

Statement of Volatility – Alienware 32 240Hz Gaming Monitor - AW3226DM

The Alienware AW3226DM contains both volatile and non-volatile components. Volatile components erase their data immediately after power is removed from the component. Non-volatile components retain their data even after power is removed from the component. The following non-volatile components are present on the Alienware AW3226DM system board.

Table 1. List of non-volatile components on system board

Description	Reference Designator	Volatility Description	User Accessible for external data	Remedial Action (action necessary to erase data)
System EEPROM	U4002	Non-volatile memory, 256 KB for storage of system setting (OSD)	No	Not applicable
System Flash	U4001	Non-volatile memory, 32 MB for storage of system firmware	No	Not applicable
USB HUB Flash	U7403	Non-volatile memory, 2 MB for storage of USB HUB firmware	No	Not applicable
