

## Elite 690 Wood

Natural Wood Front | ATX Tower Case with 270° Panoramic Glass

The Elite 690 embraces a clean, modern design, featuring **dual tempered glass panels** on the front and side to showcase premium components and RGB lighting. The front panel combines a natural **wood-textured accent** with a lower mesh intake, delivering both aesthetic warmth and effective airflow. With expansive ventilation on the top and bottom, the chassis supports versatile fan and radiator configurations to enable a powerful vertical cooling path. Whether building a high-performance showcase rig or a style-driven desktop setup, the Elite 690 delivers the perfect balance of function and form.

## KEY FEATURES

### Natural Wood Front Panel Design

Crafted from real wood, the front panel brings a warm, natural tone that blends seamlessly into living spaces, creative studios, or themed gaming rooms.

### 270° Full-View Tempered Glass with Seamless Bevel Design

Dual tempered glass panels with 45° beveled edges offer an immersive panoramic showcase of your components and lighting.

### Optimized Tower Layout with Independent PSU Chamber

A vertical structure with a dedicated lower PSU compartment separates thermal zones for cleaner cable routing and improved airflow control.

### Vertical Cooling Architecture

Supports up to 10 fans in a bottom-to-top airflow layout to accelerate heat dissipation and maintain peak thermal efficiency.

### High-Performance Radiator Support

Top radiator support up to 360mm and side radiator support up to 240mm—ideal for liquid cooling configurations.

### Pre-installed ARGB Fan Setup with Motherboard Sync Support

Includes 3 ARGB fans—2 reverse-blade side intake fans and 1 rear exhaust fan. Each fan features daisy-chain connectors for cleaner cable management and streamlined setup, and is fully compatible with major motherboard ARGB software for synchronized lighting control.

### Large Mesh Ventilation Zones

Mesh panels on the top and bottom enhance airflow and system-wide thermal dynamics.

### Support for RTX 50 Series Graphics Cards

Maximum GPU length support up to 425mm—ready for flagship next-gen graphics cards.

### Upgraded High-Speed I/O Panel

Features dual USB 3.0 Type-A ports and a USB 3.2 Gen 2x2 Type-C port with up to 20Gbps transfer speed—perfect for fast data access and modern device connectivity.
