To make multiple selections, press Ctrl or Shift and click your mouse.

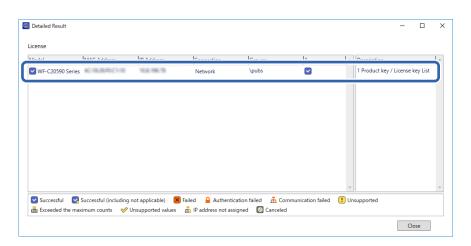

6. Click Apply.

A confirmation screen for the configuration template to be applied is displayed.

- 7. Click **OK**.
- 8. Click **Details** and check the information.

When is displayed on the items you applied, the application was completed successfully.

9. Click Close.

Set the Printer Individually Using Web Config

Explains the procedure when you set up Epson Print Admin Serverless to the printer individually.

Make the necessary settings for Epson Print Admin Serverless depending on the authentication method you use. For details, see the related information.

Related Information

→ "Required Settings for the Authentication Method" on page 12

Using Epson Print Admin Serverless Setting List

When registering the license key, the **Epson Print Admin Serverless Setting List** is displayed on the **Epson Open Platform** tab. Follow this list to make settings for Epson Print Admin Serverless.

- 1. Access Web Config and then select the **Epson Open Platform** tab > **Epson Print Admin Serverless Setting**List.
 - Setting items are displayed according to the authentication settings you selected in the **Epson Open Platform** tab >**Authentication Settings** > **Authentication Method**.
- 2. Click the link for the items you want to set.
- 3. Set each item.
- 4. Click Epson Print Admin Serverless Setting List.

Return to the Epson Print Admin Serverless Setting List.

Making User Authentication Settings (Web Config)

Set the authentication method and how to authenticate user.

- 1. Select Epson Print Admin Serverless Setting List > Epson Print Admin Serverless > Authentication Settings.
 - Or access **Epson Open Platform** tab > **Authentication Settings**.
- 2. Set each item.
- 3. Click OK.

Authentication Setting Items

Item	Explanation
Authentication	Select the authentication method.
Method	Important:
	When using the Pull Printing function, make sure that settings for Epson Print Admin Serverless are the same, such as the authentication method for the linked printer, the user settings, and the maximum time limit for unreleased jobs.
	□ Local DB
	Authenticate using the user information registered to the printer. It is necessary to register the user information to the printer.
	□ LDAP
	Authenticate using the user information of the LDAP server synchronized with the printer. It is necessary to set up the LDAP server.
	□ Local DB and LDAP
	Authenticate using the user information registered to the printer or the LDAP server synchronized with the printer. It is necessary to register the user information to the printer and set up the LDAP server.
How to Authenticate	Select how to authenticate a user.
User	☐ Card or User ID and Password
	Use an ID card to authenticate users. You can also use a user ID and password to authenticate.
	☐ User ID and Password
	Use a user ID and password to authenticate users.
	You cannot use an ID card to authenticate when you select this function.
	☐ User ID
	Use only a user ID to authenticate users. You do not need to set a password.
	☐ Card or ID Number
	Use an ID card to authenticate users. You can also use an ID Number.
	☐ ID Number
	Use only an ID Number to authenticate users.
Allow users to register	Enable it if you allow users to register the authentication card to the system.
authentication cards	If you select LDAP for Authentication Method , you cannot set it.
The Minimum Digit Number of ID Number	Select the minimum number of digits for ID number.
Caching for LDAP authenticated users	When using LDAP server authentication, you can set whether or not to use caching for user information.
Use user information in SMTP authentication	When using a user ID and password for authentication, you can set whether or not to use user information for SMTP authentication. The system uses the last user ID and password that were logged in.

Item	Explanation
Sender's Email Address	Select the sender's email address when using Scan to Email or Scan to My Email. User's email address Use the email address of the user logged in to the printer. If the user's email address is not set, the sender's email address set in the printer is used. Product's email address Use the sender's email address set in the printer.

Important:

Notes when using LDAP server authentication:

When using an additional network interface board, set the network interface used for LDAP server authentication. The LDAP server can only be used with either the standard network interface or the additional network interface.

Settings > General Settings > Network Settings > LDAP Server

Related Information

→ "Overview for the Authentication Method" on page 7

Making Print Job Settings (Web Config)

Make settings related to the print job sent from the client computer.

- Select the Epson Print Admin Serverless Setting List > Epson Print Admin Serverless > Print Jobs. Or access **Epson Open Platform** tab > **Print Jobs**.
- 2. Set each item.
- 3. Click OK.

Related Information

→ "Deleting the Print Jobs" on page 99

Print Jobs Setting Items

Item	Explanation
Maximum time limit for unreleased job (0 to 720 hours)	Set the time period to automatically delete all print jobs. When you set "0", the print jobs will not be deleted automatically.
Retain printed jobs	Permit the users to retain the print jobs.
Set the print jobs to the selected state	Set the selected status of the print jobs when the users log in to the printer.

Item	Explanation
User name in Epson Device Admin log	You can select the name to be recorded in [Print: user name] in the job history report output by Epson Device Admin.
	☐ Login Name:
	Records the user name logged in to Epson Print Admin Serverless.
	☐ Computer Name:
	Records the computer name that sent the print job to Epson Print Admin Serverless.
Direct Print setting for the printer driver	Allows printing without storing print jobs when printing from a computer. When this is selected, the user can print directly without logging in to the printer if the print job's authentication information matches the authentication information for the device or the LDAP server.
	In the printer driver, the user sets whether or not to store print jobs.
Auto release jobs upon device login	Sets whether or not to start printing automatically when a user with LDAP Server Authentication logs in to the printer.

Registration for the User Information (Web Config)

Register the user information that is used to user authentication.

When you select **LDAP** for **Authentication Method**, you do not need to register the users. In that case, **User Settings** is not displayed on the list.

When you select **Local DB and LDAP** for **Authentication Method**, make the LDAP server setting together.

Registering the User Information Individually

Enter the user information one by one.

- Select the Epson Print Admin Serverless Setting List > Epson Print Admin Serverless > User Settings.
 Or access Epson Open Platform tab > User Settings.
- 2. Click **Add**.
- 3. Set each item.
- 4. Click Apply.
- 5. Click Close.

User Information Setting Items

Item	Explanation
User ID	Enter the user ID to use authentication between 1 and 83 bytes in Unicode.
	Since the User ID is not case sensitive, you can login using upper or lower case letters.

Item	Explanation	
User name Display	Enter the user name displayed on the printer's control panel within 32 characters in Unicode. You can leave this blank.	
Password	Enter the password to use authentication within 32 characters in ASCII. The password is case sensitive.	
	Leave this blank if you select User ID for How to Authenticate User .	
Authentication Card ID	Set the reading result of ID card. When you permit the Allow users to register authentication cards for Authentication Settings , the result registered by users is reflected.	
	Enter within 116 characters in ASCII. You can leave this blank.	
ID Number	It is displayed when Card or ID Number or ID Number is selected on Epson Open Platform tab > Authentication Settings > How to Authenticate User.	
	Enter the number between 4 and 8 digits depending on the digits set on Epson Open Platform tab > Authentication Settings > The Minimum Digit Number of ID Number.	
Auto Generate	It is displayed when Card or ID Number or ID Number is selected on Epson Open Platform tab > Authentication Settings > How to Authenticate User.	
	Click to generate the ID number automatically that the digit is same as the The Minimum Digit Number of ID Number you set.	
Department	Enter the department name arbitrary to distinguish the users.	
	You can leave this blank.	
Email Address	Set the email address for the users. This is used as the destination of Scan to My Email.	
	You can leave this blank.	
Restrictions	You can restrict functions for each user. Select the functions you want to allow in Select the check box to enable or disable each function.	
Color Printing Restriction	You can restrict color printing for each user. Select the type of printing you want to allow from the drop-down menu.	
Auto release jobs upon device login	Sets whether or not to start printing automatically when a user logs in to the printer.	
Presets	You can specify which presets can be used by specific users.	

Item	Explanation	
Manage page count	You can set the page count management for each user.	
	This is displayed when you select Enable on the Epson Open Platform tab > Manage page count > Manage page count .	
	□ Disable	
	Does not manage the number of pages for the selected user.	
	□ Individual	
	Manages the number of pages for the selected user according to the Individual settings.	
	The schedule for updating the number of printable pages follows the settings on the Epson Open Platform tab > Manage page count > Update schedule settings .	
	□ Shared	
	Manages the number of pages according to the setting on the Epson Open Platform tab > Manage page count > Manage page count.	

Manage page count

Item		Explanation	
Check number of pages		You can check the number of printable pages for the selected user.	
		This item is displayed when you click Edit on the Epson Open Platform tab > User Settings to open the edit screen for user settings.	
Color	Enable/Disable	Shows whether or not the color printing page count is enabled or disabled.	
	Maximum Pages	Displays the number of pages that can be printed in color.	
Black and White	Enable/Disable	Shows whether or not the monochrome printing page count is enabled or disabled.	
	Maximum Pages	Displays the number of pages that can be printed in monochrome.	
Individual		Make settings to periodically update the number of printable pages for the selected user.	
		This can be set when Individual is selected in Manage page count .	
Color	Enable/Disable	When Enable is selected, the number of pages that can be printed in color is updated periodically along with the number of pages set in Maximum Pages .	
	Maximum Pages	Enter the number of pages that can be printed in color that is updated periodically. The number of pages that can be entered is 0 to 999,999.	
Black and White	Enable/Disable	When Enable is selected, the number of pages that can be printed in monochrome is updated periodically along with the number of pages set in Maximum Pages .	
	Maximum Pages	Enter the number of pages that can be printed in monochrome that is updated periodically. The number of pages that can be entered is 0 to 999,999.	
Number of additional pages		Adds the number of printable pages to the selected user.	
		This can be set when a value other than Disable is selected in Manage page count.	
		This item is displayed when you click Edit on the Epson Open Platform tab > User Settings to open the edit screen for user settings.	

It	Item		Explanation
			When Enable is selected, the number of pages set in Maximum Pages is added to the number of pages that can be printed in color.
		Maximum Pages	Enter the number of pages that can be printed in color. The number of pages that can be entered is -999,999 to 999,999.
			You can reduce the number of pages that can be printed in color by entering a negative number.
	Black and White	Enable/Disable	When Enable is selected, the number of pages set in Maximum Pages is added to the number of pages that can be printed in monochrome.
		Maximum Pages	Enter the number of pages that can be printed in monochrome. The number of pages that can be entered is -999,999 to 999,999.
			You can reduce the number of pages that can be printed in monochrome by entering a negative number.

Configuring Presets for Each User

You can set up to five presets that are only available to the selected user from the presets registered in the printer.

Note

For Epson Device Admin, you can set presets by entering the Preset registration number. However, if the registration number is changed, only the number is used and the contents will not be updated.

- 1. Open the user setting for which you want to setup presets.
- 2. Click **Presets** > **Select**.

A list of presets registered in the printer is displayed.

3. Select the presets you want to register.

Note:

Click **Edit** to go to the printer's Presets registration screen.

4. Click **Select**.

You are returned to the user settings. Check that the selected presets are displayed.

Note:

- ☐ Presets that were registered by an authenticated user are available only for that user.
- ☐ Presets that were not registered by an authenticated user can be used by all users. However, you cannot use functions that have been restricted by the administrator.

Registering the User Information in Bulk by Using CSV File

You can register users in bulk using a CSV file.

- Select the Epson Print Admin Serverless Setting List > Epson Print Admin Serverless > User Settings.
 Or access Epson Open Platform tab > User Settings.
- 2. Click **Import**.
- 3. Click **Browse...** to select the file to import, and then click **Open**.
- Enter the password if you have set a password for the selected file.
 In some regions, the password entry field is not displayed. In this case, go to the next step.
- 5. Click **Import**.
- 6. After checking the displayed information, click **OK**.

Related Information

→ "Creating the CSV File" on page 40

Creating the CSV File

Create the CSV file to import the user information.

You can easily create the CSV file by using the user information registered individually. We recommend registering the user information individually in advance.

