

Overview

HP 3PAR Software Products

HP 3PAR Software offerings include both the operating system and additional software products that run on the HP 3PAR Storage System and on Microsoft Windows®, Linux, or UNIX® hosts.

HP 3PAR Operating System Software

The HP 3PAR Operating System Software (HP 3PAR OS) comes installed on the HP 3PAR Storage System. The HP 3PAR OS includes a collection of advanced internal virtualization capabilities to increase storage efficiency and reduce administration time.

Additional HP 3PAR Software

Additional HP 3PAR Software Additional software products available for HP 3PAR Storage Systems offer enhanced capabilities including thin storage technologies, secure partitioning for virtual private arrays, and virtual and remote copy capabilities.

HP 3PAR Host Software

Host-based software products from HP 3PAR enable the next-generation HP 3PAR platform to address the needs of specific application environments, multipathing, and historical performance and capacity management.

HP 3PAR StoreServ Software Suites

HP 3PAR StoreServ 7000, 7450 and 10000 Storage also provide the opportunity to purchase software bundled into a series of suites designed to be affordable and simple to purchase. Select software titles can also be purchased separately, as indicated below.

What's New

- HP 3PAR Thin Deduplication and HP 3PAR Thin Clones on all HP 3PAR StoreServ family
- HP 3PAR Adaptive Flash Cache for HP 3PAR 7200/7400/10400/10800
- HP 3PAR Peer Persistence support extended to Microsoft Windows Servers and Microsoft Windows Hyper-V.

Product Specifications - HP 3PAR OS Host Software

HP 3PAR Operating System Software

(also available as HP 3PAR Operating System Suite on HP 3PAR StoreServ 7000 and 10000 Storage)

Overview

The software foundation of 3PAR® Utility Storage is the HP 3PAR Operating System, which utilizes advanced internal virtualization capabilities to increase administrative efficiency, system utilization, and storage performance.

The HP 3PAR OS includes the following functionality and features:

- HP 3PAR Persistent Ports
- HP 3PAR Web Services API
- HP 3PAR OS Administration Tools
- HP 3PAR Rapid Provisioning
- HP 3PAR Autonomic Groups
- HP 3PAR Scheduler
- HP 3PAR Persistent Cache
- HP 3PAR RAID MP (Multi-Parity)
- HP 3PAR Full Copy
- HP 3PAR Access Guard
- HP 3PAR Thin Copy Reclamation
- HP 3PAR LDAP Support
- HP 3PAR Adaptive Flash Cache

Product Highlights

HP 3PAR Access Guard

Access Guard is an HP 3PAR OS feature that delivers user-configurable volume security at logical and physical levels by enabling you to secure hosts and ports to specific virtual volumes.

HP 3PAR Autonomic Groups

HP 3PAR Autonomic Groups is an HP 3PAR OS software feature that brings a new provisioning paradigm to clustered and virtual server environments by building on the same innovation featured by HP 3PAR Rapid Provisioning.

Autonomic Groups is designed to reduce room for human error by eliminating manual repetition of tedious commands, thereby making the provisioning process more reliable. This software feature also simplifies reporting by enabling users to pull boot and data disk utilization statistics from different clusters with just a single command.

In addition, when used together with HP 3PAR Virtual Domains, Autonomic Groups allows multiple independent virtual domains to be grouped as a single logical entity to simplify storage administration while maintaining the integrity of individual virtual domains. For example, backing up an autonomic domain group actually backs up all virtual domains in the group to a single backup server while still maintaining the security and isolation associated with each individual domain.

HP 3PAR Full Copy

Full Copy is an HP 3PAR OS feature that allows you to create point-in-time clones with independent service level parameters. Full Copy offers online operations so that the destination clone can be immediately exported, rapid resynchronizations and thin provisioning-awareness.

HP 3PAR Persistent Ports

HP 3PAR Persistent Ports is a Tier 1 resiliency feature that allows for non-disruptive online software upgrades on HP 3PAR StoreServ Storage systems without relying on multipathing software. This feature, available on all HP 3PAR StoreServ models, brings increased Tier 1 resiliency, across the StoreServ product line including the midrange platform by ensuring that host paths remain online throughout the software upgrade process. The use of standard NPIV (N_Port ID Virtualization) technology as defined by the Technical Committee T11 in the Fibre Channel -Link Services (FC-LS)

Product Specifications - HP 3PAR OS Host Software

specification enables a single host-facing StoreServ port to assume the identity of additional pre-designated partner ports, thus enabling transparent switchover of host path connections. Persistent Port Technology is also designed to work with iSCSI and FCoE connectivity.

Starting from HP 3PAR OS 3.1.3 Persistent Ports also autonomically fails over a front-end controller node port that experiences physical connection loss from a cable pull or a failed switch; this unique capability, for now is available for FC connectivity only.

HP 3PAR Autonomic Rebalance

HP 3PAR Autonomic Rebalance provides the ability to analyze how volumes on the HP 3PAR Storage System are using physical disk space and makes intelligent, autonomic adjustments to ensure optimal volume distribution when new hardware is added to the system. The best practice is to run the Autonomic Rebalance (Also known as tunesys) after new hardware is added to the system.

HP 3PAR Web Services API

HP 3PAR Web Services API delivers a programming interface for implementing durable automation of storage management tasks with HP 3PAR StoreServ Storage systems. Web Services API provides a well-defined application programming interface that customers can use for incorporating the storage infrastructure into their platform for end-to-end automation of their service delivery and management. The Web Services API implementation is based on RESTful Web API service using HTTPS, principles of REST, and data structures represented with JSON (JavaScript Object Notation). The server recognizes HTTP versions 1.0 and 1.1.

HP 3PAR OS Administration Tools

The HP 3PAR Operating System offers industry-leading ease of use through a simple, unified InForm Management Console and an extremely powerful, scriptable InForm Command Line Interface (CLI). Manage your entire utility storage deployment from a single window, including remote replication to disaster recovery sites. The latest version of the InForm Management Console is fully integrated with signature HP 3PAR applications such as HP 3PAR Thin Provisioning, Virtual Copy, Dynamic Optimization, Virtual Domains, and Remote Copy—so everything you need to optimize your storage environment is right at your fingertips. The 3PAR Remote CLI gives you powerful customization capabilities that are simple to configure, eliminating the need for extra tools and consulting. Open administration support is provided via SNMP and the Storage Management Initiative Specification (SMI-S).

HP 3PAR LDAP

Support Native support for lightweight directory access protocol (LDAP) within the HP 3PAR OS delivers centralized user authentication and authorization using a standard protocol for managing access to IT resources. With support for LDAP, you can now integrate HP 3PAR Utility StoreServ Storage with standard, open enterprise directory services. The result is simplified security administration with centralized access control and identity management.

HP 3PAR Persistent Cache

HP 3PAR Persistent Cache is a resiliency feature built into the HP 3PAR OS that allows "always on" application and virtual server environments to gracefully handle an unplanned controller failure.

Product Specifications - HP 3PAR OS Host Software

Persistent Cache eliminates the substantial performance penalties associated with traditional arrays and "write-through" mode so that 3PAR StoreServ Storage Servers can maintain required service levels even in the event of a cache or controller node failure. HP 3PAR Persistent Cache leverages the clustered HP 3PAR Architecture with its unique Mesh-Active design to preserve write-caching by rapidly re-mirroring cache to the other nodes in the cluster in the event of a failure. Persistent Cache is supported on all quad-node and larger HP 3PAR arrays, including StoreServ 7400 and the InServ F400—making 3PAR HP the only vendor to incorporate this industry-leading service level protection capability into midrange as well as high-end arrays.

