

MPN: PE170405

## Power Cord C20 - C21 16A 0,5m

The C20 to C21 powercord is used for powering high power equipment, such as servers from the most common used brands. The C21 connector is high temperature resistant up to 155°.

- Connectors: C20 - C21 IEC60320
- The C21 connector is high temperature resistant up to 155°C
- Maximum load: 250V~/16A
- Suitable for servers, network switches; e.g. HP and Cisco

## Specifications

|                    |                         |                          |
|--------------------|-------------------------|--------------------------|
| Features           | Cable length            | 0.5 m                    |
|                    | Cable type              | H05VV-F                  |
|                    | Conductor material      | Copper                   |
|                    | Connector 1             | C21 coupler              |
|                    | Connector 1 form factor | Straight                 |
|                    | Connector 1 gender      | Female                   |
|                    | Connector 2             | C20 coupler              |
|                    | Connector 2 form factor | Straight                 |
|                    | Connector 2 gender      | Male                     |
|                    | Core size               | 1.5 mm <sup>2</sup>      |
|                    | Jacket material         | Polyvinyl chloride (PVC) |
|                    | Product colour          | Black                    |
|                    | RoHS compliance         | Yes                      |
| Packaging data     | Quantity per pack       | 1 pc(s)                  |
| Power              | Input current           | 16 A                     |
|                    | Input voltage           | 250 V                    |
|                    | Maximum current         | 16 A                     |