- Select the Epson Print Admin Serverless Setting List > Epson Print Admin Serverless > User Settings.
 Or access the Epson Open Platform tab > User Settings.
- 2. Click Export.
- 3. Select the file format for **File Format**.

Select it by referring below.

Item	Explanation	
CSV UTF-16 (Tab delimited)	Select when you edit the file using Microsoft Excel.	
	Each parameter is enclosed by "[]"(brackets). Enter the parameters in "[]".	
	When you update the file, we recommend overwriting the file. If you newly save the file, select Unicode text(*.txt) for the file format.	
CSV UTF-8 (Comma delimited)	Select when you edit the file using a text editor or macro without Microsoft	
CSV UTF-8 (Semicolon delimited)	Excel.	

4. Enter the password you want to set.

In some regions, the password entry field is not displayed. In this case, go to the next step.

- 5. Click **Export**.
- 6. Select the location to save the file, and then click **Save**.

The file is saved.

7. Edit the CSV file you saved in a spreadsheet application such as Microsoft Excel or in a text editor, and then save the information.

Important:

When editing the file, do not change the encoding and header information.

CSV File Setting Items

Item	Settings and Explanation	
UserID	Enter the user ID to use authentication between 1 and 83 bytes in Unicode.	
UserName	Enter the user name displayed on the printer's control panel within 32 characters in Unicode. You can leave this blank.	
Password	Enter the password to use authentication within 32 characters in ASCII. When importing, this is set as the password instead of [EncPassword].	
	Leave this blank if you select User ID for How to Authenticate User .	
	When exporting, this is always blank.	
Authentication CardID	Set the reading result of ID card. When you permit the Allow users to register authentication cards for Authentication Settings , the result registered by users is reflected.	
	Enter within 116 characters in ASCII. You can leave this blank.	
IDNumber	It is displayed when Card or ID Number or ID Number is selected on Epson Open Platform tab > Authentication Settings > How to Authenticate User.	
	Enter the number between 4 and 8 digits depending on the digits set on Epson Open Platform tab > Authentication Settings > The Minimum Digit Number of ID Number .	
	An ID Number cannot be duplicated. If it is duplicated, you will be alerted to the error when importing the file. When left blank, it is automatically assigned a number.	
Department	Enter the department name arbitrary to distinguish the users.	
	Enter within 40 characters in Unicode (UTF-8). You can leave this blank.	
Mail Address	Set the email address for the users. This is used as the destination of Scan to My Email .	
	You can use A-Z, a-z, 0-9, !#'%&'*+/=?^_{{}}~@. Enter 200 characters or less. You cannot use "," (comma) for the first character. You can leave this blank.	
FolderProtocol	Set the type of Scan to My Folder function. Network folder (SMB): 0, FTP: 1	
FolderPath	Set the saving destination for the Scan to My Folder function.	
FolderUserName	Set the user name for the Scan to My Folder function.	
FolderPassword	Set a password to authenticate the destination folder for the Scan to My Folder function within 20 ASCII characters.	
	When importing, this overwrites the password set in [EncFolderPassword]. When exporting, it is always blank.	
FtpPassive	Set the connection mode for the FTP server when FTP is selected as the Type for the Scan to My Folder function. Active mode: 0, Passive mode: 1	

Item	Settings and Explanation	
FtpPort	Set the port number for sending scanned data to the FTP server from 0 to 65535 when FTP is selected as the Type for the Scan to My Folder function.	
Сору	Settings to enable or disable the Copy function. Enable: 1, Disable: 0	
Scan	Settings to enable or disable the Scan function. Enable: 1, Disable: 0	
Fax	Settings to enable or disable the fax function. Enable: 1, Disable: 0	
MemPrint	Settings to enable or disable the print from memory device function. Enable: 1, Disable: 0	
ComPrint	Settings to enable or disable the print from the computer function. Enable: 1, Disable: 0	
ColorPrint	Settings to allow or prohibit color printing. Allowed: 1, Not Allow: 0	
PresetIndex	Set the presets that you want to associate with the user. You can set up to five preset registration numbers separated by commas.	
AutoPrint	Settings to enable or disable automatic printing after logging on. Enable: 1, Disable: 0	
ManagePageCount	Set the page count management method for each user. Shared: 2, Individual: 1, Disable: 0	
	☐ Shared: 2	
	Manages the number of pages according to the setting on the Epson Open Platform tab > Manage page count > Manage page count.	
	☐ Individual: 1	
	Set the page count management for each user.	
	The schedule for updating the number of printable pages follows the settings on the Epson Open Platform tab > Manage page count > Update schedule settings.	
	☐ Disable: 0	
	Does not manage the number of pages for the selected user.	
ManageColorPage	Set whether or not to limit the number of printable pages in color. Limit: 1, No limit: 0	
	This item is enabled when ManagePageCount is set to 1 (Individual).	
ColorPage	Enter the number of pages that can be printed in color that is updated periodically. The number of pages that can be entered is 0 to 999,999.	
	This item is enabled when ManageColorPage is set to 1 (Limit).	
ColorPageRemain	Enter the number of pages that can be printed in color. The number of pages that can be entered is -999,999 to 999,999.	
	You can reduce the number of pages that can be printed in color by entering a negative number.	
	This item is enabled when ManagePageCount is set to 2 (Shared) or 1 (Individual).	
ManageBWPage	Set whether or not to limit the number of printable pages in monochrome. Limit: 1, No limit: 0	
	This item is enabled when ManagePageCount is set to 1 (Individual).	
BWPage	Enter the number of pages that can be printed in monochrome that is updated periodically. The number of pages that can be entered is 0 to 999,999.	
	This item is enabled when ManageBWPage is set to 1 (Limit).	

Item	Settings and Explanation
BWPageRemain	Enter the number of pages that can be printed in monochrome. The number of pages that can be entered is -999,999 to 999,999.
	You can reduce the number of pages that can be printed in monochrome by entering a negative number.
	This item is enabled when ManagePageCount is set to 2 (Shared) or 1 (Individual).
EncPassword	When exporting, the parameter set for [Password] is encrypted using BASE64 and then output.
	When importing and entering a new password in [Password], this is ignored.
	If [Password] is blank, this value is used and the password remains as it was before exporting.
EncFolderPassword	When exporting, the parameter set for [FolderPassword] is encrypted, then the value is encoded by BASE64 and output.
	When importing and entering a new password in [FolderPassword], this is ignored.
	If [FolderPassword] is blank, this value is used and the password remains as it was before exporting.

Checking the LDAP Server Connection

Performs the connection test to the LDAP server by using the parameter set on **LDAP Server** > **Search Settings**.

- Select the Epson Print Admin Serverless Setting List > LDAP Server > Connection Test (Primary Server).
 Or access Network tab > LDAP Server > Connection Test (Primary Server).
- 2. Click **Start**.
 - The result is displayed.
- 3. Click OK.

Making the Search Attribute Setting

Set the search attribute of the user to register to Epson Print Admin Serverless from the LDAP server.

- 1. Select the Epson Print Admin Serverless Setting List > LDAP Server > Search Settings (Epson Print Admin Serverless).
 - Or access Network tab > LDAP Server > Search Settings (Epson Print Admin Serverless).
- 2. Set each item.
- 3. Click OK.

Related Information

→ "Search Setting Items for LDAP Server Authentication" on page 68

Options Functions Setting (Web Config)

Set when you use functions other than authentication printing.

Access Control Settings

Set the functions that are available to the user.

Making Available Function Settings (Web Config)

Set the functions that are available to the registered user when logging in to Epson Print Admin Serverless.

Note

When you use device authentication in Epson Print Admin Serverless, you can also set access restrictions for each user in User Settings for Web Config. See related information for details on the setting items.

- Select the Epson Print Admin Serverless Setting List > Access Control Settings > User Settings.
 Or access Product Security tab > Access Control Settings > User Settings.
- 2. Click **Edit** next to **1**.
- 3. Enable the functions that you want to permit to use in **Select the check box to enable or disable each function.**
- 4. Click **Apply**.

Related Information

Allow printer to be used from drivers and software

Set permissions to allow scanning, sending faxes, printing forms, and so on from the computer.

Note:

You can use fax on printers equipped with the fax function.

Set Access Permission to the Driver (Web Config)

Create an account to use the printer from Epson Scan 2 or PC-FAX.

Note:

You can use PC-FAX on printers equipped with the fax function.

- 1. Select Access Control Settings > User Settings from Epson Print Admin Serverless Setting List.
 - Or access the **Product Security** tab > **Access Control Settings** > **User Settings**.
- 2. Click Add for a line that has not been registered, except for 1.

Note:

1 is reserved for applications such as the authentication system.

3. Enter the **User Name** and **Password**.

Note:

The user name and password set here are used for driver and software authentication.

4. Enable the functions that you want to allow in Select the check box to enable or disable each function.

- 5. Click **Apply**.
- 6. Register the user name and password set in step 3 on the computer using Epson Scan 2 or PC-FAX.

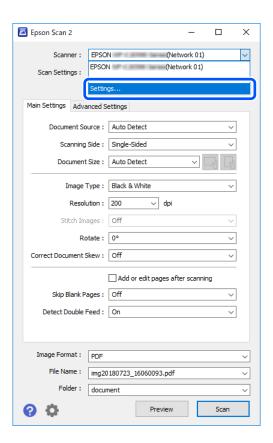

Related Information

- → "Scanning from the Computer" on page 46
- → "Sending and Receiving Faxes Using PC-FAX" on page 47

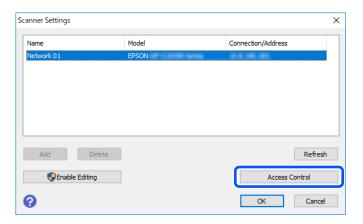

Scanning from the Computer

If you want to scan from the computer, set information for access limitations in Epson Scan 2.

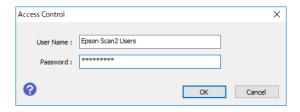

- 1. Run Epson Scan 2.
- 2. Select **Settings** from **Scanner**.

3. Select the scanner, and then click **Access Control**.

4. Set the **User Name** and **Password**, and then click **OK**.

5. Click OK.

Sending and Receiving Faxes Using PC-FAX

Note

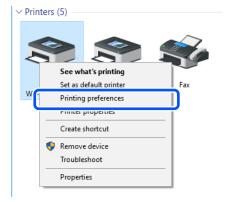

You can use fax and use PC-FAX on printers equipped with the fax function.

1. Install the printer driver again.

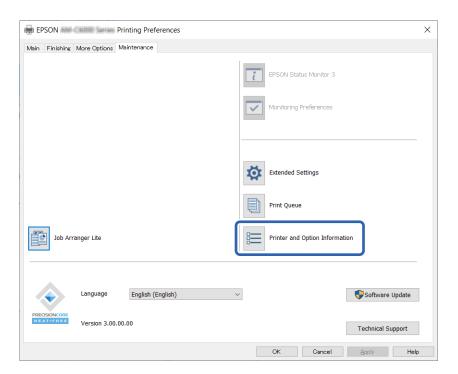

Do not set Epson Print Admin Serverless settings in the re-installed printer driver.

- 2. Select Control Panel > Hardware and Sound > Devices and Printers.
- 3. Right-click the printer queue that was created, and then select **Printing Preferences**.

4. Click the **Maintenance** tab > **Printer and Option Information**.

5. Select **Save Access Control settings**, and then click **Settings**.

6. Set User Name and Password, and then click OK.

7. Click **OK**.

Allow print jobs without authentication information (Web Config)

- Select Access Control Settings > Basic from Epson Print Admin Serverless Setting List.
 Or access the Product Security tab > Access Control Settings > Basic.
- 2. Select Allow printing and scanning without authentication information from a computer.
- 3. Click OK.

Making the Function Settings for Use Without Authentication (Web Config)

When users log out, permit guest users to use the printer's standalone functions (copy, fax, scan, etc.). The icons for the available functions are displayed on the login screen.

Note:

Fax is only displayed on printers equipped with the fax function.

