

VB-TVMount-01

Introduction

VB-TVMount-01 is a modular TV mount designed specifically for meeting environments, supporting flexible deployment of Yealink MeetingBar devices. Through its innovative modular design, this mount can be directly adapted to mainstream TV models, providing a stable hanging solution. With the VB-TVMount-01, the MeetingBar A50 can be installed at the bottom of the TV, or, using the included top mounting bracket, quickly reconfigured to switch to a top-mounted position, achieving the best alignment of device placement and spatial aesthetics. The bottom installation mode also supports compatibility with the Yealink MeetingBar A40. While ensuring safety, the VB-TVMount-01 provides an optimal spatial solution for video conferencing systems