HP 3PAR RAID MP (Multi-Parity)

HP 3PAR RAID MP (Multi-Parity) introduces Fast RAID 6 technology backed by the accelerated performance and Rapid RAID Rebuild capabilities of the 3PAR ASIC. 3PAR RAID MP is supported on all HP 3PAR StoreServ models and delivers extra RAID protection that prevents data loss as a result of double disk failures. RAID MP delivers this enhanced protection while maintaining performance levels within 15% of RAID 10 and with capacity overheads comparable to popular RAID 5 modes. For this reason, 3PAR RAID MP is ideal for large disk drive configurations—for example, Serial ATA (SATA) drives above 1 TB in capacity.

HP 3PAR Rapid Provisioning

The HP 3PAR OS eliminates array planning by delivering instant, application-tailored provisioning through the fine-grained virtualization of lower-level components. Provisioning is managed intelligently and autonomically. Massively parallel and fine-grained striping of data across internal resources assures high and predictable service levels for all workload types. Service conditions remain high and predictable as the use of the system grows or in the event of a component failure while traditional storage planning, change management, and array-specific professional services are eliminated.

HP 3PAR Scheduler

HP 3PAR Scheduler also helps automate storage management, reduce administration time, and decrease the chance of administrative error. Scheduler does this by giving users full control over creation and deletion of virtual copy snapshots—a process that is now completely automated with HP 3PAR Utility StoreServ Storage. When used in conjunction with Autonomic Groups, HP 3PAR Scheduler automates virtual copy snapshots across multiple boot and data volumes with full write consistency across all these different volumes.

HP 3PAR Thin Copy Reclamation

An industry first, Thin Copy Reclamation keeps your storage as lean and efficient as possible by reclaiming unused space resulting from deleted virtual copy snapshots and remote copy volumes. Thin Copy Reclamation is built on a virtualization mapping engine for space reclamation called HP 3PAR Thin Engine, which is included as part of the HP 3PAR OS.

HP 3PAR Adaptive Flash Cache

Product Specifications - HP 3PAR OS Host Software

Adaptive Flash Cache provides read cache extension by leveraging HP 3PAR first in class virtualization technologies. This functionality allows dedicating a portion of SSDs capacity as an augmentation of the HP 3PAR Array primary cache, reducing application response time for read-intensive I/O workloads. It also improves performance when periodically reading data from a slower tier of HDDs.

Additional 3PAR Software

HP 3PAR OS Additional Software includes the following:

- Thin Suite *
- Virtual Copy
- Remote Copy
- Peer Persistence
- Adaptive Optimization
- Dynamic Optimization
- Priority Optimization
- System Tuner
- Virtual Domains
- Virtual Lock
- Peer Motion
- Online Import
- System Reporter

*These titles are available as part of the HP 3PAR OS Suite on HP 3PAR StoreServ 7000 and 10000 Storage

HP 3PAR Thin Suite

Overview

HP 3PAR Thin Suite is the most comprehensive thin software suite available. With the Thin Suite, virtual and cloud data centers can:

- **Start Thin:** HP 3PAR Thin Provisioning is the most comprehensive thin provisioning software solution available. Since its introduction in 2002, 3PAR Thin Provisioning has become widely considered the gold standard in thin provisioning. It leverages HP 3PAR's dedicate-on-write capabilities to make organizations more efficient and more green, allowing them to purchase only the disk capacity they actually need and only as they actually need it.
- **Get Thin:** With HP 3PAR Thin Conversion, a technology refresh no longer requires a terabyte-for-terabyte replacement, but instead offers the opportunity to eliminate up to 75% of your legacy capacity, simply and rapidly. This savings alone can save up to 60% on the cost of a technology refresh. HP 3PAR Thin Conversion software makes this possible by leveraging the zero-detection capabilities within the HP 3PAR ASIC and Thin Engine - HP 3PAR's unique virtualization mapping engine for space reclamation - to power the simple and rapid conversion of inefficient, "fat" volumes on legacy arrays to more efficient, higher-utilization "thin" volumes on any HP 3PAR Storage System featuring Thin Built In™.
- **Stay Thin:** With 3PAR Thin Persistence, customers can now leverage next-generation space reclamation technology to minimize storage TCO and maintain environmental responsibility targets they have worked so hard to achieve.

Product Specifications - HP 3PAR OS Host Software

The Thin Suite includes the following software:

- Thin Provisioning
- Thin Conversion
- Thin Persistence
- Thin Copy Reclamation
- Thin Deduplication
- Thin Clones

The Thin Suite is offered on all HP 3PAR Storage Systems.

HP 3PAR Thin Provisioning Software

Overview

Start Thin. HP 3PAR Thin Provisioning is the most comprehensive thin provisioning software solution available. Since its introduction in 2002, HP 3PAR Thin Provisioning has become widely considered the gold standard in thin provisioning. It leverages HP 3PAR's dedicate-on-write capabilities to make organizations more efficient and more green, allowing them to purchase only the disk capacity they actually need and only as they actually need it.

With Thin Provisioning, there is no more up-front capacity allocation. No more dedicating resources for each application. No more paying to house, power, and cool disks that might not be needed for months or years to come, or may never be needed at all.

| | | |
|---------------|---|--------|
| Models | HP 3PAR Thin Provisioning 1TB LTU | TE082B |
| | NOTE: Insert AE at the end of a part number for an electronic LTU (eg. XXXXBAE). E-Delivery should be ordered with any Standalone or Upgrade software order. | |

Product Highlights

- HP 3PAR Thin Provisioning is completely automated
- HP 3PAR uses a reservationless, dedicate-on-write approach to thin provisioning that draws and configures capacity in fine-grained increments from a single free space reservoir without pre-dedication of any kind.
- HP 3PAR Thin Provisioning uses an allocation unit size of just 16 KB, so you don't have to worry about small writes consuming megabytes or even gigabytes of capacity.
- HP 3PAR is the only vendor to feature the clustered HP 3PAR Architecture, which uniquely supports thin provisioning by providing massive scalability within a single system so additional capacity can be easily added to fulfill earlier over allocations.
- HP PAR is the only vendor with arrays built from the ground up to support thin provisioning by eliminating the diminished performance and functional limitations that plague bolt-on thin solutions.

HP 3PAR Thin Conversion Software

Overview

With HP 3PAR Thin Conversion, a technology refresh no longer requires a terabyte-for-terabyte replacement, but instead offers the opportunity to eliminate up to 75% of your legacy capacity, simply and rapidly. This savings alone can save you up to 60% on the cost of a technology refresh.

With HP 3PAR Thin Conversion, you can quickly shrink your storage footprint, reduce storage TCO, and

Product Specifications - HP 3PAR OS Host Software

meet your Green IT targets. HP 3PAR Thin Conversion software makes this possible by leveraging the zero-detection capabilities within the 3PAR ASIC and Thin Engine- HP 3PAR's unique virtualization mapping engine for space reclamation-to power the simple and rapid conversion of inefficient, "fat" volumes on legacy arrays to more efficient, higher-utilization "thin" volumes on any InServ Storage Server featuring Thin Built In™. Getting thin has never been so easy.

The zero-detection capability built into the HP 3PAR ASIC combined with Thin Conversion software can effectively and rapidly "thin" a heterogeneous datacenter to one-quarter of its original size-or less- while preserving service levels and without impacting production workloads. This means that now a technology is not only more affordable, but it reduces up-front capital costs as well as ongoing operational and environmental costs associated with powering, cooling, and housing your storage-and without requiring special host software or professional services.

Models HP 3PAR Thin Conversion 1TB LTU TE248B
NOTE: Insert AE at the end of a part number for an electronic LTU (eg. XXXXBAE). E-Delivery should be ordered with any Standalone or Upgrade software order.

