

MPN: USBAFB

USB2.0 Adapter

The MicroConnect USBAFB Adapter seamlessly converts a USB A female port to a USB B male connection. This adapter provides a cost-effective and convenient solution for adapting existing cables or devices with different USB connector types. Ideal for connecting printers, scanners, or other peripherals with a USB B port to a computer or hub with a standard USB A connection. Benefit from reliable data transfer and a secure connection, reflecting MicroConnect's commitment to quality and functionality in every adapter. With this adapter you can easily extend the life of your existing cables and avoid the need to purchase new ones, saving time and resources.
