- PID temperature control and pre-infusion
- European design with anti-fingerprint coated metal housing
- Metal conical burr grinder with 15 grind sizes

250gr bean container, 58mm stainless steel portafilter, Premium calibrated tamper

PSA3218/10R0

Highlights

250gr bean container

Dive into a world of coffee variety with the 250g bean container preserving their freshness. Elevate your coffee experience while ensuring each brew retains its rich aroma.

58mm steel portafilter

Indulge in a rich coffee and crema delivered directly to your cup through the professional-grade 58mm stainless steel portafilter and single & dual-walled filter baskets. This portafilter size allows you to create a beautiful golden-brown espresso with aromatic foamy crema while providing more consistent extraction across the coffee puck due to a wider distribution of water. Plus, it accommodates a larger dose of coffee grounds for a richer and more robust brew.

Premium calibrated tamper

Tamp your ground coffee beans effortlessly using the stainless steel calibrated tamper with a flathead, ensuring the right tamping pressure and creating a balanced, consistently leveled tamping surface. Elevate your coffee brewing experience with precision and ease.

Americano button

Immerse yourself in the essence of a true Americano with just a simple press of a button, now enhanced with the added convenience of an integrated hot water outlet.

Stainless-steel milk jug

Enjoy the ease of creating smooth microfoam perfect for latte art with our 450ml stainless-steel milk jug and powerful steam wand. Achieve that velvety texture effortlessly and savor your coffee just the way you like it.

Pressure gauge

Achieve precise water pressure thanks to the integrated pressure gauge that guides your brewing status and alerts when optimal pressure has been reached.

Countertop-safe tamp system

Elevate your coffee routine with our countertop-safe tamping system. Achieve the perfect tamp confidently and conveniently, without any risk to your countertops thanks to the integrated tamping rubber on the bottom of the portafilter.

PID temperature control

The PID temperature control system ensures the accuracy and stability of brewing temperature. The pre-infusion system helps prevent a channeling effect. Only full integration of both systems can ensure a balanced extraction.

Anti-fingerprint metal housing

Experience an elegant touch to your barista journey with our stunning European design, featuring a robust metal housing. Where style seamlessly merges with functionality, enjoy a sleek and spotless surface with our anti-fingerprint coating.

Specifications
