

HPE ProLiant BL660c Gen9 E5-4610v4 1.8GHz 10-core 2-processor 64GB-R Server (844356- B21)

ProLiant Server Blades

What's new

- E5-4600 v4 Intel Xeon processors and HPE 2400MT/s DDR4 SmartMemory.
- Support for two NVMe SSDs for high performance caching.
- Optional 120GB Dual M.2 Kit.
- HPE PCIe Workload Accelerators for up to 3.2 TB of flash based cache.

Overview

Do you need a server blade designed to scale for your data-intensive workloads?

The HPE ProLiant BL660c Gen9 Server Blade is ideal for virtualization, database, business processing, and other four processor (4P) applications where fine-tuning of data center space and price/performance is paramount. Focused on flexibility, it offers more storage options, faster I/O, and more

- Up to four SFF drives, internal USB 3.0, optional dual micro-SD, and optional M.2 support deliver a variety of system boot options.

powerful processing to meet any workload needs at a low TCO. All of this is managed by HPE OneView, the converged management platform that accelerates IT service delivery and boosts business performance.

Supporting the Intel® Xeon® E5-4600 v3 or v4 processors, the BL660c Gen9 Server Blade redefines density-optimized 4-socket blade technology without compromising on performance. HPE DDR4 SmartMemory offers up to a 33% [1] performance increase from our previous generation. Additional support includes support for 2 NVMe SSDs, tiered array controller options, 12 Gb/s SAS, 20 Gb FlexibleLOM NICs, M.2, and USB 3.0.

Features

Ideal 4-socket Dense Form Factor Without Compromising on Performance, Scalability, and Expandability

The HPE ProLiant BL660c Gen9 Server Blade delivers four socket (4S) computing in a single-wide, full-height form factor. It has support for two or four cost-effective Intel Xeon E5-4600 v3 or v4 processors each with up to 22 cores and 135 watts without system configuration restrictions.

Provides the flexibility to optimize your core IT applications with right-sized storage for your workload, lowering TCO; all managed by HPE OneView, the converged management platform that accelerates IT service delivery and boosts business performance.

The HPE Gen9 FlexibleLOM solution for your choice of 10 Gb or 20 Gb FlexFabric ports.

Supports four Small Form Factor (SFF) drive bays for increased internal storage capacity.

Improved Memory, Storage, and I/O Performance

The HPE ProLiant BL660c Gen9 Server Blade delivers up to 21% [2] performance increases with Intel Xeon E5-4600 v4 processors.

HPE DDR4 SmartMemory at 2400MT/s (up to 4 TB with 128 GB DIMMs): +33% throughput compared to competition and 35% lower power consumption than 1.5 V DDR3 at the same bin speed.

Optional support for up to two SFF NVMe Solid State Disks (SSDs) for additional performance.

Optional HPE Smart Array P246br storage controller with 1 GB Flash-Write Back Cache (FWBC) DDR3 at 1866 MHz improves storage performance for demanding workloads.

Flexibility to Configure for Your Specific Workload for Reduced TCO

The HPE ProLiant BL660c Gen9 Server Blade delivers tiered storage controller options (HPE Smart Array P246br Controller or the HPE Dynamic Smart Array B140i Controller) for increased deployment flexibility.

Every BL660c Gen9 Server Blade includes USB 3.0, optional dual Micro-SD, two SFF drives, 12 Gb SAS and optional 64GB or 120GB M.2 support for

configuration variety of system boot options at an optimal price.

Both Unified Extensible Firmware Interface (UEFI) and Legacy BIOS modes available for increased configuration and deployment versatility.

Transforming Business Economics by Accelerating Service Delivery

HPE OneView provides the HPE ProLiant BL660c Gen9 Server Blade with the Power of One—a single comprehensive view of the data center, managing hardware, software, firmware, and drivers.

HPE Integrated Lights-out (iLO) software features server lifecycle management advancements including iLO federation, which remotely manages groups of servers at scale with built-in rapid discovery of all iLOs, group configurations, group health status, and ability to determine iLO licenses.

Technical specifications

HPE ProLiant BL660c Gen9 E5-4610v4 1.8GHz 10-core 2-processor 64GB-R Server

Product Number (SKU)	844356-B21
Processor	Intel® Xeon® E5-4610 v4 (10 core, 1.8 GHz, 25MB, 105W)
Processor speed	1.8GHz
Number of processors	2
Processor core available	20
Processor cache	25MB L3
Form factor (fully configured)	4 (c3000) 8 (c7000)
Form factor chassis	Blade
Optical drive type	None ship standard
Expansion slots	(3) Mezzanine cards For detail descriptions reference the QuickSpecs
Included hard drives	None ship standard Supports up to (4) SFF SAS/SATA/SSD hot plug drives
Memory type	1R x4 PC4-2400T-R
Memory slots	32 DIMM slots
Maximum memory	4TB Based on 128GB DIMMs
Memory, standard	64GB (4x16GB) RDIMM
Memory protection features	Advanced ECC
Network controller	10Gb 536FLB FlexFabric Adapter 2 Ports per controller and 10Gb 536FLB FlexFabric Adapter 2 Ports per controller
Storage controller	(1) Smart Array P246br
Power supply type	Enclosure-based
System fan features	Enclosure-based
Infrastructure management	iLO Management (standard), Intelligent Provisioning (standard), iLO Advanced for BladeSystem (optional), HPE OneView Adanced (optional), HPE Insight Control (optional)
Minimum dimensions (H x W x D)	5.65 x 36.63 x 51.67 cm
Weight	12.3 kg
Warranty	3/3/3 - Server Warranty includes three years of parts, three years of labor, three years of onsite support coverage. Additional information regarding worldwide limited warranty and technical support is available at: http://h17007.www1.hp.com/us/en/enterprise/servers/warranty/index.aspx

HPE Pointnext

HPE Pointnext leverages our breadth and depth of technical expertise and innovation to help to accelerate digital transformation. A comprehensive portfolio that includes – Advisory, Professional, and Operational Services is designed to help you evolve and grow today and into the future.

Operational Services

- **HPE Flexible Capacity** is a new consumption model to manage on-demand capacity, combining the agility and economics of public cloud with the security and performance of on-premises IT.
- **HPE Datacenter Care** offers a tailored operational support solution built on core deliverables. It includes hardware and software support, a team of experts to help personalise deliverables and share best practices, as well as optional building blocks to address specific IT and business needs.
- **HPE Proactive Care** is an integrated set of hardware and software support including an enhanced call experience with start to finish case management helping resolve incidents quickly and keeping IT reliable and stable.
- **HPE Foundation Care** helps when there is a hardware or software problem offering several response levels dependent on IT and business requirements.

Advisory Services includes design, strategy, road map, and other services to help enable the digital transformation journey, tuned to IT and business needs. Advisory Services helps customers on their journey to Hybrid IT, Big Data, and the Intelligent Edge.

Professional Services helps integrate the new solution with project management, installation and startup, relocation services, and more. We help mitigate risk to the business so there is no interruption when new technology is being integrated in the existing IT environment.

[1] HPE Internal testing: 14% to 33% better performance is based on similar capacity DIMM running on Hewlett Packard Enterprise server compared to a non HPE server with DDR4

[2] Intel internal testing: Up to 21% general compute throughput claim based on est. internal testing comparing 4x Intel Xeon processor E5-4669v4 to E5-4669 v3