- Product Highlights**
- Immediately eliminating storage capacity inefficiencies and permanently reducing disk expenditures
 - Reducing SAN ports and storage software fees (physical TB licensing)
 - Reducing power, cooling, and floor space costs by eliminating unnecessary drives in the conversion from fat to thin volumes
 - Avoiding complex services often required for fat-to-thin volume conversion
 - Reducing related storage, system, and DB administrator workloads
 - Permitting more application deployments more affordably
 - Delivering quicker payback by dramatically compressing the volume migration timeline from months to hours

HP 3PAR Thin Persistence Software

Overview With the introduction of HP 3PAR Thin Provisioning software in 2002, 3PAR revolutionized data storage by giving customers the ability to meet Green IT goals, reduce capacity purchases, decrease administration time, and address the significant problem of allocated but unused capacity head-on. With HP 3PAR Thin Persistence, HP 3PAR StoreServ Storage customers can now leverage next generation space reclamation technology to minimize storage TCO and maintain environmental responsibility targets they have worked so hard to achieve.

Models HP 3PAR Thin Persistence 1TB LTU TE249B
NOTE: Insert AE at the end of a part number for an electronic LTU (eg. XXXXBAE). E-Delivery should be ordered with any Standalone or Upgrade software order.

- Product Highlights**
- Eliminating storage capacity inefficiencies resulting from deleted files, when combined with Operating Systems that supports UNMAP (requires also Thin Conversion license).
 - Deferring disk expenditures necessary to accommodate new data growth
 - Reducing SAN ports and storage software fees (physical TB licensing)
 - Reducing power, cooling, and floor space costs by eliminating unnecessary capacity
 - Providing a simple, quick, and efficient mechanism for "thinning" volumes
 - Permitting more application deployments and data growth with fewer capacity assets
 - Speeding reclamation of space in minutes versus days or weeks

Product Specifications - HP 3PAR OS Host Software

HP 3PAR Thin Deduplication Software

Overview

HP 3PAR StoreServ Storage systems employ purpose-built HP 3PAR ASICs at the heart of each controller node that feature efficient, silicon-based mechanisms to drive inline deduplication. This unique implementation relies on built-in hardware capability to assign a unique hash to any incoming write request and leverages the HP 3PAR Thin Provisioning metadata lookup table for fast hash comparisons.

When new I/O requests come in, the signatures of the incoming data are compared to the signatures of the data already stored in the array. When a match is found, the software flags the data for deduplication. The software also leverages the controller node ASICs to perform a bit-to-bit comparison that eliminates the possibility of hash collision. The CPU-intensive job of calculating signatures of incoming data and read verify is offloaded to the hardware assist engines, freeing up processor cycles to deliver advanced data services and service IO requests. This inline deduplication process carries multiple benefits, including increasing capacity efficiency, protecting flash performance, and extending flash media lifespan. Other storage architectures lack the processing power to simultaneously drive inline deduplication and the high performance levels demanded by flash-based media while also offering advanced data services (replication, QoS, federation)

Models

HP 3PAR StoreServ 7200/7400/7450/10400/10800

HP 3PAR Thin Clones Software

Overview

HP 3PAR Thin Clones software acts as an extension of Thin Deduplication on HP 3PAR StoreServ 7450 for server virtualization environments, providing host-assisted deduplication that produces non-duplicative VM clones for Microsoft Hyper-V and VMware ESXi. These VM clones are created instantly by leveraging copy offload for VMware VAAI (vStorage APIs for Array Integration) and Hyper ODX (Offloaded Data Transfer) without increasing capacity consumption on the HP 3PAR StoreServ Storage system. Thin Clones software leverages Thin Deduplication technology to update the metadata table without copying data and then relies on its deduplication engine to reduce capacity footprint as new write request come in.

Models

HP 3PAR StoreServ 7200/7400/7450/10400/10800

HP 3PAR Virtual Copy Software

Overview

Built on thin copy technology, HP 3PAR Virtual Copy is a reservationless, non-duplicative, copy-on-write software product that allows you to protect and share data from any application, affordably. Snapshots are available on demand, instantly, in read-only and/or read-write form. With Virtual Copy, snapshots are reservationless because capacity is never reserved up-front and non-duplicative since changed data is never duplicated within the snapshot tree.

Coupled with consistency groups and support for hundreds of snapshots per base volume, Virtual Copy efficiency delivers affordable, CDP-like rapid application recovery from multiple points in time. With a single command, you can revert a base volume to any selected snapshot-without impacting other snapshots in the tree. And when you delete a snapshot, this never affects peer snapshots.

Virtual Copy also integrates with HP 3PAR Autonomic Groups and HP 3PAR Scheduler-both features which are built into the HP 3PAR Operating System-to automate the creation and deletion of virtual copy snapshots while giving users fine-grained control over the process. When used in conjunction with Autonomic Groups, Scheduler automates the creation of virtual copy snapshots across multiple

Product Specifications - HP 3PAR OS Host Software

boot and data volumes with full write consistency across all these different volumes. In combining these software capabilities, storage management is automated to reduce administration time and decrease the chance of human error.

Product Highlights

- Snapshots available instantly, in read-only and/or read-write form.
- Developer-controlled mySnapshot functionality securely replaces/refreshes selected snapshots to speed development without burdening storage administrators.
- Support for consistency groups assures data integrity across volumes.
- Reservationless snapshots. Fine-grained capacity consumed only for changed data.

Product Specifications - HP 3PAR OS Host Software

- Thin copy-on-writes. Changed data is never duplicated within a snapshot tree.
- Snapshots of snapshots for fast, flexible sharing of data sets without the need for additional base volumes.
- Revert to any snapshot with a single command, at any time.
- 256 read/write and 500 read-only snapshots per virtual volume. Affordable CDP-like rapid application recovery from multiple points in time.
- Thin copy-on-write technology and massive parallelism mean little to no performance impact.
- Freely delete snapshots without affecting peer snapshots.

HP 3PAR Remote Copy Software

Overview

HP 3PAR Remote Copy is a unique replication technology that allows you to protect and share data from any application more simply, efficiently, and affordably. Remote Copy dramatically reduces the cost of remote data replication and DR on several fronts by leveraging HP 3PAR's unique thin copy technologies, enabling the use of both mid-range and high-end arrays, and eliminating the need for professional services. In addition, HP 3PAR is the first storage vendor to offer autonomic DR configuration that enables you to set up and test your entire DR deployment—including multi-site replication using both mid-range and high-end arrays—in just minutes, from a single window.

Product Highlights

- **Autonomic Configuration:** With the HP 3PAR[®] Management Console, even multi-site DR can be set up and tested in just minutes, and from a single window. Built-in, autonomic configuration capabilities unique to 3PAR Remote Copy enable DR to automatically and intelligently configure itself. With just a few clicks, you can set up and test remote replication with HP 3PAR StoreServ, or a combination of arrays at multiple sites.
- **Multi-Protocol Support:** With Native IP as well as Fibre Channel (FC) support, 3PAR Remote Copy delivers out-of-the-box connectivity over your IP network, enabling you to replicate data more cost-effectively by leveraging your existing infrastructure. Achieve robust DR without the expensive converters and management of a separate, special-purpose infrastructure.
- **Host-Independent Replication:** HP 3PAR Remote Copy is a host-independent, array-based data mirroring solution that boosts performance by offloading host servers of replication tasks. HP 3PAR Virtual Volumes (VVs) are mirrored from one HP 3PAR array to another over variable distances using the mode of operation that best fits your needs.
- **Flexible, Modular Architecture:** HP 3PAR Remote Copy is supported on all StoreServ arrays (both high-end and mid-range), all of which are scalable to meet your precise requirements. This flexibility gives you the ability to implement right-sized systems that meet the unique needs of each location. No more purchasing and managing high-end arrays even in DR configurations where smaller mid-range arrays could suffice. HP 3PAR Remote Copy also allows you to configure remote mirrors with different RAID properties from their source volumes so you can more precisely tailor protection levels and cost.
- **Balanced Performance:** HP 3PAR Remote Copy's line-trunking capability simplifies data transmission by making the most efficient use of all configured network links. Data transfers are autonomically balanced across all links, thus avoiding bottlenecks. Line-trunking also increases availability by automatically rebalancing the load in case of a link failure.
- **Long Distance Replication with Zero Data Loss:** HP 3PAR Remote Copy offers a unique Synchronous Long Distance mode that allows you to meet low RTOs and zero-data loss RPOs with complete distance flexibility while saving on hardware
- **Thin Provisioning Awareness:** HP 3PAR Remote Copy is "thin provisioning-aware", so target volumes provide the same cost and ease-of-use benefits as thin source volumes. With the combination of HP 3PAR Thin Provisioning and HP 3PAR Remote Copy, both primary and remote sites can share in the benefits of allocating volumes just once while consuming only necessary physical capacity. The result is unprecedented efficiency in data replication.