- 1. Select the **Epson Print Admin Serverless Setting List** > **Access Control Settings** > **Basic**.
 - Or access Product Security tab > Access Control Settings > Basic.
- 2. Confirm that the **Enables Access Control** is selected.
- 3. Enable the functions that you want to permit to use without authentication in **Select the check box to allow** using from the printer's control panel when not logged in..
- 4. Click OK.

Related Information

→ "Making the Function Settings for Use Without Authentication (Configuration Template)" on page 77

Making Authentication Device Settings (Web Config)

Set the reading format for authentication information received from an ID card.

- 1. Select the **Epson Print Admin Serverless Setting List > Card Reader**.
 - Or access Device Management tab > Card Reader.
- 2. Set the reading information of the authentication device and ID card.
 - See the related information for the details of each item.
- 3. Click Next.

The setting confirmation screen is displayed.

4. Click OK.

Mail Server Settings (Web Config)

Set when you use the following functions to allow printers to send email.

☐ Scan to My Email

This is the function to send the scanned data to the email address of the user who logged in to the printer. For the mail and scan setting, you can set from **Scan/Copy** > **User Default Settings** > **Scan to Email**.

☐ Email Notification

This is the function to receive alerts by email when events occur, such as your printer running out of paper.

See the manual for details on the settings.

Making Scan to My Folder Settings (Web Config)

Set the Scan to My Folder function by using Epson Print Admin Serverless. You can set the following save destinations using the Scan to My Folder function.

Set Destination	Target	Authentication Method	Destination Path
User folder	Each user	Local DB, Local DB and LDAP	Contacts
User folder	Each user	LDAP, Local DB and LDAP	LDAP attribute
Shared folder*	All users	Local DB, Local DB and LDAP	Device (setting for the Scan to My Folder function)

^{* :} A folder named after the user's ID is automatically created immediately below the specified folder path or URL.

1. Select the Epson Print Admin Serverless Setting List > Epson Print Admin Serverless > Scan to Network Folder/FTP.

Or access Epson Open Platform tab > Epson Print Admin Serverless > Scan to Network Folder/FTP.

- 2. Set each item.
- 3. Click **OK**.

Scan to My Folder Setting Items (Web Config)

Item		Explanation
Save To	Setting Type	☐ Shared
Setting		Automatically creates a folder named after the user's ID below the folder path or URL specified in Save to , and saves the scan results to this folder.
		□ Individual:
		Set the save destination for scan results for each user.
		Device authenticated users can be set in the user settings.
		Users authenticated by LDAP server can set the save location in the LDAP server's search attribute.
	Туре	Select the transmission protocol.
		When the scanning output destination is a network folder, select Network Folder (SMB) .
		For an FTP server, select FTP .
	Save to	When you select Network Folder (SMB) in Type , specify the path of the output destination of the scanned data.
		When you select FTP in Type , specify the URL of the output destination of the scanned data.
		Enter within 160 characters in Unicode (UTF-8).
	Connection Mode	Set when you select FTP in Type .
		Select a connection mode to the FTP server.
	Port Number	Set when you select FTP in Type .
		Enter the port number to send the scanned data to an FTP server between 0 and 655353.
Authenticat ion Settings	Setting Type	This is displayed when Individual is selected as Setting Type in the Save To Setting .
		□ Shared
		The settings configured for User Name and Password are used for authentication regardless of the authentication method.
		□ Individual:
		Device authenticated users can be set individually in the user settings.
		For users authenticated by LDAP server, the settings for User Name and Password are used for authentication.
	User Name	Enter the user name to access the scan output destination folder.
		Enter within 30 characters in Unicode (UTF-8).
	Password	Enter the password to access the scan output destination folder.
		Enter within 20 characters in Unicode (UTF-8).

Prohibit Changing the Destination for Scan to Network Folder/FTP (Web Config)

The default destination for Scan to Network Folder/FTP can be set so that the user cannot change it.

You can set this from Epson Print Admin Serverless > Scan to Network Folder/FTP from Epson Print Admin Serverless Setting List or the Epson Open Platform tab > Epson Print Admin Serverless > Scan to Network Folder/FTP.

Item	Explanation
Prohibit manual entry of destination	When enabled, the user cannot change the default destination.

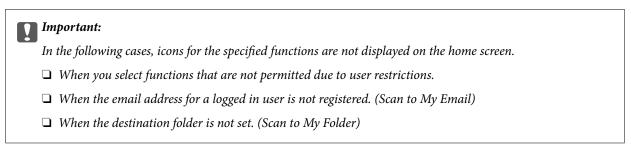

Editing the Home Screen (Web Config)

You can display only necessary icons by editing the icon layout displayed on the home screen for the control panel.

1. Select Epson Print Admin Serverless > Customize One-touch Functions from Epson Print Admin Serverless Setting List.

Or access the **Epson Open Platform** tab > **Epson Print Admin Serverless** > **Customize One-touch Functions**.

- 2. Select **Enable** from **Customize One-touch Functions**.
- 3. Select the layout of the icons displayed on the control panel from **Maximum functions per screen**. The image changes according to the selected layout.

- 4. Select the screen number from **Screen(s)**.
- 5. Select the function you want to display on the line with the same number as the number at the position where you want to display the icon.
- 6. Click OK.

Related Information

→ "Editing the Home Screen (Configuration Template)" on page 78

Making Pull Printing Settings (Web Config)

You can make settings to print from any printer by linking to the printer using Epson Print Admin Serverless.

You can register up to four slave printers for a master printer that sends print data from the user's computer. You cannot register additional slave printers from the slave printer.

Important:
The following environment is necessary for linked printers.
☐ Epson Print Admin Serverless is available.
☐ Pull Printing is supported.
☐ Epson Print Admin Serverless settings are set to the same values.
When using an additional network interface board, it only receives print jobs on an additional network interface.
You can print the received print jobs from the printer registered as the slave printer.

Linking the Printer (Web Config)

- Select Epson Print Admin Serverless Setting List > Epson Print Admin Serverless > Pull Printing.
 Or access the Epson Open Platform tab > Epson Print Admin Serverless > Pull Printing.
- 2. Set the linked printer from 1: to 5:.

Note:

Be sure to include the printer that is currently set.

You can use the IPv4, IPv6, or FQDN format for configuration. You can use the following format for FQDN (<host name>. <domain name> format).

- ☐ Host name: You can enter 2 to 63 bytes in US-ASCII numbers, letters, and hyphens (except leading and trailing).
- □ Domain name: You can enter 2 to 249 bytes in US-ASCII numbers, letters, and hyphens (except at the start and end of the string). Periods can be used as a delimiter, but you cannot enter more than one period consecutively. Also, use periods to separate the strings so that each string is 63 bytes or less.
- 3. Click OK.

The connection check starts. If the connection is successful, a connection confirmation page will be displayed.

Making Page Count Management Settings (Web Config)

You can make a variety of settings for page count management.

You can set page count management for users with Device Authentication (Local DB).

When you select LDAP as the Authentication Method, Manage page count is not displayed in the list.

Notes

You can change the page count management settings for each user on the **Epson Open Platform** tab > **User Settings**.

- Select Epson Print Admin Serverless Setting List > Epson Print Admin Serverless > Manage page count.
 Or access Epson Open Platform tab > Manage page count.
- 2. Set each item.
- 3. Click OK.

Related Information

→ "Registration for the User Information (Web Config)" on page 36

Page Count Management Setting Items (Web Config)

Item	Explanation	
Manage page count	Select whether or not to manage the number of pages.	
Operation if user page count insufficient	Select the operation to perform when the user runs out of printable pages while printing a job.	
	☐ Restrict after job ended	
	Even if the number of printable pages reaches 0 or less while printing a job, the job being printed is printed to the end. The next job to be printed cannot be printed because a message is displayed on the control panel informing the user that they do not have enough printable pages remaining.	
	□ End job	
	If the number of printable pages reaches 0 or less while printing a job, printing stops and a message is displayed on the control panel informing the user that they do not have enough printable pages remaining. Any jobs that are canceled are not deleted, they are stored in the print job list.	
	Important:	
	If the number of pages to be printed cannot be determined before printing, printing may be performed even if the number of pages that can be printed is exceeded.	
	The number of pages cannot be determined in the following cases.	
	☐ Copying using ADF	
Post-login page	Select the screen that is displayed after you log in to the printer.	
	☐ List of print jobs	
	Displays the print job list.	
	If Auto release jobs upon device login is enabled in the user information settings, printing starts automatically when the user logs in to the printer and the print job list is not displayed.	
	☐ Home screen	
	Displays the home screen.	
	When Home screen is selected, even if Auto release jobs upon device login is enabled in the user information settings, printing does not start automatically when the user logs in to the printer.	
Update schedule settings	Set to periodically update the number of printable pages.	
Set number of pages in batch	Add the number of printable pages.	

☐ Update schedule settings

Item		Explanation
Color	Enable/Disable	When Enable is selected, the number of pages that can be printed in color is updated periodically along with the number of pages set in Maximum Pages .
	Functions	Displays the name of the function that is the target of page count management.
	Maximum Pages	Enter the number of pages that can be printed in color that is updated periodically. The number of pages that can be entered is 0 to 999,999.
Black and White	Enable/Disable	When Enable is selected, the number of pages that can be printed in monochrome is updated periodically along with the number of pages set in Maximum Pages .
	Functions	Displays the name of the function that is the target of page count management.
Maximum Pages		Enter the number of pages that can be printed in monochrome that is updated periodically. The number of pages that can be entered is 0 to 999,999.
Update sched	ule settings	Set a schedule to update the number of printable pages.
		If you select OFF , the number of pages is not updated periodically.
Month		Enter the month to add the number of pages as a number from 1 to 12.
		This is available when you select Year in Update schedule settings .
Day		Enter the day to add the number of pages as a number from 1 to 31.
		This is available when you select Year or Month in Update schedule settings .
Week		Select the day of the week to add the number of pages.
		This is available when you select Week in Update schedule settings .
Hour		Enter the time to add the number of pages as a number from 0 to 23.
		This is available when you select anything other than OFF in Update schedule settings .
Retain number of pages before updating		Set whether or not to maintain the number of pages before updating when updating the number of printable pages.
		If you select Enable , the number of remaining pages is carried over and the number of pages set in Maximum Pages is added. If the number of remaining pages is negative, the number of pages will be added after subtracting the negative amount.

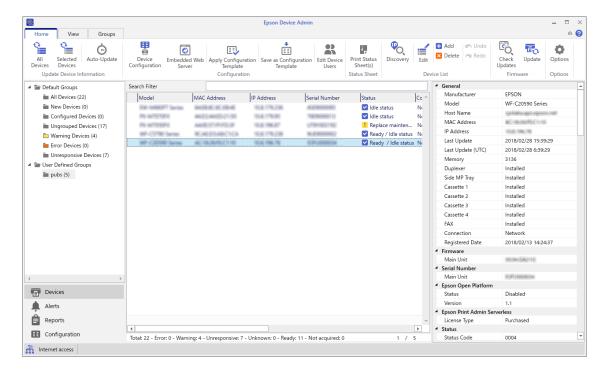

☐ Set number of pages in batch

Item		Explanation	
		When Enable is selected, the number of pages set in Number of additional pages is added to the number of pages that can be printed in color.	
	Functions	Displays the name of the function that is the target of page count management.	
	Number of additional pages	Enter the number of pages that can be printed in color. The number of pages that can be entered is -999,999 to 999,999.	
		You can reduce the number of pages that can be printed in color by entering a negative number.	
Black and White	Enable/Disable	When Enable is selected, the number of pages set in Number of additional pages is added to the number of pages that can be printed in monochrome.	
	Functions	Displays the name of the function that is the target of page count management.	
	Number of additional pages	Enter the number of pages that can be printed in monochrome. The number of pages that can be entered is -999,999 to 999,999.	
		You can reduce the number of pages that can be printed in monochrome by entering a negative number.	

Batch Setting Using Epson Device Admin (Configuration Template)

When using Epson Device Admin, you can set Epson Print Admin Serverless settings to multiple printers in bulk. For details, see the manual or help for Epson Device Admin.

