

Cyber-resilient data protection, delivered as a service

Verinext is redefining managed data protection and disaster recovery with a fully managed platform designed for today’s hybrid cloud challenges. Listening closely to customers’ needs, Verinext delivers a single, turnkey service for backup and disaster recovery—eliminating the complexity of managing multiple tools, vendors, and support models. Backed by HPE GreenLake cloud, Zerto, and Commvault, Verinext enables rapid failover, granular backup, and long-term cyber resilience—without the burden of managing infrastructure.

“Our customers want simplicity, reliability, and one trusted partner to protect their business. We deliver that with a fully managed approach that scales with their needs.”

– **Matt Bynum**, Vice President, Managed Services, Verinext

Solution: Data protection

Industry: IT services

Country: United States

Vision: Deliver a managed backup and disaster recovery service that provides end customers with cloud-like flexibility, predictable costs, and enterprise-grade resilience—without the complexity, hidden fees, or loss of control associated with public cloud platforms.

Strategy: Combine HPE GreenLake elastic infrastructure with HPE Zerto Software best-in-class RTO/RPO and Commvault’s workload-aware backup to deliver turnkey BaaS and DRaaS from two geo-diverse facilities.

Objectives

- Deliver a unified backup and disaster recovery service that meets enterprise needs
- Offer scalable, expert-managed protection with transparent, usage-based pricing
- Eliminate operational complexity for IT teams with a single, accountable provider

Requirements

- Rapid recovery of entire environments and individual files
- Support for diverse workloads, applications, and compliance requirements
- Infrastructure elasticity to scale services as customer demand grows

Solution

- HPE GreenLake infrastructure as a service
- HPE Zerto Software disaster recovery for continuous data replication and rapid failover
- Commvault core and cloud for enterprise-grade backup and cyber recovery

Outcomes

- Enables near-instant DR and granular data restoration from a single managed service
- Reduces IT burden through end-to-end monitoring, management, and support
- Ensures business continuity and data resilience with elastic, cost-effective infrastructure
- Positions Verinext and its customers for long-term success in a constantly shifting IT environment