HP 3PAR Peer Persistence

Product Specifications - HP 3PAR OS Host Software

Overview

HP 3PAR Peer Persistence software allows companies to federate their 3PAR StoreServ Storage systems across geographically separated data centers. This inter-site federation of storage allows customers to use their data centers more effectively by allowing them to move applications from one site to another as per their business need, and more importantly, without any application downtime. Peer Persistence leverages the robust high availability solutions already available on HP 3PAR StoreServ systems, and extends it even further by enabling a peer relationship between two 3PAR StoreServ Storage systems located at geographically separated sites. Peer Persistence enables failover/failback between two sites/data centers to be transparent to hosts and without any disruption to applications running on them. Peer Persistence is deployed with Remote Copy without the need for any additional hardware or appliance

HP 3PAR Adaptive Optimization

Overview

HP 3PAR Adaptive Optimization Software gives enterprise and cloud datacenters the ability to optimize service levels autonomically, on a large scale, and for a lower total cost than any other solution available today.

Adaptive Optimization takes a fine-grained approach to autonomic storage tiering that optimizes service levels by pairing data at the sub-volume level with the most cost-efficient resource capable of meeting its particular service level requirement. Policy-driven, granular data movement takes place autonomically, on an ongoing basis—so the right Quality of Service (QoS) is delivered to the right data at the right time, at all times.

Adaptive Optimization is also included in the Optimization Suite on HP 3PAR StoreServ 10000 Storage Systems and in the Data Optimization Software Suite v2 on HP 3PAR StoreServ 7000 and 7450 Storage.

Product Highlights

- **Reduce Cost by:**

Product Specifications - HP 3PAR OS Host Software

- Delivering sub-volume level, bi-directional data optimization.
- Enabling broad deployments with application-specific controls.
- **Gain Agility by:**
 - Offering application prioritization modes with QoS gradients.
 - Autonomically delivering policy-driven data optimization.
- **Minimize Risk by:**
 - Leveraging a proven, fine-grained data movement engine.
 - Controlling data movement timing.

HP 3PAR Dynamic Optimization

Overview

HP 3PAR Dynamic Optimization is an autonomic storage tiering tool that give your organization the ability to react quickly to changing application and infrastructure requirements. Used together, these unique 3PAR utilities alleviate the problem of costly and time-consuming quality of service (QoS) level optimization—even in the largest and most demanding environments.

Dynamic Optimization is also included in the Optimization Suite on HP 3PAR StoreServ 10000 Storage Systems and in the Data Optimization Software Suite v2 on HP 3PAR StoreServ 7000 and 7450 Storage.

Product Highlights

Dynamic Optimization:

- Autonomically applies the right storage resources to the right volume at the right time without scheduling, planning, or impacting application performance.
- Eliminates the cost of over-provisioning to accommodate usage spikes and manual migration of data to lower-cost storage resources.
- Enables service level change orders on demand.
- Aligns appropriate storage resources as needed with the changing value of data.
- Autonomically, intelligently and non-disruptively rebalances entire system with a single button.
- Allows for large-scale performance optimizations after adding new resources to the system or moving a large number of volumes between tiers.

HP 3PAR System Tuner

Overview

Because maintaining good balance is critical to high and predictable performance levels, the HP 3PAR Operating System autonomically distributes volumes widely and evenly across all available StoreServ Storage Systems. 3PAR System Tuner builds on this already well-balanced system to ensure optimal performance over time—even as your system grows and you bring new applications online.

With System Tuner, your StoreServ arrays remain at their peak performance, no matter what. System Tuner autonomically detects and eliminates hotspots and bottlenecks without disruption to applications, impact to service levels, and changes to pre-existing service level characteristics such as RAID type. Your storage performance remains optimized over time, and you don't even have to think about it.

System Tuner is included in the Optimization Suite on HP 3PAR StoreServ 10000 Storage Systems and in the new HP 3PAR OS Suite. It is offered as a standalone software feature on HP 3PAR T and F-Class Storage Systems.

HP 3PAR Virtual Domains

Overview

HP 3PAR Virtual Domains is virtual machine software that delivers secure access and robust storage services for different applications and user groups, also known as virtual private arrays. By providing secure, administrative segregation of users and hosts within a consolidated, massively parallel HP 3PAR StoreServ, Virtual Domains allows individual user groups and applications to affordably achieve greater storage service levels (performance, availability, and functionality) than previously possible.

HP 3PAR Virtual Domains is ideal for enterprises or service providers looking to leverage the benefits of consolidation and deploy a purpose-built infrastructure for their private or public cloud.

Product Highlights

- Provides secure, isolated storage (virtual private arrays) to multiple applications, departments, and customers
- Delivers the robust service levels available from a wide-striped, massively parallel array without sacrificing security
- Retains the economic benefits of a virtualized storage infrastructure and storage consolidation
- Enables users or departments to securely and independently administer their own individual virtual private arrays
- Integrates fully with all HP 3PAR OS software products and features including 3PAR Remote Copy, System Reporter, LDAP support, and Autonomic Groups

HP 3PAR Virtual Lock Software

Overview

The need for secure data retention is a fact of doing business in the information age. HP 3PAR Virtual Lock gives you an efficient and cost-effective way to comply with internal governance and provides a foundation for performing electronic discovery (eDiscovery).

HP 3PAR Virtual Lock prevents deletion of virtual volumes (including thin volumes created with HP 3PAR Thin Provisioning software) and volume copies (such as those created with HP 3PAR Virtual Copy or HP 3PAR Full Copy software) for a specified period of time. Applying a user-configurable retention period, Virtual Lock secures volumes and copies so they cannot be deleted, even by a HP 3PAR Store Serv user with the highest level privileges.

When coupled with reservationless, non-duplicative, read-only virtual copies (snapshots), Virtual Lock enables you to retain frozen, point-in-time copies of your data to assist internal data retention and simplify compliance with internal governance procedures.

HP 3PAR Peer Motion

Overview

HP 3PAR Peer Motion Software is the first non-disruptive, do-it-yourself data migration tool for enterprise Storage Area Networks. With Peer Motion, HP 3PAR StoreServ Storage System customers can load balance I/O workloads across systems at will, perform technology refresh seamlessly, cost-optimize asset lifecycle management, and lower technology refresh capital expenditure. Unlike traditional block migration approaches, Peer Motion enables customers to migrate storage volumes between any HP 3PAR StoreServ Storage Systems online, non-disruptively, and without complex planning or dependency on extra tools. Peer Motion leverages HP 3PAR Thin Built In™ technology to power the simple and rapid conversion of inefficient, "fat" volumes on source arrays to more efficient, higher-utilization "thin" volumes on the destination HP 3PAR StoreServ Storage System. To ensure a simple and fool-proof data migration and data mobility for workload balancing experience,

Product Specifications - HP 3PAR OS Host Software

orchestration of all stages of data mobility is available via either 3PAR Management Console or 3PAR Peer Motion CLI, which is an easy to use, scriptable command line interface tool.

HP 3PAR Online Import Software

Overview

HP 3PAR Online Import Software is the first do-it-yourself data migration tool for enterprise Storage Area Networks. Unlike traditional block migration approaches, Online Import Software enables customers to migrate storage volumes from either HP EVA Storage, EMC CX4 or EMC VNX Storage to HP 3PAR StoreServ Storage systems online and without complex planning or dependency on extra tools.

