

OUTDOOR **Ground Box**

GROUNDBREAKING
POWER

#LegrandImprovingLives

 **legrand**[®]

Some of the best experiences happen outdoors.

A Friday night game under the lights. A sold-out concert where the crowd sings louder than the speakers. The Outdoor Ground Box delivers power right where it's needed, staying out of sight while staying ready for whatever the moment calls for.

Hear the music,
not the generator.

Safe, permanent
in-ground power.

Think Inside the Box

Instead of fighting to keep water out, the Outdoor Ground Box uses proven physics to keep electrical connections dry.

53 Inches of Water? No Problem — Hurricane Tested.

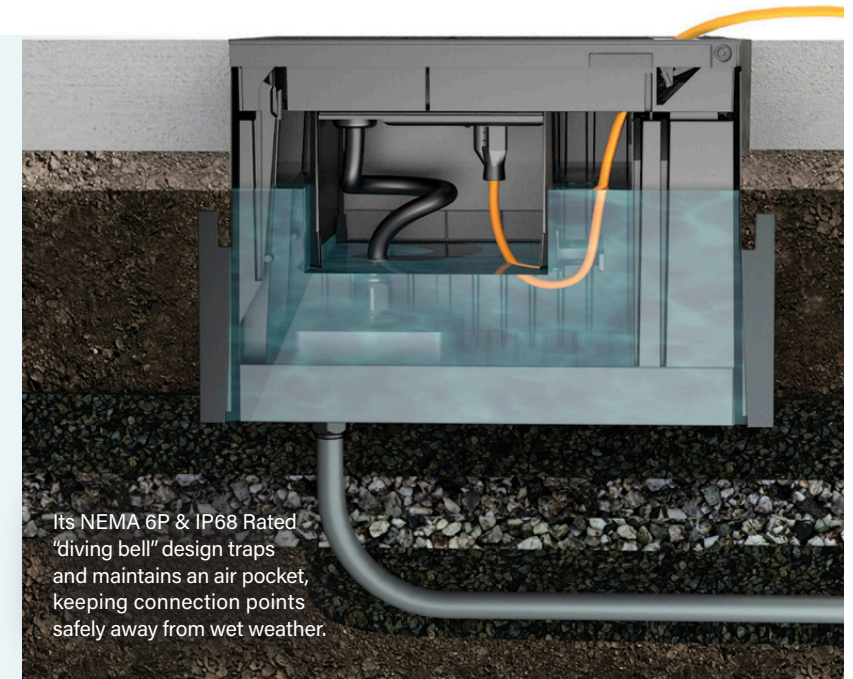

When Hurricane Harvey hit, a Texas football stadium was flooded with over 53 inches of water. But the Outdoor Ground Box still worked thanks to the diving bell design.

See it in Action

Watch how the diving bell design keeps connections dry when water gets in.

WATCH
WATER
DEMO

Its NEMA 6P & IP68 Rated "diving bell" design traps and maintains an air pocket, keeping connection points safely away from wet weather.

Safe in All Seasons

First of its kind.

First UL Listed while-in-use Ground Box on the market.

Diving Bell Air Pocket Design.

At the heart of the design is a diving bell air pocket that protects connections and devices from water, snow and ice.

Anti-Float Clips.

Even under prolonged water exposure and submersion, the box stays closed and the air pocket protected with anti-float clips that keep the cover securely in place.

Smart Egress Door.

Plug in. Close the cover. The smart egress door automatically adjusts to the cable size, maintaining a tight, reliable opening that locks in the closed position to prevent cable damage.

Build Your Box

The Outdoor Ground Box comes in three finishes to complement any outdoor space. It's available in a host of configurations to suit your needs.

GRAY

BLACK

BROWN

A modular, interlocking design allows ganging for specific connectivity needs.

Features include a lockable security cover to prevent unauthorized access.

Units mount flush to any surface and feature a smart egress door that adjusts to exiting cables.

OUTDOOR RATED CONSTRUCTION

- UV and chemical-resistant F1 rated nonmetallic material for long-lasting performance.

TESTED AND TRUSTED

- cULus Listed to UL50E Type 6P and IP68 requirements while in use
- UL2996
- ULC/ORD-C2996:2017
- ANSI/SCTE77 Tier 5 Rating

CHOOSE YOUR POWER OPTION

- 2-gang 20 amp duplex receptacles
- Single amp Turnlok® locking receptacle L6-30R (250V)
- Single 30 amp Turnlok locking receptacle L5-30R (125V)
- 2-gang low voltage box for communication and A/V

2-gang, 20 amp duplex receptacles

30 amp, 250V Turnlok® locking receptacle L6-30R

2-gang low voltage box (shown with communications options)

2-gang low voltage box (shown with audio/video devices)
