

Norton 360 Plus for Mobile

 iOS

All-in-one protection for your mobile life

Norton 360 Plus for Mobile offers AI-powered scam protection across email, texts, calls, and the web in one unified app, no need to juggle multiple solutions. Get greater control of your internet privacy with our Secure VPN and be informed of risks to your identity with Dark Web Monitoring.^{\$}

Features

Safe SMS

Powered by the Norton AI engine, it detects sophisticated scams in text messages, giving you advanced protection against scams and peace of mind when checking your messages.

Safe Call

Uses its AI engine to automatically block scam calls and label incoming calls as scam, spam, or a verified business - so you'll know when it's safe to pick up.

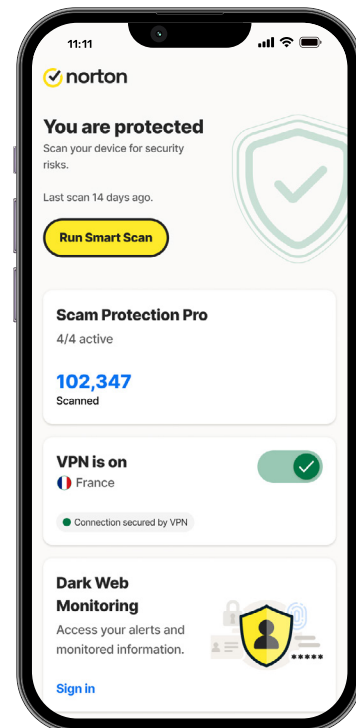

Safe Email

Utilises AI to proactively scan your inbox flagging suspicious emails so you'll know if it's potentially a scam before opening it.¹

Safe Web

Its advanced AI helps protect you from scams when shopping or browsing online by checking for scams on the pages you visit.

Screens are simulated and subject to change

Norton 360 Plus for Mobile

Features

Secure VPN

Help protect your private information with bank-grade encryption for a more secure connection, while keeping what you do online private from your internet service provider. Connect more safely and privately to your favourite websites, videos, or apps when you're at home or on the move.

Dark Web Monitoring

Continuously searches the dark web looking for more than 120 data points of personal information and notifies you if we find it linked to any of the information you've provided (phone numbers, credit card numbers, even gamer tags, etc.).⁵

Wi-Fi Security

Uses advanced scanning technology to help detect and alert you if your device is connected to a Wi-Fi network that is under attack, allowing you to join safe networks only.

Device Security

Keeping your phone and tablet up to date and secure are the first lines of defence against attacks on the personal information you have stored there. The Device security scans for outdated operating systems and missing device passcodes to help you keep your data safer if your phone or tablet is stolen.

Norton Genie AI-powered Assistant

Our built-in AI powered assistant can give you advice if you believe you are being scammed, detect deepfake videos², answer general cyber safety questions, or help you navigate the features in your plan.

Password Manager

Provides the tools you need to create, store, and manage your passwords, credit card information, and other credentials online — more securely in your very own encrypted, cloud-based vault.

App Advisor

Helps protect your Android device by scanning existing apps and new apps before you download them from Google Play Store, for online threats like malware, ransomware, adware, and privacy leaks, by using a patent-protected app-scanning technology.³

Safe Search

Provides a safety rating for websites in your search results, so you know if a site is likely to be safe before you click.³

System Requirements

- Norton 360 Plus for Mobile covers 1 mobile device.
- Android: Android 10.0 or later. Must have Google Play app installed. Multi-user mode not supported. ColorOS 7.1 or later. Must have Google Play app installed.
- iOS: iOS iPhone and iPads running the current and previous two versions of Apple iOS.

⁵ Dark Web Monitoring is not available in all countries. Monitored information varies based on country of residence or choice of plan. It defaults to monitor your email address and begins immediately. Sign in to your account to enter more information for monitoring.

¹ Safe Email allows you to connect up to five online email accounts.

² Deepfake Protection in Norton Genie AI Assistant is currently available in early access and only YouTube videos in English are supported.

³ App Advisor and Safe Search features are only available on Android devices.