HP 3PAR Priority Optimization

Overview

HP 3PAR Priority Optimization Software enables service levels for applications and workloads as business requirements dictate. HP 3PAR Priority Optimization enables customer to provision storage performance as they can provision storage capacity; this allows them to create SLAs to protect mission critical applications in enterprise environments by assigning a minimum goal for I/O per second, bandwidth and latency so performance for that specific tenant or application is assured. Or assign performance max limits on workloads with lower service level requirements. Provide high priority applications with all the resources they need to meet service levels. Enable certainty and predictability for all applications and tenants. Configure service level objectives-I/O per Seconds limit and I/O Bandwidth limit, on a Virtual Volume Set (VVset) or between different Virtual Domains. A Virtual Volume Set may contain a single volume or multiple volumes. A Virtual Volume may also belong to multiple Virtual Volume Sets allowing user to create hierarchical rules. All host I/O on the VVset is monitored and measured against the Service Level objective. HP 3PAR Priority Optimization control is implemented within the HP 3PAR StoreServ Storage System and can be modified in real time. No host agents are required. Further, no physical partitioning of resources within the storage array is required.

HP 3PAR Host Software

Overview

The following host-based software products from HP 3PAR® address the needs of specific application environments through solutions like application-aware backup and recovery capabilities, plug-ins for virtualization management, multipathing and historical performance and capacity management.

HP 3PAR Recovery Manager for VMware vSphere: 3PAR Recovery Manager for VMware vSphere allows VMware administrators to create hundreds of VM-aware snapshots and initiate rapid online recovery directly from within the VMware vCenter™ Server virtualization management console.

HP 3PAR Recovery Manager for Microsoft Exchange: 3PAR Recovery Manager for Exchange is an extension to 3PAR Virtual Copy that intelligently creates and manages snapshots that can be used to quickly restore Exchange instances or databases (or non-disruptively back them up to tape) for near-continuous data protection.

HP 3PAR Recovery Manager for Oracle: 3PAR Recovery Manager for Oracle is an extension to 3PAR Virtual Copy that intelligently creates, manages, and presents time-consistent snapshot images of Oracle® databases for rapid application recovery, near-continuous data protection, data sharing, and non-disruptive backup.

HP 3PAR Recovery Manager for Microsoft SQL Server: 3PAR Recovery Manager for Microsoft SQL Server is another extension to 3PAR Virtual Copy that eases costs and administration by providing rapid, affordable online recovery of Microsoft® SQL Server databases from multiple, highly granular point-in-time snapshots. Quickly recover a database to a known point in time, speeding up a variety of operations including rapid recovery of the production SQL server.

HP 3PAR Plug-In for VMware vCenter: The 3PAR Plug-In for VMware vCenter gives VMware administrators enhanced visibility into storage resources and precise insight into how individual virtual machines are mapped to datastores and individual storage volumes. When used in conjunction with 3PAR Recovery Manager for VMware vSphere, this plug-in gives administrators the power of seamless, rapid online recovery from within the vCenter Server virtualization management console.

HP 3PAR System Reporter: System Reporter is a historical performance and capacity management tool for storage reporting, monitoring, and troubleshooting.

HP 3PAR Host Explorer: Running as an agent on the server, 3PAR Host Explorer automates host discovery and collection of detailed host configuration information critical to speeding provisioning and simplifying maintenance. Host Explorer automatically and securely communicates host information such as Fibre Channel Worldwide Name (WWN) and host multipath data to the InServ to reduce manual administration.

HP 3PAR Multipath I/O for IBM AIX: 3PAR MPIO for IBM AIX provides multipathing for IBM®AIX® hosts featuring multiple active/active paths, load balancing, and automatic failover and recovery.

HP 3PAR Multipath I/O for Microsoft Windows 2003: 3PAR MPIO for Microsoft Windows 2003 provides multipathing for Microsoft Windows® hosts featuring multiple active/active paths, load balancing, and automatic failover and recovery.

HP 3PAR Policy Server

HP 3PAR Policy Server works to implement customer-configurable remote service access policies. Installed on a customer-provided host, Policy Server provides the customer with ultimate flexibility and control to allow or deny outbound communication or remote service connections to and from an HP 3PAR StoreServ Storage system. Policy Server also serves as the centralized point for collecting and storing audit logs of all diagnostic data transfers and authorized remote service connections to and from all configured HP 3PAR Storage systems.

HP 3PAR Policy Server provides the following benefits:

- The customer has complete control over policy administration.
- A centralized policy administration for all HP 3PAR Storage systems is provided.
- A centralized audit log to facilitate security audits is provided.

Technical Specifications

HP 3PAR StoreServ Software Suites

The HP 3PAR StoreServ Storage family including the HP 3PAR StoreServ 7000, 7450 and 10000 Storage now provide the opportunity for you to purchase software bundled into a series of suites designed to be affordable and simple to purchase. Select software titles can also be purchased separately, as indicated below.

HP 3PAR Operating System Software Suite

Overview HP 3PAR Operating System Software Suite is the foundation software of HP 3PAR StoreServ Storage, combining advanced virtualization capabilities with simple storage management, high efficiency, and world class performance. The included comprehensive thin provisioning capabilities allow your storage to start thin, get thin and stay thin. System Tuner and Autonomic Rebalance help maintain high performance over time. Migrating your existing data from HP EVA and 3PAR systems to HP 3PAR StoreServ Storage is easy with the included 180 day Online Import license. HP 3PAR SmartStart Software, included in the suite for HP 3PAR StoreServ 7000 and 7450, guides you through the configuration of the service processor, StoreServ Storage and the application hosts - making storage setup virtually effortless. HP 3PAR Operating System Software Suite is a required purchase.

The Operating System Suite includes the following functionality and features:

- HP 3PAR Operating System Software
- HP 3PAR Thin Provisioning
- HP 3PAR Thin Conversion
- HP 3PAR Thin Persistence
- HP 3PAR Thin Copy Reclamation
- HP 3PAR Autonomic Rebalance
- HP 3PAR System Tuner
- HP 3PAR Management Console
- EVA to 3PAR Online Import**
- HP 3PAR Host Explorer
- HP 3PAR SmartStart (not included in HP 3PAR StoreServ 10000)
- HP 3PAR Virtual Service Processor (not included in HP 3PAR StoreServ 10000)
- HP 3PAR Multipath Software for Windows 2003

HP 3PAR Optimization Suite

Overview HP 3PAR Optimization Suite gives enterprise and cloud datacenters the ability to optimize service levels autonomically, on a large scale, and for a lower total cost than any other solution available today.

The Optimization Suite includes the following functionality and features:

- Adaptive Optimization
- Dynamic Optimization
- System Tuner

The Optimization Suite is offered on HP 3PAR StoreServ 10000 Storage Systems.

| | | |
|---------------|--|---------|

HP 3PAR Data Optimization Software Suite

Overview The HP 3PAR Data Optimization Software Suite makes sure that data is on the right storage asset at the right time. This suite rebalances, redistributes and refreshes storage non-disruptively with features that provide autonomic storage tiering and dynamic data mobility, reducing cost and increasing agility. Adaptive Optimization provides highly reliable, non-disruptive, cost-optimized storage tiering at the sub-volume level to deliver the right QoS to the right data at the right time on a large scale and Dynamic Optimization delivers it at the volume level. Peer Motion software enables seamless technology refresh and cost-optimized asset lifecycle management, and lowers technology refresh capital expenditure.

