Secure 3-in-1 Anti-theft Notebook Lock, Resettable 4-digit Combo, 1.8 m (6 ft.) Cut-Resistant Carbon Steel Cable, Translucent PVC Jacket, Silver

Part No.: 440301

EAN-13: 0766623440493 | UPC: 766623440493

Anti-Theft Laptop Security Cable Lock to Protect Your Device when Traveling and in Low-Supervision Areas

The Manhattan Universal 3-in-1 Laptop Combination Lock is your reliable security companion in today's world of mobile workforces and BYOD trends. It protects your expensive mobile devices and the sensitive information they contain, wherever your workday takes you. It's easy to use and carry so your laptop stays right where it needs to be.

Maximum Compatibility with One Lock for Any Slot

This versatile laptop lock is compatible with the three most common security slots: Noble Wedge, Kensington K-Slot (T-Bar), and Nano Security Slot. Its adjustable lock tip makes it the perfect fit for laptops from leading brands like HP®, Lenovo®, Asus®, Acer®, Dell®, and more - offering a future-proof solution as device security standards evolve.

Reliable Protection for More than Laptops

This lock effortlessly latches directly into the most common industry standard lock slot design, the Kensington K-Slot. In addition to being used in many notebook computers, it's also used in many monitors, projectors, desktop PCs, printers and docking stations to protect more of your equipment.

Resettable 4-digit combo lock

The combination lock means you don't have to worry about lost keys. The four-wheel design provides up to 10,000 possible combinations to help safeguard your equipment from attempted code guesses. Choose your own combination so you can remember it easily or change it often to prevent others from knowing it.

Strong, durable and cut-resistant steel cable

Set in 1.8 meters (6 ft.) of sleeved, galvanized steel, this cable lock strongly resists cutting attempts. The flexible construction bends easily to loop around a stationary post, desk, table or other attachment point. A durable PVC jacket helps protect electronics, furniture and other objects from scratches and damage.

Security first in retail, educational environments and trade show booths

Most electronics theft is a crime of opportunity, and it only takes a second to steal an untethered PC from a desk or table. Better safe than sorry in places like libraries, computer labs, government offices, universities, airports and many other public spaces.

Features:

- Anti-theft locking solution that secures your laptop or other equipment to a stationary object
- Adjustable lock tip compatible with Noble Wedge, Kensington® K-Slot (T-Bar), and Nano Security Slot
- Strong, cut-resistant steel cable and solid, all-metal construction to prevent tampering
- Keyless, resettable four-digit lock with 10,000 selectable combinations
- Future-proof 3-in-1 form factor works with laptops from major brands including HP®, Lenovo®, Asus®, Acer®, Dell®, and more
- Ball joint enables 360° rotation and 90° pivot to reduce strain on the slot
- Compatible with many devices beyond notebooks, such as projectors, monitors, printers, desktop PCs, and docking stations
- Flexible, 1.8 m (6 ft.) long cable to easily anchor your device to a stationary desk, post or other attachment point
- Durable PVC coating protects electronics, furniture and other objects

from scratches
- Maximized security for travel and in low-supervision areas like retail stores, libraries, computer labs, offices, schools or trade show booths
- Foam spacer near the lock tip prevents scuffing the laptop or device
- Fully TAA-compliant
- Lifetime warranty
