

Charging Trolley for 16 Laptops or Tablets (CH Version)

{error=json not allowed for this object}

The DICOTA Charging Cart combines organization, secure storage, and charging infrastructure for up to 16 laptops or tablets in one place—a reliable companion for education, healthcare, industry, and the hospitality sector. The adjustable ABS panels allow the depth to be precisely adjusted to the size of the device, ensuring that each device sits securely and without wobbling. Suitable for 11- to 16-inch devices with a height of up to 27 mm, even with a protective case if necessary. The entire power supply is mounted on a removable mounting plate, making maintenance and service particularly easy. The rugged, lightweight construction made of aluminum and Con-Pearl reliably protects the equipment, while the lockable lid prevents unauthorized access. A whisper-quiet premium fan operating at just 12.6 dB keeps the devices cool even during continuous operation without disturbing classes or the peace and quiet in patient rooms. With a narrow footprint of just 63.3 × 36.3 cm, the cart rolls through any standard door and can be parked to save space. Four high-quality swivel casters—two with brakes—and the sturdy push handle ensure effortless, safe movement between rooms. The D32188 comes equipped with a European power strip with Schuko plugs; for Switzerland, the D32188-CH variant with T13 outlets is available.

CHARACTERISTICS

- Securely stores and charges 16 devices
- Rugged lightweight aluminum construction
- Smooth mobility with lockable castors
- Push handle enables comfortable transport
- Country-specific power distribution included
