

DEFCON P2MKL Dual Cable Lock - Grey

ASP57MKEUX

Description

The DEFCON® Dual P2MKL Cable Lock is a dual locking device featuring a 1.8m steel cable with a pass through loop on one end and two locks on the other end. This allows two devices to be secured with a single cable lock. Any attempts to remove it will damage the computer, preventing resale and therefore discouraging theft. The lock utilizes the security slot already built into many laptop computers today. This dual cable lock also ships with two identical keys giving you the peace of mind of a back-up key. This product also comes with a master key solution giving administrator the ability to unlock a pre-determined set of cable locks with a single master key.

Features

- Construction - Features a sturdy 1.8m galvanised steel cable
- Utilise the security slot already built into your laptop to attach this lock
- Convenience - Comes with two identical keys; no combination to remember
- Protect your device - Locks any computer, projector or LCD monitor equipped with a lock slot
- Security mechanism is locked and unlocked using a key
- Lock attaches to your laptop using the rectangular Lock Slot (standard on all laptops); impeding theft and acting as a great deterrent
