CAT5e Network Cable Splitter (Y-adapter)

The MicroConnect MPK418 Cable Splitter, also known as a Y-adapter, is a versatile accessory designed to expand the connectivity options of your existing cables. This splitter allows you to connect two devices to a single port, effectively doubling its output. Ideal for various applications, including audio, video, or data transfer, this Y-adapter provides a reliable and efficient solution for managing multiple connections. With MicroConnect's commitment to quality, you can trust that this cable splitter delivers optimal signal transmission and durability. Backed by our 20+ years of expertise, this cable splitter offers a practical and cost-effective way to enhance your connectivity setup. This is an ideal addition to existing network cables to increase flexibility.