Make the necessary settings for the Epson Print Admin Serverless depending on the authentication method you use. For details, see the related information.

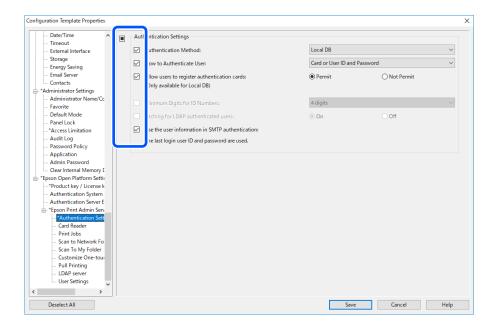

Related Information

→ "Required Settings for the Authentication Method" on page 12

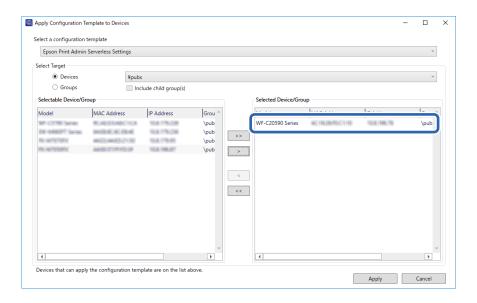

Operation Flow of Epson Device Admin

Make the Epson Print Admin Serverless settings by using the configuration template for Epson Device Admin. Apply the setting value to the printer by following the flow below.

- 1. Create the configuration template.
- 2. On the setting item screen, enter or select the value, and enable the item that you want to apply. The following is an example.

- 3. Save the configuration template.
- 4. Select the printer you want to apply the setting value, and apply the configuration template.

For the basic operation of the configuration template, see the related information.

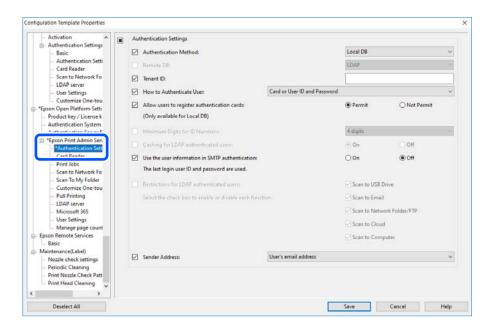

Related Information

- → "Creating the Configuration Template" on page 28
- → "Applying the Configuration Template" on page 30

Making User Authentication Settings (Configuration Template)

Set the authentication method and how to authenticate user.

1. Select **Epson Open Platform Settings** > **Epson Print Admin Serverless** > **Authentication Settings** from the configuration template.

2. Set each item.

See the related information for the items.

Related Information

→ "Authentication Setting Items (Configuration Template)" on page 59

Authentication Setting Items (Configuration Template)

Item	Explanation
Authentication	Select the authentication method.
Method	Important:
	When using the Pull Printing function, make sure that settings for Epson Print Admin Serverless are the same, such as the authentication method for the linked printer, the user settings, and the maximum time limit for unreleased jobs.
	□ Local DB
	Authenticate using the user information registered to the printer. It is necessary to register the user information to the printer.
	☐ Remote DB
	Authenticate using the user information of the synchronized external authentication method. Depending on the external authentication method used, you may need to set up an LDAP server or Microsoft Entra ID authentication.
	☐ Local DB and Remote DB
	Authenticate using the user information registered both in the printer and in the external authentication method synchronized with the printer. You need to register user information on the printer, and depending on the external authentication method used, you need to set up an LDAP server or Microsoft Entra ID authentication.
Remote DB	Select the type of external authentication method that will be used during user authentication.
	☐ Microsoft Entra ID authentication
	Authenticate using the user information registered in the synchronized Microsoft Entra ID.
	This setting cannot be used with this printer.
	□ LDAP
	Authenticate using the user information of the LDAP server synchronized with the printer. It is necessary to set up the LDAP server.
Tenant ID	Enter the tenant ID to access the Microsoft Entra ID.
	This setting cannot be used with this printer.
How to Authenticate	Select how to authenticate a user.
User	☐ Card or User ID and Password
	Use an ID card to authenticate users. You can also use a user ID and password to authenticate.
	☐ User ID and Password
	Use a user ID and password to authenticate users.
	You cannot use an ID card to authenticate when you select this function.
	□ User ID
	Use only a user ID to authenticate users. You do not need to set a password.
	☐ Card or ID Number
	Use an ID card to authenticate users. You can also use an ID Number.
	☐ ID Number
	Use only an ID Number to authenticate users.
Allow users to register	Enable it if you allow users to register the authentication card to the system.
authentication cards	This is unavailable if you select Remote DB as the Authentication Method and LDAP as the Remote DB .

Item	Explanation	
Minimum Digits for ID Numbers	Select the minimum number of digits for ID number.	
Caching for LDAP authenticated users	When using LDAP server authentication, you can set whether or not to use caching for user information. This is available when LDAP is set as the Remote DB .	
Use user information in SMTP authentication	When using a user ID and password for authentication, you can set whether or not to use user information for SMTP authentication. The system uses the last user ID and password that were logged in.	
Restrictions for LDAP authenticated users	When using LDAP server authentication, you can set the scanning functions that are available to the user.	
	This setting cannot be used with this printer.	
Sender Address	Select the sender's email address when using Scan to Email or Scan to My Email.	
	☐ User's email address	
	Use the email address of the user logged in to the printer. If the user's email address is not set, the sender's email address set in the printer is used.	
	☐ Product's email address	
	Use the sender's email address set in the printer.	

Important:

Notes when using LDAP server authentication:

When using an additional network interface board, set the network interface used for LDAP server authentication. The LDAP server can only be used with either the standard network interface or the additional network interface.

Settings > General Settings > Network Settings > LDAP Server

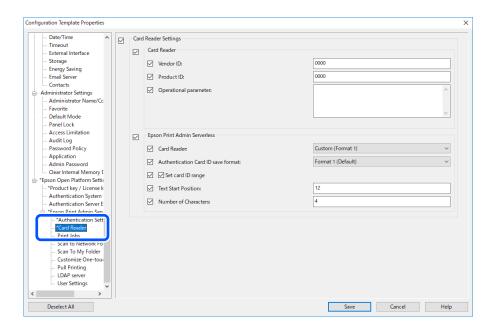

Related Information

→ "Overview for the Authentication Method" on page 7

Making Authentication Device Settings (Configuration Template)

Set the reading format for authentication information received from an ID card.

1. Select **Epson Open Platform Settings** > **Epson Print Admin Serverless** > **Card Reader** from the configuration template.

2. Set the reading information of the authentication device and ID card. See the related information for the items.

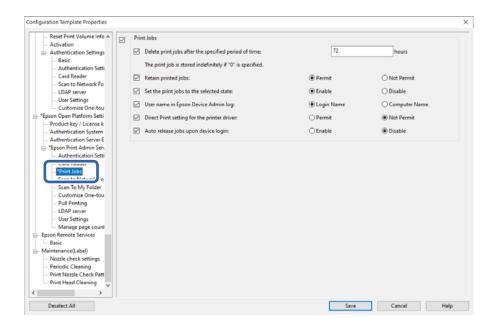

Related Information

→ "Available Reading Method for Authentication Information" on page 25

Making Print Job Settings (Configuration Template)

Make settings related to the print job sent from the client computer.

 Select Epson Open Platform Settings > Epson Print Admin Serverless > Print Jobs from the configuration template.

2. Set each item.

See the related information for the items.

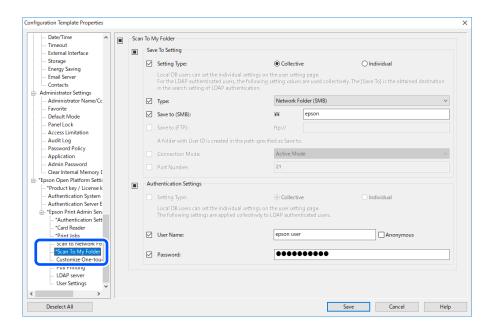

Related Information

→ "Print Jobs Setting Items" on page 35

Making Scan to My Folder Settings (Configuration Template)

Set the Scan to My Folder function using Epson Print Admin Serverless. For the scan to my folder function, the user ID name folder is automatically created under the folder path or URL that you assign here and the scanned data is saved there.

1. Select **Epson Open Platform Settings** > **Epson Print Admin Serverless** > **Scan To My Folder** from the configuration template.

2. Set each item.

Scan To My Folder Setting Items (Configuration Template)

Item		Explanation
Save To Setting	Setting Type	 Shared Automatically creates a folder named after the user's ID below the folder path or URL specified in Save to, and saves the scan results to this folder. Individual: Set the save destination for scan results for each user. Device authenticated users can be set in the user settings. Users authenticated by LDAP server can set the save location in the LDAP server's search attribute.
	Туре	Select the transmission protocol. When the scanning output destination is a network folder, select Network Folder (SMB) . For an FTP server, select FTP .
	Save to (SMB)	Set when you select Network Folder (SMB) in Type . Specify the path of the output destination of the scanned data. Enter within 160 characters in Unicode (UTF-8).
	Save to (FTP)	Set when you select FTP in Type . Specify the URL of the output destination of the scanned data. Enter within 160 characters in Unicode (UTF-8).
	Connection Mode	Set when you select FTP in Type . Select a connection mode to the FTP server.
	Port Number	Set when you select FTP in Type . Enter the port number to send the scanned data to an FTP server between 1 and 655353.
Authent ication Settings	Setting Type	This is displayed when Individual is selected as Setting Type in the Save To Setting. Shared The settings configured for User Name and Password are used for authentication regardless of the authentication method. Individual: Device authenticated users can be set individually in the user settings. For users authenticated by LDAP server, the settings for User Name and Password are used for authentication.
	User Name	Enter the user name to access the scan output destination folder. Enter within 255 characters in Unicode (UTF-8). If you select Anonymous , the user name is fixed to "anonymous".
	Password	Enter the password to access the scan output destination folder. Enter within 255 characters in ASCII.

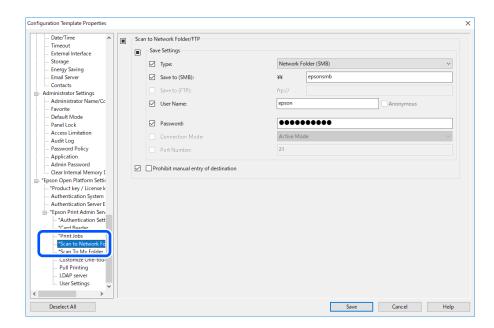

Related Information

→ "Making Scan to My Folder Settings (Web Config)" on page 50

Prohibit Changing the Destination for Scan to Network Folder/FTP (Configuration Template)

The default destination for Scan to Network Folder/FTP can be set so that the user cannot change it.

1. Select **Epson Open Platform Settings** > **Epson Print Admin Serverless** > **Scan to Network Folder/FTP** from the configuration template.

2. Enable **Prohibit manual entry of destination**.

Related Information

→ "Prohibit Changing the Destination for Scan to Network Folder/FTP (Web Config)" on page 51

Synchronizing with the LDAP Server (Configuration Template)

Set the LDAP server settings used for the authentication method and the search attributes used to identify the user information.

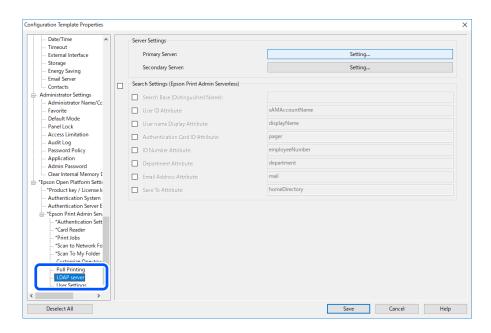

Set this when you select **Remote DB** or **Local DB and Remote DB** as the **Authentication Method** and **LDAP** is selected as the **Remote DB**.

It can be used as a redundant system of the LDAP server.