The Data Optimization Suite bundles the following products:

- HP 3PAR Adaptive Optimization
- HP 3PAR Dynamic Optimization
- HP 3PAR Peer Motion

HP 3PAR Data Optimization Software Suite v2

Overview The HP 3PAR Data Optimization Software Suite v2 combines capabilities that provide autonomic storage tiering and dynamic data mobility with assured quality of service. Adaptive Optimization provides highly reliable, non-disruptive, cost-optimized storage tiering at the sub-volume level to deliver the right QoS to the right data at the right time on a large scale and Dynamic Optimization delivers it at the volume level. Peer Motion software enables seamless technology refresh and cost-optimized asset lifecycle management, and lowers technology refresh capital expenditure. Priority Optimization software allows customers to ensure quality of service on HP 3PAR StoreServ Storage Systems. With Priority Optimization, customers can protect their tenants and environments from unpredictable burst of I/O and maintain predictable SLA for multiple tenants. The Data Optimization Suite v2 bundles the following products:

The Data Optimization Suite v2 bundles the following products:

- HP 3PAR Adaptive Optimization
- HP 3PAR Dynamic Optimization
- HP 3PAR Priority Optimization
- HP 3PAR Peer Motion

The Data Optimization Software Suite is offered on HP 3PAR StoreServ 7000, 7450 and 10000 Storage Systems

HP 3PAR Replication Software Suite

Overview The HP 3PAR Replication Software Suite offers automatic replication, transparent failover and Point-in-Time (PIT) copies enabling seamless disaster recovery for critical data. These features provide an agile, efficient and simple solution to protect against the unpredictable. This suite is ideal for virtualized data centers demanding data availability and business continuity 24x7. Remote Copy

Technical Specifications

Software dramatically reduces the cost of remote data replication and disaster recovery by leveraging thin copy technology, enabling multi-site and multi-mode replication with both midrange and high-end arrays, and reducing the need for professional services. Virtual Copy enables rapid application recovery-while containing costs with a "thin-aware" implementation that minimizes the amount of physical capacity that is actually being consumed by your data-and without sacrificing performance, availability, or versatility. HP 3PAR Peer Persistence software enables HP 3PAR StoreServ systems located at metropolitan distances to act as peers to each other, presenting a nearly continuous storage system to VMware vSphere hosts connected to them.

The Replication Suite includes the following functionality and features:

- HP 3PAR Virtual Copy
- HP 3PAR Remote Copy
- HP 3PAR Peer Persistence

HP 3PAR Security Software Suite

Overview

HP 3PAR Security Software Suite provides secure administrative segregation of users and hosts, allowing individual user groups and applications to confidently share a HP 3PAR StoreServ Storage system. It also allows you to secure volumes and copies so they cannot be deleted, even by a HP 3PAR StoreServ Storage user with the highest level privileges. When coupled with reservationless, non-duplicative, read-only virtual copies (snapshots), the Virtual Lock feature enables you to retain frozen, point-in-time copies of your data to assist internal data retention and simplify compliance with internal governance procedures.

The Security Suite includes the following products:

Technical Specifications

- HP 3PAR Virtual Domains
- HP 3PAR Virtual Lock

HP 3PAR Reporting Software Suite

Overview HP 3PAR Reporting Suite provides flexible, simple-to-use performance and capacity management tools that aggregate fine-grained, performance and capacity usage data. It also provides useful information on the volume mapping between the HP 3PAR StoreServ Storage and the application host.

The Reporting Suite includes the following products:

- HP 3PAR System Reporter
- HP 3PARinfo

HP 3PAR Application Software Suite for VMware

Technical Specifications

Overview HP 3PAR Application Suite for VMware provides VMware administrators enhanced visibility into storage resources and precise insight into how individual virtual machines are mapped to datastores and individual storage volumes. It also gives administrators the power of seamless, rapid online recovery from within the vCenter Server virtualization management console.

The Application Suite for VMware is now a part of Insight Control for vCenter. The Insight Control for vCenter now includes the following functionality and features:

- HP Server component
- HP Storage component - includes HP 3PAR VASA provider and HP 3PAR Management Plug-in for VMware vCenter
- HP 3PAR Recovery Manager for VMware vSphere

HP 3PAR Application Software Suite for Exchange

Overview HP 3PAR Application Suite for Exchange provides administrators the power of seamless, rapid online recovery of Microsoft Exchange application. It is an extension to Virtual Copy which enables creation of application consistent snapshots without sacrificing performance, availability or versatility.

The Application Suite for Exchange includes the following functionality and features:

- HP 3PAR Recovery Manager for Exchange
- HP 3PAR VSS hardware provider

HP 3PAR Application Software Suite for SQL

Technical Specifications

Overview HP 3PAR Application Suite for SQL provides administrators the power of seamless, rapid online recovery of Microsoft SQL application. It is an extension to Virtual Copy which enables creation of application consistent snapshots without sacrificing performance, availability or versatility.

The Application Suite for SQL includes the following functionality and features:

- HP 3PAR Recovery Manager for SQL
- HP 3PAR VSS hardware provider

For more information see <http://h18006.www1.hp.com/storage/software/3par7000/as-sql/index.html>

HP 3PAR Application Software Suite for Microsoft Hyper-V

Overview HP 3PAR Application Suite for Hyper-V provides administrators the power of seamless, rapid online recovery of Microsoft Hyper-V VMs. It is an extension to Virtual Copy which enables creation of application consistent snapshots without sacrificing performance, availability or versatility.

The Application Suite for Hyper-V includes the following functionality and features:

- HP 3PAR Recovery Manager for Hyper-V
- HP 3PAR VSS hardware provider

NOTE: HP 3PAR Virtual Copy Software is a prerequisite, purchased independently or in the HP 3PAR Replication Software Suite.

HP 3PAR Application Software Suite for Oracle

Overview HP 3PAR Application Suite for Oracle provides administrators the power of seamless, rapid online recovery of Oracle database application. It is an extension to Virtual Copy which enables creation of application consistent snapshots without sacrificing performance, availability or versatility.

Technical Specifications

The Application Suite for Oracle database includes the following functionality and features:

- HP 3PAR Recovery Manager for Oracle

For more information see <http://h18006.www1.hp.com/storage/software/3par7000/as-oracle/index.html>

HP 3PAR StoreServ Software Media

Overview

The part numbers below are media kits for all 3PAR Software products. Electronic and physical media kits options are available

Models

| | |
|---|---------|
| HP 3PAR StoreServ Management and Core Software Media | BD362A* |
| HP 3PAR 7000/7450 Operating System Suite Media | BD363A* |
| HP 3PAR 10000 Operating System Suite and Service Processor Software Media | BD364A* |
| HP 3PAR StoreServ Reporting Suite Media | BD373A* |
| HP 3PAR StoreServ Application Suite for Exchange Media | BD368A* |
| HP 3PAR StoreServ Application Suite for Hyper-V Media | BD369A* |
| HP 3PAR StoreServ Application Suite for Oracle Media | BD370A* |
| HP 3PAR StoreServ Application Suite for SQL Media | BD371A* |
| HP 3PAR StoreServ Application Suite for VMware Media | BD372A* |
| HP 3PAR 7000 Service Processor Software Media | BD365A* |

*Insert AE at the end of a part number above for an electronic media (eg. XXXXAAE).