Note

The LDAP server settings that are set here are shared with the settings for **Network** > **LDAP server** > **Server Settings** (**Primary Server**) and **Server Settings** (**Secondary Server**) used by **Contacts**. When you change one value, it is reflected in the other.

1. Select **Epson Open Platform Settings** > **Epson Print Admin Serverless** > **LDAP server** from the configuration template.

2. Set each item.

See the related information for the items.

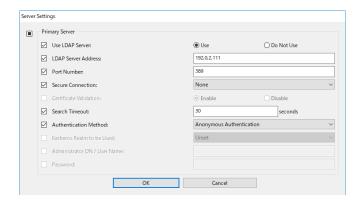

Related Information

- → "LDAP Server Setting Items" on page 66
- → "Kerberos Setting Items" on page 68
- → "Search Setting Items for LDAP Server Authentication" on page 68

LDAP Server Setting Items

Click Settings for Server Settings (Primary Server).

When you select **Kerberos Authentication** for **Authentication Method**, make Kerberos settings from **Network** > **Security** > **Kerberos Settings**.

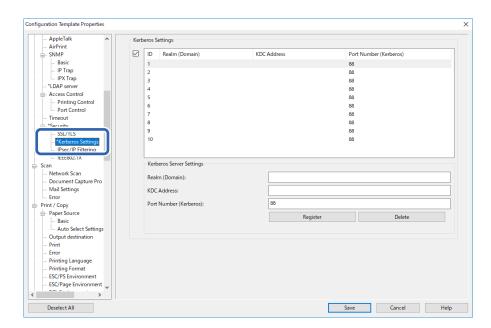

Item	Settings and Explanation	
Use LDAP Server	Select when you use LDAP server.	
LDAP Server Address	Enter the address of the LDAP server. Enter between 1 and 1024 characters of either IPv4, IPv6, or FQDN format. For the FQDN format, you can use alphanumeric characters in ASCII (0x20-0x7E) and "-" except for the beginning and end of the address.	
Port Number	Enter the LDAP server port number between 1 and 65535.	
Secure Connection	Specify the authentication method when the printer accesses the LDAP server.	
Certificate Validation	When this is enabled, the certificate of the LDAP sever is validated. We recommend this is set to Enabled .	
	To set up, the CA Certificate needs to be imported to the printer.	
Search Timeout	Set the length of time for searching before timeout occurs between 0 and 99999.	
Authentication Method	Select one of the methods.	
	If you select Kerberos Authentication , select Kerberos Settings to make Kerberos settings.	
	To perform Kerberos Authentication, the following environment is required.	
	☐ The printer and the DNS server can communicate.	
	☐ The time of the printer, KDC server, and the server that is required for authentication (LDAP server, SMTP server, File server) are synchronized.	
	☐ When the service server is assigned as the IP address, the FQDN of the service server is registered on the DNS server reverse lookup zone.	
Kerberos Realm to be Used	If you select Kerberos Authentication for Authentication Method , select the Kerberos realm that you want to use.	
Administrator DN / User Name	Enter the user name for the LDAP server in 1024 characters or less in Unicode (UTF-8). You cannot use control characters, such as 0x00-0x1F and 0X7F. This setting is not used when Anonymous Authentication is selected as the Authentication Method . If you do not specify this, leave it blank.	
Password	Enter the password for the LDAP server authentication in 1024 characters or less in Unicode (UTF-8). You cannot use control characters, such as 0x00- 0x1F and 0X7F. This setting is not used when Anonymous Authentication is selected as the Authentication Method . If you do not specify this, leave it blank.	

Related Information

→ "Importing from the LDAP Server" on page 72

Kerberos Setting Items

Select Network > Security > Kerberos Settings.

Item	Settings and Explanation	
Realm (Domain)	Enter the realm of the Kerberos authentication in 1024 characters or less in ASCII. If you do not register this, leave it blank.	
KDC Address	Enter the address of the Kerberos authentication server. Enter 1024 characters or less in either IPv4, IPv6 or FQDN format. If you do not register this, leave it blank.	
Port Number (Kerberos)	Enter the Kerberos server port number between 1 and 65535.	

Search Setting Items for LDAP Server Authentication

Set the search attribute of the users to synchronize with the LDAP server authentication.

Search Setting

Item	Settings and Explanation	
Search Base (Distinguished Name)	Specify the start position for searching the user information when you search it from the LDAP server. Enter between 0 and 128 characters in Unicode (UTF-8). If you do not search for arbitrary attribute, leave this blank. Example for the local server directory: dc=server,dc=local	
User ID Attribute	Specify the attribute name to be used when searching for a user ID. Enter a combination of between 1 and 255 characters using A-Z, a-z, 0-9, hyphens (-), and semicolons (;). The first character should be a-z or A-Z. Example: cn, uid	

Item	Settings and Explanation	
User name Display Attribute	Specify the attribute name to be used when searching for a user display name. Enter a combination of between 0 and 255 characters using A-Z, a-z, 0-9, hyphens (-), and semicolons (;). The first character should be a-z or A-Z. Example: cn, name	
Authentication Card ID Attribute	Specify the attribute name to be used when searching for an authentication card ID. Enter a combination of between 0 and 255 characters using A-Z, a-z, 0-9, hyphens (-), and semicolons (;). The first character should be a-z or A-Z. Example: cn, sn	
ID Number Attribute	Specify the attribute name to be used when searching for an ID number. Enter a combination of between 0 and 255 characters using A-Z, a-z, 0-9, hyphens (-), and semicolons (;). The first character should be a-z or A-Z. Example: cn, id	
Department Attribute	Specify the attribute name to be used when searching for a department name. Enter a combination of between 0 and 255 characters using A-Z, a-z, 0-9, hyphens (-), and semicolons (;). The first character should be a-z or A-Z. Example: ou, ou-cl	
Email Address Attribute	Specify the attribute name to be used when searching for an email address. Enter a combination of between 0 and 255 characters using A-Z, a-z, 0-9, hyphens (-), and semicolons (;). The first character should be a-z or A-Z. Example: mail	
Save To Attribute	Specify the attribute name used to refer to the save destination for Scan To My Folder. Enter a combination of between 0 and 255 characters using A-Z, a-z, 0-9, hyphens (-), and semicolons (;). The first character should be a-z or A-Z. Example: homeDirectory

Registration for the User Information (Configuration Template)

Register the user information that is used for user authentication.

When you select **Remote DB** as the **Authentication Method**, you do not need to register user information.

Import for the User Information (Configuration Template)

You can import user information to the printer in bulk by using the LDAP server or CSV/ENE file.

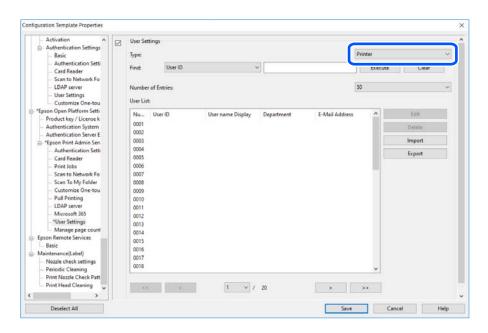

Search the user information from the LDAP server for Epson Print Admin Serverless, and then import it to the printer.

You can import user information up to the number of users that have not already been assigned in Contacts.

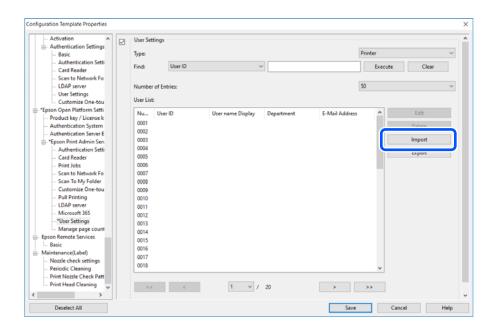

When exporting your user information from Epson Print Admin Serverless, you will be asked to set a password, which will be required when importing your user information.

Importing from CSV / ENE File

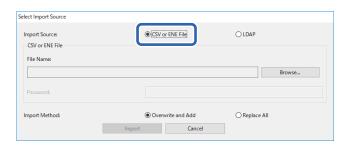

- 1. Select Epson Open Platform Settings > Epson Print Admin Serverless > User Settings.
- 2. Select **Printer** for **Type**.

3. Click Import.

4. Select **CSV or ENE File** for **Import Source**.

Click Browse.

The file selection screen is displayed.

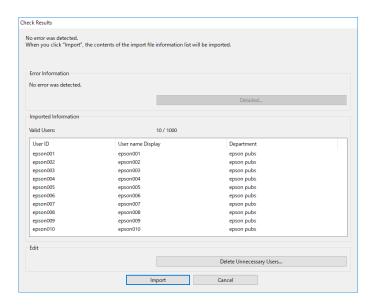

- 6. Select the file to import, and then click **Open**.
- 7. Enter the password set in the selected CSV/ENE file.
- 8. Select how to import the file.
 - ☐ Overwrite and Add: If there is the same user ID, overwrite it, otherwise add it.
 - ☐ Replace All: Replace the all user information to the new one.

9. Click **Import**.

The confirmation screen is displayed.

10. Click OK.

The validation result is displayed.

Note:

- ☐ When the user information exceeds the available number, an instruction to delete user information is displayed. Delete the user information that is exceeded before importing.
- □ When you click **Delete Unnecessary Users**, the user deletion screen is displayed. Select the user information and click **Delete**. You can delete the user information before importing.

11. Click Import.

The user information is imported to the configuration template.

Related Information

→ "Creating the CSV File" on page 40

Importing from the LDAP Server

- 1. Select Epson Open Platform Settings > Epson Print Admin Serverless > User Settings.
- 2. Click Import.
- 3. Select **LDAP** for **Import Source**.

4. Click Settings.

LDAP server setting is displayed.

Note:

This LDAP server setting is the setting to import the user information from the LDAP server to the printer. The imported user information is used to authenticate users by the printer itself.

On the other hand, when you select **Remote DB** or **Local DB** and **Remote DB** for the authentication method, communicate with the LDAP server to authenticate users.

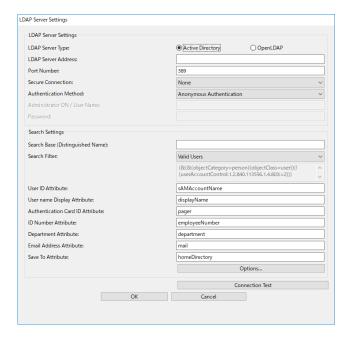

5. Set each item.

When importing user information from an LDAP server, you can make the following settings in addition to the items in the LDAP settings.

See related information for other items.

Items		Explanation
LDAP Server Settings	LDAP Server Type	Select the type of LDAP server.

Items			Explanation
Search Settings	Search Filter		Configure the search strings for the LDAP search filter. You can also edit the filters by selecting Custom .
	Options	Туре	You can set the type of destination for Scan To My Folder.
		Connection Mode	When you select FTP as the Type , you can set the connection mode for the FTP.
		Port Number	When you select FTP as the Type , you can set the port number used.

6. Perform a connection test if necessary by clicking Connection Test.

Display the 10 user information got from the LDAP server.

- 7. Click **OK**.
- 8. Select how to import the file.
 - ☐ Overwrite and Add: If there is the same user ID, overwrite it, otherwise add it.
 - ☐ Replace All: Replace the all user information to the new one.
- 9. Click Import.

The confirmation screen is displayed.

10. Click **OK**.

The validation result is displayed.

Note:

When you click **Delete Unnecessary Users**, the user deletion screen is displayed. Select the user information and click **Delete**. You can delete the user information before importing.

11. Click Import.

The user information is imported to the configuration template.

- → "User Information Setting Items" on page 36

Allow printer to be used from drivers and software

Set permissions to allow scanning, sending faxes, printing forms, and so on from the computer.

Set Access Permission to the Driver (Configuration Template)

Create an account to use the printer from Epson Scan 2 or PC-FAX.

Notes

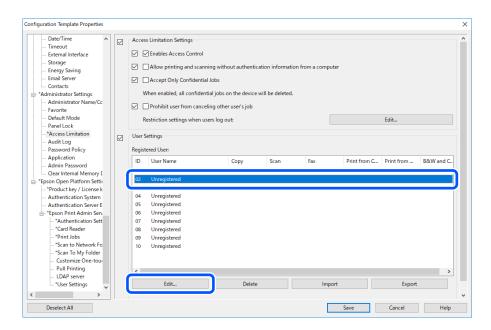

You can use $PC ext{-}FAX$ on printers equipped with the fax function.

1. Select **Administrator Settings** > **Access Limitation** from the configuration template.

2. Select the ID of an unregistered line except for **01**, and then click **Edit**.

Note:

01 *is reserved for applications such as the authentication system.*

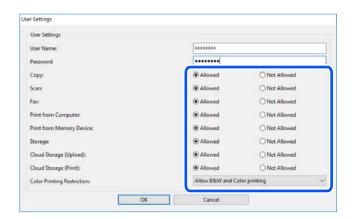

3. Enter the **User Name** and **Password**.

Note:

The user name and password set here are used for driver and software authentication.

4. Select **Allowed** for the functions that you want to allow the driver and software to access.

5. Click **OK**.

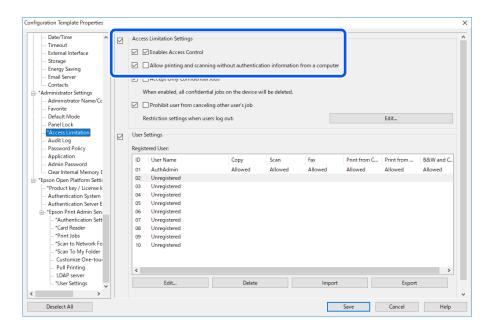

Register the user name and password set in step 3 on the computer using Epson Scan 2 or PC-FAX.

Related Information

- → "Scanning from the Computer" on page 46
- → "Sending and Receiving Faxes Using PC-FAX" on page 47

Allow print jobs without authentication information (Configuration Template)

- 1. Select **Administrator Settings** > **Access Limitation** from the configuration template.
- 2. Select Enables Access Control and Allow printing and scanning without authentication information from a computer in Access Limitation Settings.

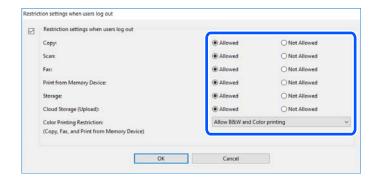

Making the Function Settings for Use Without Authentication (Configuration Template)

When users log out, permit guest users to use the printer's standalone functions (copy, fax, scan, etc.). The icons for the available functions are displayed on the log in screen.

Note:

You can use fax on printers equipped with the fax function.

- 1. Select **Administrator Settings** > **Access Limitation** from the configuration template.
- 2. Click Edit for Restriction settings when users log out.
- 3. Enable Restriction settings when users log out.
- 4. Select **Allowed** for the functions you want to permit to use.

5. Click **OK**.

Related Information

→ "Making the Function Settings for Use Without Authentication (Web Config)" on page 49

Mail Server Settings (Configuration Template)

Set when you use the following functions to allow printers to send email.
☐ Scan to My Email
This is the function to send the scanned data to the email address of the user who logged in to the printe
☐ Email Notification
This is the function to receive alerts by email when events occur, such as your printer running out of paper.
See the manual for details on the settings.

Related Information

- → "Registration for the User Information (Web Config)" on page 36
- → "About Email Notifications" on page 99

Editing the Home Screen (Configuration Template)

You can display only necessary icons by editing the icon layout displayed on the home screen for the control panel.

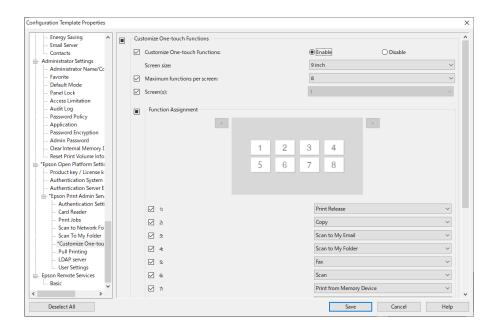

1. Select Epson Open Platform Settings > Epson Print Admin Serverless > Customize One-touch Functions from the configuration template.

2. Set each item.

Important:

In the following cases, icons for the specified functions are not displayed on the home screen.

- ☐ When you select functions that are not permitted due to user restrictions.
- ☐ When the email address for a logged in user is not registered. (Scan to My Email)
- ☐ When the destination folder is not set. (Scan to My Folder)

Items of Customize One-touch Functions

Items	Description
Customize One-touch Functions	Select Enable / Disable for editing the home screen function.
Screen size	Select the screen size for the specified device.
Maximum functions per screen	Select the maximum number of functions displayed on one screen.
Screen(s)	Select the number of screens.
Function Assignment	Select the functions you want to assign to the numbers on the screen.

Making Pull Printing Settings (Configuration Template)

You can make settings to print from any printer by linking to the printer using Epson Print Admin Serverless. You can register up to four slave printers for a master printer that sends print data from the user's computer.

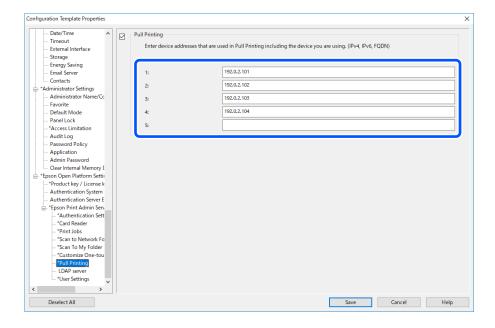

Important:
The following environment is necessary for linked printers.
Epson Print Admin Serverless is available.
Pull Printing is supported.
Epson Print Admin Serverless settings are set to the same values.
When using an additional network interface board, it only receives print jobs on an additional network interface.
You can print the received print jobs from the printer registered as the slave printer.

Linking the Printer (Configuration Template)

- Select Epson Open Platform Settings > Epson Print Admin Serverless > Pull Printing from the configuration template.
- 2. Set the linked printer from 1: to 5:.

You can use the IPv4, IPv6, or FQDN format for configuration. You can use the following format for FQDN (<host name>. <domain name> format).

- ☐ Host name: You can enter 2 to 63 bytes in US-ASCII numbers, letters, and hyphens (except leading and trailing).
- □ Domain name: You can enter 2 to 249 bytes in US-ASCII numbers, letters, and hyphens (except at the start and end of the string). Periods can be used as a delimiter, but you cannot enter more than one period consecutively. Also, use periods to separate the strings so that each string is 63 bytes or less.

Making Page Count Management Settings (Configuration Template)

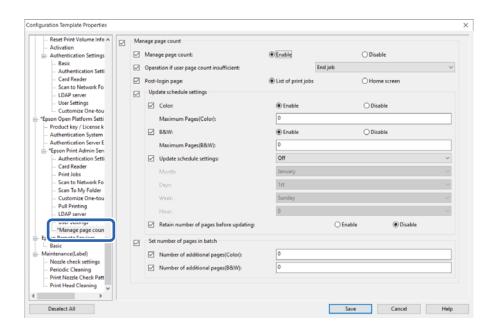

You can make a variety of settings for page count management.

You can set page count management for users with Device Authentication (Local DB).

Note:

You can change the page count management settings for each user on the **Epson Open Platform Settings** > **Epson Print Admin Serverless** > **User Settings**.

- 1. Select **Epson Open Platform Settings** > **Epson Print Admin Serverless** > **Manage page count** from the configuration template.
- 2. Set each item.

Related Information

→ "Registration for the User Information (Configuration Template)" on page 69

Page Count Management Setting Items (Configuration Template)

Item	Explanation
Manage page count	Select whether or not to manage the number of pages.

Item	Explanation
Operation if user page count insufficient	Select the operation to perform when the user runs out of printable pages while printing a job.
	☐ Restrict after job ended
	Even if the number of printable pages reaches 0 or less while printing a job, the job being printed is printed to the end. The next job to be printed cannot be printed because a message is displayed on the control panel informing the user that they do not have enough printable pages remaining.
	☐ End job
	If the number of printable pages reaches 0 or less while printing a job, printing stops and a message is displayed on the control panel informing the user that they do not have enough printable pages remaining. Any jobs that are canceled are not deleted, they are stored in the print job list.
	Important:
	If the number of pages to be printed cannot be determined before printing, printing may be performed even if the number of pages that can be printed is exceeded.
	The number of pages cannot be determined in the following cases.
	☐ Copying using ADF
Post-login page	Select the screen that is displayed after you log in to the printer.
	☐ List of print jobs
	Displays the print job list.
	If Auto release jobs upon device login is enabled in the user information settings, printing starts automatically when the user logs in to the printer.
	☐ Home screen
	Displays the home screen.
	When Home screen is selected, even if Auto release jobs upon device login is enabled in the user information settings, printing does not start automatically when the user logs in to the printer.
Update schedule settings	Set to periodically update the number of printable pages.
Set number of pages in batch	Add the number of printable pages.

☐ Update schedule settings

Item		Explanation
Color	Enable/Disable	When Enable is selected, the number of pages that can be printed in color is updated periodically along with the number of pages set in Maximum Pages(Color) .
	Maximum Pages(Color)	Enter the number of pages that can be printed in color that is updated periodically. The number of pages that can be entered is 0 to 999,999.
		You can enter the number of pages if you select Enable in Color .
B&W	Enable/Disable	When Enable is selected, the number of pages that can be printed in monochrome is updated periodically along with the number of pages set in Maximum Pages(B&W) .
	Maximum Pages(B&W)	Enter the number of pages that can be printed in monochrome that is updated periodically. The number of pages that can be entered is 0 to 999,999.
		You can enter the number of pages if you select Enable in B&W .
Update sche	dule settings	Set a schedule to update the number of printable pages.
		If you select Off , the number of pages is not updated periodically.
	Month	Select the month to add the number of pages.
		This is available when you select Year in Update schedule settings .
	Days	Select the date to add the number of pages.
		This is available when you select Year or Month in Update schedule settings .
	Week	Select the day of the week to add the number of pages.
		This is available when you select Week in Update schedule settings .
	Hour	Select the time to add the number of pages.
		This is available when you select anything other than Off in Update schedule settings.
Retain number of pages before updating		Set whether or not to maintain the number of pages before updating when updating the number of printable pages.
		If you select Enable , the number of remaining pages is carried over and the number of pages set in Maximum Pages(Color) or Maximum Pages(B&W) is added. If the number of remaining pages is negative, the number of pages will be added after subtracting the negative amount.

☐ Set number of pages in batch

Item	Explanation
Number of additional pages(Color)	Enter the number of pages that can be printed in color. The number of pages that can be entered is -999,999 to 999,999.
	You can reduce the number of pages that can be printed in color by entering a negative number.
Number of additional pages(B&W)	Enter the number of pages that can be printed in monochrome. The number of pages that can be entered is -999,999 to 999,999.
	You can reduce the number of pages that can be printed in monochrome by entering a negative number.

Client Computer Setting

Installation for the Printer Driver

Install the standard printer driver for your printer on the client computer. If it has already been installed, update it to the latest one.

Printer Driver Setting

To print as Epson Print Admin Serverless, it is necessary to send the user information to the printer together with the print job.

Register or set the user information to each client computer. When you set it, log in to the client computer using the administrator account.

For the settings or instructions on how to use it, see *Epson Print Admin Serverless How to Use > Printing from the Computer*.

User Settings for Windows Printer Driver

or Windows, set the user ID for the printer driver. There are three settings for the user information settings, hich are explained below.
Set permanently
When you use authenticated printing from this computer, always use the user ID set in User ID . You do not need to set the user ID again when printing.
Select this setting when using the same user ID as the login name or when using a fixed user ID.
Set manually by each user
On the More Options tab in the printer driver, select Settings under Job Type , and then set the user ID in the User ID Setting window. Once you have set the user ID, you do not need to set it again unless you change the user ID that you want to use. To change the user ID, change the user ID in the User ID Setting window.
Prompt user at each print job
The User ID Setting window is displayed before printing, and then users can enter the user ID.
This setting is useful when multiple users use a computer with a single user account.