Note on HP 3PAR Software Licensing Schemes

HP 3PAR follows multiple licensing schemes for different software offerings. There are three different licensing schemes those are largely employed across the HP 3PAR software portfolio. They are the spindle based licensing, simplified spindle based licensing and frame based licensing. The frame based licensing approach requires that the HP 3PAR software offering is licensed only once for the system. This form of licensing is common to all the HP 3PAR Storage platforms. The following list shows the HP 3PAR software products which follow the frame based licensing approach:

- HP 3PAR System Reporter
- HP 3PAR Online Import Software
- HP 3PAR Reporting Software Suite
- HP 3PAR Recovery Manager for VMware vSphere
- HP 3PAR Recovery Manager for Microsoft Exchange
- HP 3PAR Recovery Manager for Oracle
- HP 3PAR Recovery Manager for Microsoft SQL Server
- HP 3PAR Plug-In for VMware vCenter
- HP 3PAR Plug-In for Microsoft Hyper-V
- HP 3PAR Application Software Suite for VMware
- HP 3PAR Application Software Suite for Exchange
- HP 3PAR Application Software Suite for SQL
- HP 3PAR Application Software Suite for Microsoft Hyper-V
- HP 3PAR Application Software Suite for Oracle

The spindle based licensing approach requires a HP 3PAR software offering to be licensed based on each drive or drive magazine

Technical Specifications

installed on the HP 3PAR Storage system. There are two different models followed based on this licensing mechanism - the spindle based licensing and the simplified spindle based licensing. The following table shows the licensing models used in the various HP 3PAR Storage platforms:

| Licensing Scheme | Spindle Based Licensing | Simplified Spindle Based Licensing |
|---------------------------------|-------------------------|------------------------------------|
| HP 3PAR F-Class Storage | Yes | No |
| HP 3PAR T-Class Storage | Yes | No |
| HP 3PAR StoreServ 7000 Storage | No | Yes |
| HP 3PAR StoreServ 10000 Storage | Yes* | Yes |

* Spindle based licensing on HP 3PAR StoreServ 10000 Storage will be available till 10/31/2013 only

In the spindle based licensing approach, there is a different SKU available for each combination of drive capacity and drive type. Based on the specific drives being purchased for a HP 3PAR Storage system, the corresponding software SKU needs to be purchased. This purchase should be done for all the drives on the system irrespective of the number of drives or nodes or capacity of the system

In the simplified spindle based licensing approach, every software title has a Base LTU which needs to be purchased once for a system. For every drive or drive magazine added to the system thereon, a drive LTU (for 7000) or a drive magazine LTU (for 10000) has to be purchased for the system respectively. The drive LTU or the drive magazine LTU for a particular platform is a single SKU irrespective of the drive type or drive capacity. Furthermore, based on the type of HP 3PAR Storage system, there is a specific number of drives beyond which any software title is not required to be purchased for that system. Please note that HP 3PAR Software suites are available only in the form of simplified spindle based licensing approach. The following table shows the maximum drive limits for each of the HP 3PAR Storage systems that support the simplified spindle based licensing approach:

| HP 3PAR StoreServ Storage | Maximum number of drives for licensing* | Comments |
|---------------------------------|---|---------------------|
| HP 3PAR StoreServ 7200 Storage | 48 drives | - |
| HP 3PAR StoreServ 7400 Storage | 168 drives | - |
| HP 3PAR StoreServ 7450 Storage | no limit | - |
| HP 3PAR StoreServ 10400 Storage | 320 drives | 80 drive magazines |
| HP 3PAR StoreServ 10800 Storage | 640 drives | 160 drive magazines |

*For a particular software offering no further licensing is required for a system beyond these drive counts

The list below shows the software titles available in the form of spindle based licensing and simplified spindle based licensing:

| HP 3PAR Software Title | Spindle Based Licensing | Simplified Spindle Based Licensing |
|-----------------------------------|-------------------------|------------------------------------|
| HP 3PAR Operating System Software | Yes | No |
| HP 3PAR Thin Provisioning | Yes | No |
| HP 3PAR Thin Conversion | Yes | No |
| HP 3PAR Thin Persistence | Yes | No |
| HP 3PAR Virtual Copy | Yes | Yes |
| HP 3PAR Remote Copy | Yes | Yes |
| HP 3PAR Peer Persistence | Yes | Yes |

Technical Specifications

| | | |
|---|-----|-----|
| HP 3PAR Adaptive Optimization | Yes | Yes |
| HP 3PAR Dynamic Optimization | Yes | Yes |
| HP 3PAR Priority Optimization | Yes | Yes |
| HP 3PAR System Turner | Yes | Yes |
| HP 3PAR Virtual Domains | Yes | Yes |
| HP 3PAR Virtual Lock | Yes | Yes |
| HP 3PAR Peer Motion | Yes | Yes |
| HP 3PAR Operating System Software Suite | No | Yes |
| HP 3PAR Replication Software Suite | No | Yes |
| HP 3PAR Data Optimization Software Suite | No | Yes |
| HP 3PAR Optimization Software Suite* | Yes | Yes |
| HP 3PAR Data Optimization Software Suite V2 | No | Yes |
| HP 3PAR Security Suite | No | Yes |

* Optimization Software Suite is available only on HP 3PAR StoreServ 10000 Storage

Service and Support

Service and Support

Services to accelerate time to results

HP Storage Services bring you a rich portfolio of consulting and support services designed to add value to our core storage products and solutions. We have the know-how and experience to put storage technology to work for you. We work closely with you as your strategic partner, leveraging our full services portfolio to make sure that everything works to optimize your enterprise.

Choose from services aligned to our storage product offerings and lifecycle. From mission-critical onsite services to innovative web-based remote support, you choose the precise level of attention and support your business demands.

Discover, plan, and design

Choose from a rich portfolio of services to make the most of 3PAR Application Software Suite for Microsoft Exchange (Malpe - PL 43), so you can efficiently and affordably consolidate, manage, and extract value from unstructured data.

Start here to understand your data protection options. Next, develop a methodical plan and design the optimal 3PAR Application Software Suite for Microsoft Exchange (Malpe - PL 43) Storage that addresses your unique technology requirements.

HP Storage Efficiency Analysis - HP Storage Efficiency Analysis (SEA) combine tool-based fact gathering and HP's expertise for a quick path to identify immediate issues and their resolution, and helps customer realize the benefits of HP Storage Technology
<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA3-6727ENW.pdf>

HP Storage Impact Analysis - This service provides assessment service to analyze your current storage and evaluate the impact of change to the infrastructure. It is ideal for customers looking to achieving top utilization of your storage technology and assessing the likely impact of data growth and future projects that require storage.
<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA4-1174ENW.pdf>

HP Storage Modernization service Storage Modernization helps customers seamlessly position themselves to integrate the latest technological advancements in storage effectively. It helps clients modernize, reduce costs, and improve quality of service through the execution of process and technology changes to achieve demand management.
<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA3-4620ENW.pdf>

Deploy and integrate

Implement 3PAR Application Software Suite for Microsoft Exchange (Malpe - PL 43) Storage correctly-right from the start-so you can count on reduced risk and accelerated deployment, while implementing a best-practice configuration from day one.

HP 3PAR StoreServ Storage Installation and Startup Service - Onsite installation and testing installs and tests HP 3PAR StoreServ Storage, including configuration and deployment, properly integrated into your environment
<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA4-2568ENW.pdf>

HP 3PAR Software Installation and Startup Service - Support for deployment of licensed HP 3PAR

Service and Support

software products into operation

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA4-2569ENN.pdf>

HP Storage Data Migration Service - End-to-end data migration service providing seamless discovery, assessment, planning, and design, completely customizable to your organization's storage area network (SAN) or network attached storage (NAS) environment and using innovative software to help you migrate to HP storage quickly and efficiently

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA3-0774ENW.pdf>

HP EVA to HP 3PAR StoreServ Acceleration Service - An alternative to do-it-yourself data migration options with guidance from our storage migration specialists, designed to help you execute an HP EVA to HP 3PAR StoreServ Storage data migration at your own pace and with lowered cost

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA4-4234ENW.pdf>

HP Data Replication Solution Service - Configuration of real-time data mirroring or snapshot capabilities of 3PAR Remote Copy and 3PAR Virtual Copy to safeguard your critical business information

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA0-9431ENW.pdf>

HP Enhanced Implementation Service for SANs - Complete design and implementation service for Fibre Channel, FCoE, FCIP, SAS, and iSCSI SAN connectivity components

HP 3PAR Adaptive Optimization Policy Implementation Service - Analysis, recommendations, and implementation of HP 3PAR Adaptive Optimization policies to enable storage tiering using data collected from your HP 3PAR storage over time