Print Methods

When printing from a computer, specify whether or not to print without storing print jobs. This function is available when it has been allowed in the print job settings.

☐ Secure Print

Sent print jobs are stored on the printer. Log in to the printer using an authentication card and so on, select the job, and then print it.

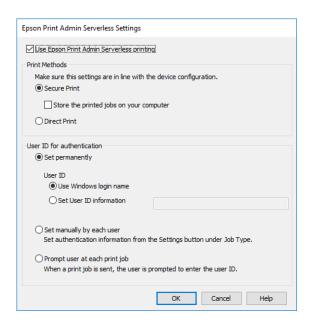

☐ Store the printed jobs on your computer

Select if printing is slow when using the Pull Printing function. Clear this if you are not using the Pull Printing function.

Client Computer Setting

□ Direct Print

Sent print jobs are printed directly. Print jobs are not stored on the printer.

- → "Making Print Job Settings (Web Config)" on page 35
- → "Making Print Job Settings (Configuration Template)" on page 61

User Settings for Mac OS Printer Driver

For Mac OS, set the user ID for the printer driver when printing. You can skip entering your user ID by saving the information to your keychain.

Important:

For Mac OS, you cannot authenticate the printer's IP connection. Connect the printer using Bonjour or IPP protocol.

Related Information

→ "Connect the printer by using Bonjour" on page 87

Client Computer Setting

→ "Connect the printer by using IPP protocol" on page 87

Connect the printer by using Bonjour

- 1. Open System Preferences (or System Settings) > Printers & Scanners (or Print & Scan, Print & Fax).
- 2. Click + (or **Add Printer**, **Scanner or Fax**).

When the menus are displayed, click **Add Printer or Scanner**.

- 3. Make sure you select **Default**, and then select the printer you want to use from **Name**.
- 4. Select Select Software (or Select Printer Software) from Use (or Print Using).
- 5. Select the printer you want to use on the **Printer Software** screen, and then click **OK**.
- 6. Click Add.

Connect the printer by using IPP protocol

- 1. Open System Preferences (or System Settings) > Printers & Scanners (or Print & Scan, Print & Fax).
- 2. Click + (or **Add Printer**, **Scanner or Fax**).

When the menus are displayed, click **Add Printer or Scanner**.

- 3. Select IP.
- 4. Enter the printer's host name or IP address in **Address**.
- 5. Select **IPP** (**Internet Printing Protocol**) in **Protocol**.
- 6. Select Select Software (or Select Printer Software) from Use (or Print Using).
- 7. Select the printer you want to use on the **Printer Software** screen, and then click **OK**.
- 8. Click Add.

Connection Format for Authentication Information

When printing jobs from the printer driver, authentication information is required for USB connections and network connections. Print jobs without authentication information are discarded.

You can disable USB connections in the following way. In this situation, the print job is discarded.

☐ Web Config:

Set PC connection via USB in Product Security > External Interface to Disable.

☐ Epson Device Admin (Configuration Templates):

Set USB Device Interface in Common > External Interface to Do Not Use.

User Reports Using Epson Device Admin

You can create an Epson Print Admin Serverless report for each group and each user by using Epson Device Admin. You can create the report by specifying a period or setting a regular schedule. Create device groups before creating reports.

These settings are displayed when you enable the Epson Print Admin Serverless / Authentication Settings menu.

Important:

If you have not registered the printer's administrator password in Epson Device Admin, you cannot acquire job histories from the printer.

Register the printer's administrator password in advance. See the following for the registration procedure.

"Registering the printer's administrator password in Epson Device Admin" on page 11

Related Information

→ "Displaying Epson Print Admin Serverless / Authentication Settings menu" on page 94

Creating User Reports

- 1. Select **Reports** on the side bar task menu.
- 2. Select **User Defined Report** > **Scheduled Reports** from the tree view.

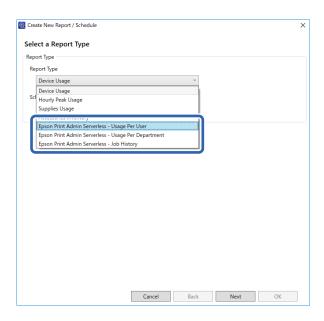

3. Click **New** on the ribbon menu.

The report creation Wizard is displayed.

4. Select the condition when acquiring report data from the following items.

Epson Print Admin Serverless - Usage Per User / Epson Print Admin Serverless - Usage Per Department / Epson Print Admin Serverless - Job History

5. Select the conditions used to create a report by specifying the period or setting a schedule.

Create report by specifying a period: Clear the **Create a Schedule** check box.

Create report by setting the schedule: Select the Create a Schedule check box.

- 6. Click Next.
- 7. Select the target device group.

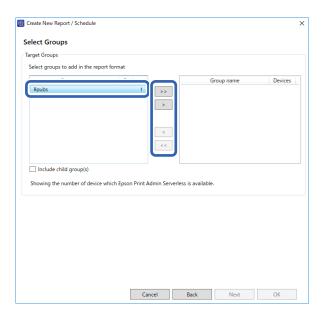

Target groups are listed in the box on the right. To change these, move groups by using >, >>, <, and <<.

You can move selected groups by using >>, <, and all groups by using >>, <<.

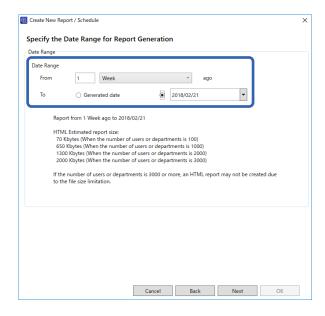

Select **Include child group(s)** to automatically select child groups within the selected group.

Note:

If you print a job without storing it in the printer, a report for Usage Per Department is not created.

- 8. Click Next.
- 9. Specify the report range.

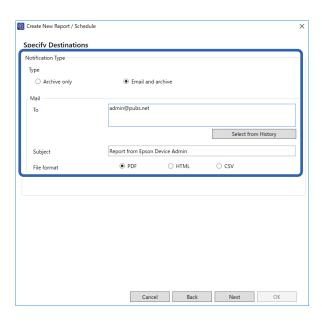

See the following to make the settings.

Item	Explanation
Date Range	Specify the report range from the date the report was created or by specifying a date on the calendar. Specify by using a combination of any number over 1 and a day/ week/month/year.

10. Click Next.

11. Specify the report destinations.

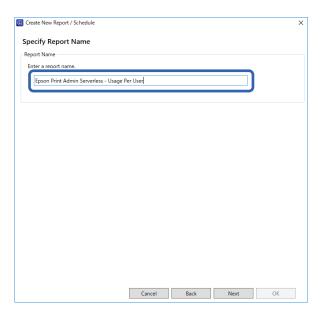

See the following to make the settings.

Item	Explanation
Туре	Specify whether or not to send a notification email.
То	Enter the address to which the alerts are sent. When entering multiple addresses, separate the addresses with semi-colons (;). You can enter up to 32,767 bytes including [;]. Enter all addresses in the [TO] field. You cannot use the [CC] or [BCC] fields.
Subject	The subject of the alert notification email. You can enter up to 256 characters.
File format	Sets the file format. You can select from PDF, HTML, or CSV. You can select only CSV when Job History is selected in step 4.

12. Click Next.

13. Specify a report name.

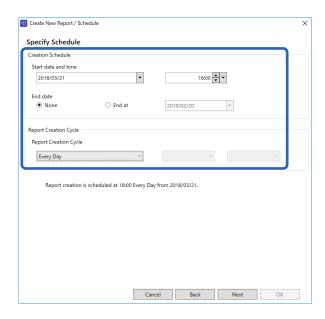

Enter up to 1024 characters in Unicode.

- 14. Click Next.
- 15. Specify a schedule.

Note:

- ☐ *If you clear the* **Create a Schedule** check box in step 5, this screen is not displayed.
- □ Set the **Start date and time** for the **Creation Schedule** after the data collection time. If this is set to before the data collection time, the report is created before starting data collection on the last day in the report range.

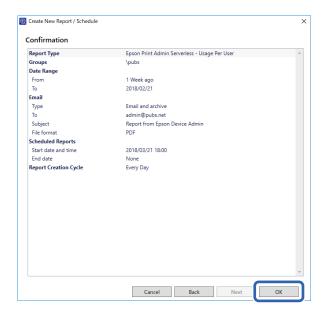

See the following to make the settings.

Item	Explanation
Start date and time	Set the day to start the schedule. The units are intervals of one minute.

Item	Explanation
End date	Set the day to end the schedule.
	Select None if you do not want to specify an end day.
Report Creation Cycle	Specify the interval for creating reports.

16. Click Next.

17. Click **OK**.

The report or schedule is created. The created report is saved as an archive report.

Report Output Items

The following items are output in the report.

Usage Per User

 $User\ ID/Department/Subtotal\ pages/PrintColor1-Sided/PrintColor2-Sided/PrintMono1-Sided/PrintMono2-Sided/CopyColor1-Sided/CopyColor2-Sided/CopyMono1-Sided/CopyMono2-Sided/Fax\ transmission/Scan/Fax\ receiving$

Managing Printers by Using Epson Device Admin

You can manage the printers by using Epson Device Admin.

Displaying Epson Print Admin Serverless / Authentication Settings menu

Display the settings menu related to Epson Print Admin Serverless. They are set not to be displayed by default.

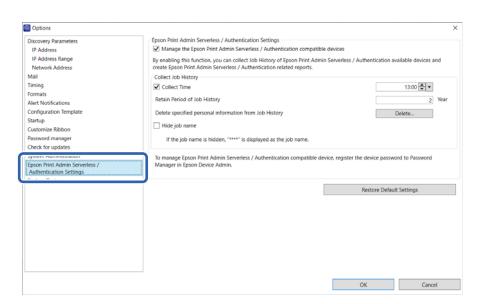

Important:

If you have not registered the printer's administrator password in Epson Device Admin, register the password first. See the following for the registration procedure.

"Registering the printer's administrator password in Epson Device Admin" on page 11

- Start Epson Device Admin.
- Click Options on the ribbon menu, and then select Epson Print Admin Serverless / Authentication Settings.

- Set each item.
- Click **OK**.

Epson Print Admin Serverless Settings

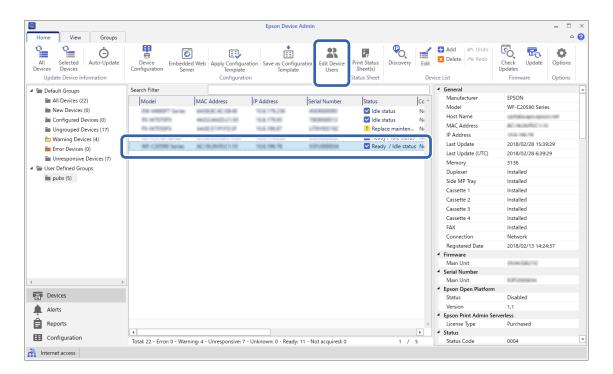

Item	Explanation
Manage the Epson Print Admin Serverless / Authentication compatible	Select to enable settings for Epson Print Admin Serverless and perform the following operations and settings.
devices	☐ Collect job history data for Epson Print Admin Serverless compatible printers
	☐ Create Epson Print Admin Serverless related reports
	☐ Display the Edit Device Users button on the ribbon menu
Collect Time	Select to set the collection time for the job history data of the Epson Print Admin Serverless compatible printers.
Retain Period of Job History	You can set the period to save the job history on Epson Device Admin up to five years. The expired job history is deleted.
Delete specified personal information from Job History	Click Delete to delete the specified personal information from the job history.
Hide job name	Select to hide the print job names recorded in the job history. Select when you do not want to display the print job names.

User Maintenance

You can maintain the user information registered on the printer.

Editing Individually

1. Select the printer whose user information you want to edit from the device list.

2. Select **Configuration** - **Edit Device Users** from the ribbon menu.

The user list is displayed.

3. Select the user you want to edit.

Note:

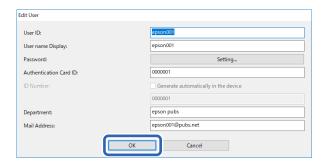

You can search the user list by selecting the item you want to find from **Find**, entering the keyword, and clicking **Execute**.

Click **Clear** to clear the value you entered.

4. Click Edit.

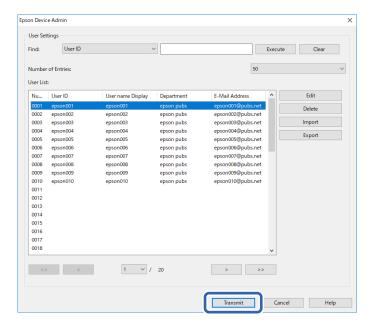

The user information is displayed.

5. Edit each item, and then click **OK**.

6. Click **Transmit**.

The send confirmation screen is displayed.

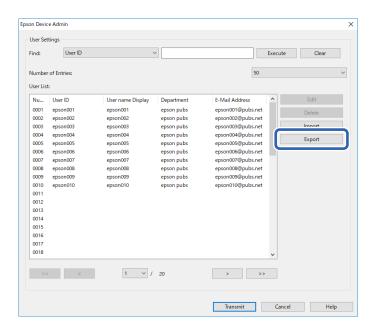

- 7. Click **OK** on the send confirmation screen.
- 8. Click **OK** on the completion screen.

Editing in Bulk

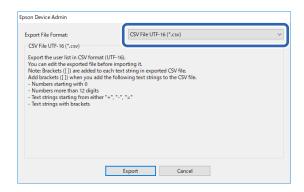

- 1. Select the printer whose user information you want to edit from the device list.
- Select Configuration > Edit Device Users from the ribbon menu.
 The user list is displayed.
- Click Export.

The screen to select an export method is displayed.

4. Select an export method for the user information.

Select **CSV File UTF-16** (*.csv) when editing the CSV file using Microsoft Excel. See the related information below for more information on the file format.

- 5. Set a password for the CSV/ENE file.
 - This password is required when importing the CSV/ENE file.
- 6. Click Export.
- 7. Select the location where you want to save the file, and then click **Save**.

The file is saved.

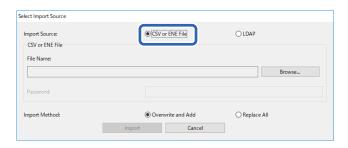

8. Edit and save this CSV file in a spreadsheet application such as Microsoft Excel or in a text editor.

Important:

Do not change the encoding or header information of the file. You may not be able to import the file.

- 9. Click Import.
- 10. Select CSV or ENE File on Import Source.

11. Click Browse.

The file selection screen is displayed.

- 12. Select the file you want to import, and then click **Open**.
- 13. Enter the password set in the selected CSV/ENE file.
- 14. Select an import method.
 - Overwrite and Add: If there is the same user ID, overwrite it. Otherwise add it.
 - ☐ Replace All : Replace all the user information with the new one.
- 15. Click Import.

The confirmation screen is displayed.

16. Click **OK**.

Verification of the imported file starts, and the result is displayed.

Note:

Click **Delete Unnecessary Users** to open the user information deletion screen. You can delete the user information before importing by selecting it and clicking **Delete**.

17. Click Import.

Related Information

→ "Export Format" on page 98

Export Format

Item	Explanation
CSV File UTF-16 (*.csv)	Export to a tab-delimited CSV file encoded in Unicode (UTF-16).

Item	Explanation
CSV File UTF-8 (*.csv)	Export to a comma-delimited or semicolon-delimited CSV file encoded in Unicode (UTF-8). The delimiter can be set in CSV data delimiter by selecting Options > Formats .
Binary file (*.ene)	Export to an ENE file. You cannot edit the ENE file since it is an encrypted binary file.

Checking the Printer Information from Web Config

You can check the printer information by using Web Config.

Email Notifications and Snapshots

You can check the status of the remote printer by using email notifications and panel snapshots.

About Email Notifications

This is the notification function that, when events such as printing stop and printer error occur, send the email to the specified address.

You can register up to five destinations and set the notification settings for each destination.

To use this function, you need to set up the mail server before setting up notifications.

See the manual for details on the settings.

Checking the Panel Display of the Remote Printer

You can check the panel display of the remote printer by using Web Config.

- Run Web Config of the printer that you want to check.
 When you receive the email notification, you can run Web Config from the URL on the email.
- 2. Select **Status** tab > **Panel Snapshot**.

The current panel of the printer is displayed on Web Config.

To update, click Refresh.

Related Information

→ "Accessing Web Config" on page 9

Deleting the Print Jobs

You can delete the print jobs stored in the printer.

- Access Web Config, and then select the Epson Open Platform tab > Epson Print Admin Serverless > Print Jobs.
- 2. Select the print jobs that you want to delete in You can delete print jobs..

Item	Explanation
Printed jobs	Delete all print jobs retained in the printer.
All	Delete all print jobs in the printer.

3. Click Delete.

Related Information

→ "Accessing Web Config" on page 9

Backing Up the Settings

You can back up the settings on Web Config and the configuration templates on Epson Device Admin.

Important:

- ☐ You cannot back up the license key. We recommend writing it down it in a text file or as a note. When you replace the printer, you cannot use the same license key. In this case, ask your dealer.
- ☐ To back up Epson Print Admin Serverless settings, make sure that the license key is set before exporting.

Settings in Web Config

You can export the setting value set from Web Config to the file. You can use it for backing up the contacts, setting values, replacing the printer, etc. The exported file cannot be edited because it is exported as a binary file.

Export the settings

Export the setting for the printer.

- 1. Access Web Config, and then select the **Device Management** tab > **Export and Import Setting Value** > **Export**.
- 2. Select the settings that you want to export.
 - Select the settings you want to export. If you select the parent category, subcategories are also selected. However, subcategories that cause errors by duplicating within the same network (such as IP addresses and so on) cannot be selected.
- 3. Enter a password to encrypt the exported file.

You need the password to import the file. Do not enter any characters if you do not want to encrypt the file.

Click Export.

Important:

If you want to export the printer's network settings such as the device name and IPv6 address, select Enable to select the individual settings of device and select more items. Only use the selected values for the replacement printer.

Related Information

→ "Accessing Web Config" on page 9

Import the settings

Import the exported Web Config file to the printer.

Important:

- The exported Web Config file does not contain the license key. If Epson Print Admin Serverless is disabled, select the Epson Open Platform tab > Product Key or License Key, and then enter the license key before importing to enable Epson Print Admin Serverless.
- \Box When importing values that include individual information such as a printer name or IP address, make sure the same IP address does not exist on the same network. If the IP address overlaps, the printer does not reflect the
- 1. Access Web Config, and then select the Epson Open Platform tab > Product Key or License Key, and then enter the license key in **Product Key or License Key**.
- 2. Select the **Device Management** tab > **Export and Import Setting Value** > **Import**.
- Select the exported file, and then enter the encrypted password.
- Click Next.
- Select the settings that you want to import, and then click Next.
- 6. Click OK.

The settings are applied to the printer.

Related Information

→ "Accessing Web Config" on page 9

Configuration Templates in Epson Device Admin

You can save and restore configuration templates to a file.

See the Epson Device Admin manuals for information about backing up your device list, printer info, etc..

Backing Up Configuration Templates

- 1. Select **Configuration** on the side bar task menu.
- 2. Select a configuration template to backup from the template list.

You cannot select preset configuration templates.

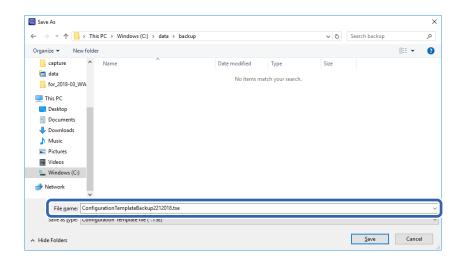

Note:

To make multiple selections, press Ctrl or Shift and click your mouse.

3. Click **Backup** on the ribbon menu.

4. Select the destination to save the file and enter a file name.

5. Click Save.

TSE format template files are saved together in a Zip file.

Importing Configuration Templates

Unzip the Zip file containing configuration templates and retrieve the configuration template files (TSE format).

- 1. Select **Configuration** on the side bar task menu.
- 2. Click **Import** on the ribbon menu.

The file import screen is displayed.

- 3. Select the configuration template file (TSE format) to be imported.
- 4. Click Open.

The configuration template is imported and the results are displayed.

5. Click OK.

Disabling Epson Print Admin Serverless

Disable the Epson Print Admin Serverless setting.

Important:

When you re-enable Epson Print Admin Serverless after disabling, the setting values are restored to their defaults. We recommend that you back up the settings before disabling."

Related Information

→ "Backing Up the Settings" on page 100

Disabling from Web Config

You can disable the Epson Print Admin Serverless license by using Web Config.

- 1. Access Web Config, and then select the **Epson Open Platform** tab > **Product Key or License Key**.
- 2. Delete the product key in **Product Key or License Key**.
- 3. Click **Next**.

The settings are displayed.

4. Click OK.

The settings are transmitted to the printer and the communication is interrupted. After a moment, reload the page for Web Config.

5. Select the **Epson Open Platform** tab > **Product Key or License Key**.

When **License Information (Epson Print Admin Serverless)** is displayed under the **Epson Open Platform Settings** hierarchy, Epson Print Admin Serverless is activated.

Note

- ☐ All print jobs stored in the printer are deleted. User information and logs are retained even if Epson Print Admin Serverless is disabled. They can be deleted when the printer settings are restored to their defaults.
- ☐ For Windows, set the following on the printer driver.

Select Control Panel > Devices and Printers, right-click the printer icon, and then select Printer properties.

Select the Optional Settings tab.

Click Get in Acquire from Printer on Printer Information.

Confirm that **Epson Print Admin Serverless** is changed to **Disable**.

Solving Problems

Solving Problems

Cannot Read the Authentication Card

Check the following.

- ☐ Check if the authentication device is connected to the printer correctly.

 Make sure you connect the authentication device to the service port of the printer.
- ☐ Check that the authentication device and the authentication card are certified.

 Contact your dealer for information on supported authentication devices and cards.

Cannot Open Web Config

Check the following.

☐ Check that the IP address entered for the printer is correct.

You can check the IP address from the control panel, by running a network diagnosis, and from the status sheet. See the manual supplied with the printer for more details.

☐ Perform network diagnosis to check that the printer is connected to the network.

See the manual supplied with the printer for more details.

Cannot Activate Epson Print Admin Serverless

Make sure you entered the correct license key in Web Config or Epson Device Admin.

The Message that Indicates the License Key Has Expired Is Displayed

When the message that indicates the license key has expired is displayed during the validity period, check that the printer's date and time settings are correct.

Ask your dealer for the validity period of the license.

Epson Device Admin Report Has No Content

When there is no content in the report for Usage Per User, Usage Per Department, and Job History in Epson Device Admin, check the following.

Solving Problems

Check that you have registered the printer's administrator password in Epson Device Admin.
If you have not registered the printer's administrator password in Epson Device Admin, you cannot acquire jo histories from the printer.
See the following for the registration procedure.
"Registering the printer's administrator password in Epson Device Admin" on page 11
If you have changed the printer's administrator password, check that you have also changed the registered password by selecting Options > Password manager .
Check that the Epson Print Admin Serverless license key was recognized in Epson Device Admin.
Check the license status by the following method.
1. Run Epson Device Admin, and then select a target printer on the device list.
2. Check the text displayed in License Type of Epson Print Admin Serverless on the detailed device information pane.
If license key is not recognized despite that you set it, acquire device information by clicking All Devices or Selected Devices on ribbon menu.
If you print a job without storing it in the printer, a report for Usage Per Department is not created.

Problems with the Pull Printing Function

Cannot Set Pull Printing

Check the following items.
☐ The printer you want to register is connected to the network.
☐ The IP address or FQDN of the printer you want to register is correct.
☐ Epson Print Admin Serverless is available.
☐ The printer you want to register supports Pull Printing.