HP Storage Virtual Volume Design and Implementation Service - Activities your organization needs to design and implement a new LUN, virtual volume, or virtual disk (Vdisk) configuration

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA3-0774ENW.pdf>

HP Proactive Select - A flexible way to purchase services to fit your environment with an extensive menu of HP Proactive Select event and technical services, such as onsite firmware upgrades, health checks, assessments, and education

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA2-3842ENW.pdf>

HP Thin Volume Conversion Service - Evaluation and execution of conversion from standard to thin provisioned volumes for HP 3PAR StoreServ Storage for when you are looking to optimize the utilization of HP 3PAR StoreServ Storage by improving capacity utilization and performance

<http://h20195.www2.hp.com/V2/GetPDF.aspx/c01658303.pdf>

HP 3PAR StoreServ Health Check - Assessment of the overall health and supportability of your HP 3PAR StoreServ Storage

<http://h20195.www2.hp.com/v2/GetPDF.aspx/4AA4-3404ENW.pdf>

HP Performance Analysis Service - Data collection, detailed input/output (I/O) analysis, and enhancement recommendations to improve HP 3PAR StoreServ Storage disk array performance, stability, and availability by identifying potential problems and understanding the possible solutions

Service and Support

that will help avoid them

HP 3PAR Rebalance Service - Planning and coordinating activities led by HP Storage Services professionals to deliver a successful disk array rebalance, including creation and implementation of a rebalance service plan, verification tests to confirm product functionality, and an orientation session to review changes made to the system

<http://h20195.www2.hp.com/v2/GetPDF.aspx/4AA4-0280ENW.pdf>

HP 3PAR Storage Assessment Service - Assessment check based on a point-in-time snapshot of system configuration, capacity, supportability, and interoperability for a single HP 3PAR Storage, ideal when you are experiencing rapid growth or need to establish a baseline understanding of your current HP 3PAR StoreServ environment

<http://h20195.www2.hp.com/v2/GetPDF.aspx/4AA4-0280ENW.pdf>

Operate and support

Choose the right support to maximize uptime, free up your resources, and achieve improved value-as you get the most out of the existing IT assets while accelerating time-to-revenue.

HP Critical Service - Proactive activities and 24x7 monitoring of your environment-ideal for when uninterrupted uptime is essential

HP Proactive Care 24x7 - Hardware and software support services designed specifically for your technology with rapid access to Advanced Solution Center Specialists plus firmware and software management and best practice advice

<http://h20195.www2.hp.com/v2/GetPDF.aspx/4AA3-8855ENW.pdf>

HP Proactive Care Personalized Support - An option-if you have HP Proactive Care- to bring increased personalization of the Proactive Care support experience through the assignment of an Account Service Manager (ASM) who provides IT best practice advice to help address IT issues and projects.

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA4-3446ENW.pdf>

HP Education Services - Comprehensive training for new, as well as experienced, storage administrators designed to expand your skills and keep you up to speed with the latest storage and virtualization technology from HP Storage. <http://education.hp.com/curr-storsan.htm>

Optimized Care - delivers best performance and stability through deployment and proactive management practices

Choose from three levels of operate and support care

HP Critical Service

Additional options - 10 HP Proactive Select credits per year, per array

Standard Care - maintains high level of uptime, along with expert help to cut the cost and complexity of implementation and support

HP Proactive Care 24x7-Plus, 20 credits per year per array

Additional options - HP Proactive Care Personalized Support (once per Proactive Care support new environment), an additional day of HP Personalized Support, and 10 additional HP Proactive Select credits per year, per array

Service and Support

Basic Care - Minimum recommended support

HP Proactive Care 24x7, plus 10 HP Proactive Select credits per year, per array

Additional options - HP Proactive Care Personalized Support (once per Proactive Care support new environment), an additional day of HP Personalized Support, and 10 additional HP Proactive Select credits per year, per array

Remote Support Automation

HP Automation provides 24x7 coverage, proactive problem prevention, accurate problem diagnosis and faster problem resolution, as well as interactive support portals and tools. This is an integral, and cost-free, part of your HP support relationship and we are continually investing in additional cutting-edge capabilities to make it better.

Summary of Changes

| Date | Version History | Action | Description of Change: |
|-------------|-----------------------|---------|--|
| 18-Aug-2014 | From Version 21 to 22 | Changed | Changes made throughout the entire QuickSpec |
| 18-Jul-2014 | From Version 20 to 21 | Changed | – removed NOTE regarding physical licenses for F-Class and T-Class platforms for Virtual Copy Software, Remote Copy Software, Peer Persistence Software, Adaptive Optimization Software, Dynamic Optimization Software, System Tuner Software, Virtual Domain Software, Virtual Lock Software, Peer Motion Software, Priority Optimization Software, Recovery Manager Software, 3PAR Multipath I/O for Microsoft Windows 2003, 3PAR Inform Software |
| 27-Jun-2014 | From version 19 to 20 | Changed | Changes made throughout the entire QuickSpec |
| 10-Jun-2014 | From Version 18 to 19 | Changed | Product descriptions were revised throughout. |
| 18-Apr-2014 | From Version 17 to 18 | Changed | Removed a note. |
| 14-Apr-2014 | From Version 16 to 17 | Changed | Product Specifications was revised. |
| 31-Mar-2014 | From Version 15 to 16 | Changed | Product Specifications was revised. |
| 17-Jan-2014 | From Version 14 to 15 | Changed | Product Specifications and Technical Specifications were revised. |
| 09-Dec-2013 | From Version 13 to 14 | Changed | Product Specifications and Technical Specifications were revised. |
| 04-Oct-2013 | From Version 11 to 13 | Added | Added Note on HP 3PAR Software Licensing Schemes to the Technical Specification section. |
| 26-Aug-2013 | From Version 10 to 11 | Added | Added HP 3PAR StoreServ 10000 Software Suites Upgrade Options. |
| 11-Jun-2013 | From Version 9 to 10 | Added | Added a new part number BC959A* to the HP 3PAR Operating System Software section. |
| 10-Jun-2013 | From Version 8 to 9 | Changed | Changes made throughout the entire QuickSpec. |
| 08-Mar-2013 | From Version 7 to 8 | Changed | Updated the following: Overview - added branding to Host Software; Inform OS Highlights - added HP; Additional 3PAR Software - added Virtual Lock, Peer Motion and Peer Persistence; Product Specifications - replaced Vrt Cpy with Virtual Copy; 3PAR Remote Copy - added HP branding; 3PAR Dynamic Optimization and Policy Advisor - added HP branding, replaced V-Class with StoreServe 10000; 3PAR System Tuner - added HP branding, replaced V-Class with StoreServe 10000; 3PAR Virtual Domains - replaced InServ with StoreServ and added HP branding; 3PAR Virtual Lock - replaced InServ with StoreServ and added HP branding; Peer Motion - added HP branding; 3PAR Host Software; removed "Inform" and changed intro paragraph; Added Models - System Reporter, Host Explorer, MPIO; Models - Cluster |

Summary of Changes

| | | | |
|-------------|---------------------|---------|---|
| | | | Extension SW |
| 19-Feb-2013 | From Version 6 to 7 | Added | Added the Service and Support section. |
| | | Changed | Changes made throughout the Product Specifications sections. |
| 04-Dec-2012 | From Version 5 to 6 | Changed | Changes made throughout the entire QuickSpec. |
| 30-Aug-2011 | From Version 4 to 5 | Changed | Changes made throughout the entire QuickSpec. |
| 21-Apr-2011 | From Version 3 to 4 | Changed | Part numbers were revised and added. |
| 05-Apr-2011 | From Version 2 to 3 | Changed | Part numbers were revised and Insert AE at the end of a part number for an electronic LTU note was added. |
| 23-Feb-2011 | From Version 1 to 2 | Changed | Changed the Overview information for the HP 3PAR Adaptive Optimization section. |
